Out of these profits the Directors propose to declare, in addition to the foregoing dividend and bonus paid to proprietors as above stated, a further bonus of 7 per cent., making the division of profits in 1863 in all 21 per cent. upon the paid-up capital, to 31st December, free of income tax, amounting to	63,000	0	0
Leaving reserve	207,748	5	2

which, with the premium of £1,704 realised from the 426 new shares voted last year, increases that fund to £209,452 5s 2d.

The suspension of two private banks and one joint stock bank at Hereford has led to a considerable accession of business in that locality. In order to remedy the inconvenience caused by these failures, the Directors have established a branch at Ross, with entire success.

With a view also to complete the chain of connection with our Welsh branches, it has been deemed advisable to open a branch at Chester, and more recently an agency at Newcastle Emlyn, where no bank previously existed; at both of these places, the prospects of success are of the most encouraging character.

After some considerable delay in adjusting the boundaries and lights with the owners of the properties adjoining the bank premises in Bishopsgate street, the Directors have adopted a design furnished by their architect of a new building, which they believe will form an elegant and substantial structure, and prove adequate to their requirements for a long period of time. The works are now making rapid progress, and the Directors hope to hold their next annual meeting in the new premises.

The Directors have come to the full conviction that the interests of the bank require that its operations should be extended to London at the earliest possible period, and they trust that measures may be devised to effect that object. There are still some technical difficulties which the Directors would wish to see removed before calling on the proprietors to sanction such a course, but they can have no hesitation in assuring the shareholders that they will allow no time to be lost in unnceessary delay.

The following Directors go out of office by rotation, but, being eligible for re-election, offer themselves accordingly, viz.:—

John Kingston, Esq.,
John Minet Laurie, Esq., and
The Honourable Eliot Thomas Yorke, M.P.

The above report having been read, it was

Resolved unanimously—That the same be adopted and printed for the use of the proprietors.

Resolved unanimously—That John Kingston, Esq., John Minet Laurie, Esq., and the Honourable Eliot Thomas Yorke, M.P., be re-elected Directors of the Company.

Resolved unanimously—That the best thanks of the proprietors be presented to the Directors for their very successful management of the affairs of the Company.

Resolved unanimously—That the thanks of the proprietors be given to Mr Alexander Robertson and Mr Edward Atkinson, the Joint General Managers, and to the Branch Managers, and other officers of the Company, for their efficient services.

Resolved unanimously—That the best thanks of the meeting be presented to the Chairman for his able conduct in the chair.

THE LAND SECURITIES COMPANY (Limited).

Capital, £2 000,000.

DIRECTORS.

The Right Honourable the Lord Naas, M.P.—President, The Directors of the International Financial Society (Limited), acting as a Finance Committee.

John Ennis, Esq., M.P.	Henry Farquhar, Esq.
Sir James Fergusson, Bart, M.P.	Sir John Gray.
	John Horatio Lloyd, Esq.
Colonel Fulke Southwell Greville, M.P.	Hon. William Napier
	Hon. Henry Petre.
Sir John C. Dalrymple Hay, Bart., M.P.	Sir Charles Rich, Bart.
	Granville Richard Ryder, Esq.
Sir L. Palk, Bart., M.P.	
Sir H. Stracey, Bart., M.P.	Philip Twells Esq.

Offices—Chief Office, West end, 32 Charing cross, S.W. Branch Office—Office of International Financial Society, 60 Threadneedle street, E.C.

The Company will make advances, repayable with interest, at fixed terms, or by instalments, or by terminable annuities, upon the security:—

1st. Of landed estate, first-class house property, and real property of all descriptions and tenures, and of all estates and interests therein.

2nd. Of rates, dues, assessments, and impositions of all descriptions, raised or imposed by or under the authority of any Act of Parliament, public or private, Royal Charter, commissions of sewers, drainage, or other sufficient legal authority on the owners or occupiers of land.

3rd. Of charges and securities of all descriptions upon or affecting landed estate, and all real property and tenures, made, given, or issued, under the authority of any Act of Parliament, public or private.

For further information, and forms of application, apply to the Hon. William Napier, Managing Director, the Land Securities Company (Limited), 32 Charing cross, London, S.W.

THE LAND SECURITIES COMPANY (Limited).

The Company issue MORTGAGE DEBENTURES, bearing 4½ per cent. interest, payable half-yearly, at the bankers of the Company in London, or at such country bankers as may be arranged with the holders, payable at such periods and for such amounts as may suit investors. The aggregate amount of the Debentures at any time issued is strictly limited to the total amount of the moneys for the time being, secured to the Company by carefully selected mortgages, of which a register is kept at the Company's chief office, open to inspection by Debenture holders. The holders have, moreover, the security of the large uncalled capital of the Company, which amounts at present to £900,000. These Debentures, therefore, combining the advantage of a good mortgage with ready convertibility, will be found a perfectly safe and convenient investment.

The Company accept money, on deposit, in the smallest or largest sums, at interest, in anticipation of investments in the mortgage debentures, and they undertake the negotiation of special investments to suit exceptional circumstances.

Apply to the Hon. William Napier, Managing Director, Land Securities Company, No. 32 Charing cross, S.W.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853).

Right Honourable Lord Naas, M.P., Chairman.

To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea coast or on the banks of navigable rivers or lakes.

4. The erection of farm houses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farm houses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

Apply to the Hon William Napier, Managing Director, 2 Old Palace yard, Westminster, S. W.

IMPORTANT ANNOUNCEMENT.—

JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

ESTABLISHED 1845.

THOMAS FORSHAW,

Purchasing Agent and Packer,
5 Marsden street, Manchester.

Of all sorts of Manchester, Scotch and Yorkshire goods—of Steam Engines—Water Wheels—Bullock Gear—Mill Gear - Cotton Gins—Corn Mills—and Cotton Seed.

Patterns collected free, and references sent on application.

LONDON, CHATHAM, AND DOVER RAILWAY.

LOANS ON DEBENTURES.

The Directors of the above Company are prepared to receive LOANS on DEBENTURES of £100 and upwards, for three or five years, at 6 per cent. per annum.—By order,

W. E. JOHNSON, Secretary.

Victoria Station, Imlico, S.W.

METROPOLITAN RAILWAY COMPANY.—LOANS on DEBENTURE.

The Directors of this Company are prepared to receive Tenders for Loans on Debenture Bonds, in sums of not less than £1,000, for a term of three or five years, dating from 15th January last, with interest from date of payment, at the rate of 4½ per centum per annum to replace bonds falling due.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster, S.W.

BRECON AND MERTHYR TYDFIL JUNCTION RAILWAY COMPANY.

LOANS ON MORTGAGE.

The Directors of this Company are prepared to RECEIVE LOANS on mortgage or debentures of the separate undertaking of the Company, for three or five years, at £5 per cent. per annum, payable half-yearly.

Applications to be made to the undersigned, at the offices of the Company, No. 9A Bridge street, Westminster. W. ROBERTS, Secretary.

PETERBOROUGH, WISBEACH, and SUTTON RAILWAY.

The Directors of this Company are prepared to receive Loans on Security of Debentures, for 3, 5, or 7 years, bearing interest at the rate of 5 per cent. per annum, payable half-yearly in London.

The interest on the above debentures will be paid by the Midland Railway Company, in terms of the Act of Parliament, which makes the debenture interest the first charge on the gross receipts of the line prior to deduction of working expenses.

H. DUDLEY COOPER Secretary.

41 Parliament street, London.

SIX PER CENT. DEBENTURES.

The Directors of the LONDON, ITALIAN, AND ADRIATIC STEAM NAVIGATION COMPANY (Limited) are now prepared to receive APPLICATIONS for MORTGAGE DEBENTURE BONDS to the amount of £40,000, secured on the six new steamers belonging to the Company, the value of which is £160,000, and the uncalled capital amounting to £180,000—together, £340,000.

The Bonds will be issued in sums of £50 and upwards; be redeemable in three, five, or seven years, and bear interest (for which Coupons will be attached) at the rate of £6 per cent. per annum, payable half-yearly, at the Bankers of the Company.

Forms of application, copies of the bond, and every information as to the Company may be had on application to the Company's office.—By order of the Board,

GEO. GRANT, Secretary.

Company's offices, 123 Fenchurch street, E.C., London, February, 1865.

BANKERS AND MERCHANTS OF

ENGLAND,—When will you believe that no money depository is secure against the present race of modern "cracksmen" but GEORGE PRICE'S Treble Patent Safes, with his Patent CASE-HARDENED DRILL-PROOF DOORS, proved to be proof against gunpowder, picklocks, and all burglars' drills and other tools and implements? Price-lists post free from George Price, Cleveland Safe and Lock Works, Wolverhampton.

BURGLAR-PROOF IRON SAFE.—

At a public meeting, held at Bolton, on February 13, 1865, at which the Mayor of Bolton presided, one of Chatwood's Patent Gunpowder Escapement and Burglar-Proof Safes was tested with gunpowder and burglar's tools, and a certificate was granted, of which the following is an extract:—

"Now we, the undersigned, Richard Stockdale, Esq., Mayor of Bolton, and John Hick, Esq., of Bolton Engineer, do hereby certify that, in our opinion, no burglar can open Chatwood's Double Patent Gunpowder Escapement Hematite Intersected Safe with the facilities and time that can be at his command, and also that the same, as we believe, is the best safe in the market, and we would strongly urge its adoption by all persons desiring immunity from all depredations of scientific burglars.

(Signed) RICHARD STOCKDALE, Mayor.
JOHN HICK."

TEETH AND PAINLESS

DENTISTRY.—Messrs LEWIN, MOSELY, and SONS, 30 Berners street, Oxford street, and 448 Strand (opposite Charing Cross Railway Station), established 1820, beg to direct attention to their method of supplying Artificial Teeth on a system of Painless Dentistry. The Teeth are cheaper, more natural, comfortable, and durable than any yet produced. They are self-adhesive, affording support to loose teeth, rendering unnecessary either wires or ligatures, require but one visit to fit, and are supplied at prices completely defying competition. Consultation free. Teeth from 5s. Sets, 5, 7, 10, and 15 Guineas, warranted. For the efficacy, utility, and success of this system, vide LANCET.

HUBBUCK'S

PATENT WHITE ZINC PAINT,

Made by their process, is the most durable and beautiful of all Paints.

Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained HUBBUCK'S PATENT WHITE ZINC PAINT will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each cask of Pure White Zinc Paint is stamped—

"HUBBUCK, LONDON, PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a reward of FIFTY POUNDS for information which shall lead to the conviction in an English or Colonial Court of those who have pirated their mark. Both exporters and retailers are liable for its sale.

IRON SHIPS.

Extract from the Report of NATHAN MERCER, Esq., F.C.S.

"7 Church street, Liverpool, April 6, 1859.

"On Saturday I visited the iron ship William Fairbairn, for the purpose of ascertaining whether or no her plates had been affected by the red lead with which she was coated previous to her late voyage to Calcutta. She was in the hands of the scrapers, and showed the great extent to which the iron had been corroded, patches of rust protruding through the paint, and being thickly spread over the unscraped portions. The red lead coating was covered with blisters, from each of which, on being opened, a clear fluid escaped, and left exposed on the surface of the iron a number of brilliantly-shining crystals of metallic lead, and that they were formed at the expense of the iron was evident from the corroded and pitted appearance of the plate beneath every blister. The fluid from the blisters is produced by the combination of the chlorine of the sea-water with the iron of the ship, showing that the 'sweat' so well known to every person interested in iron ships is not salt water, but a solution of chloride of iron.

"On those portions which had been scraped, this 'sweat' was exuding from every pore; and on looking along the surface, myriads of glittering particles of lead were seen.

"The injurious effects produced by red lead were unmistakeable and self-evident."

Certificate of the Survey of the Iron Ship Thomas Hamlin.

"Greenock, August 7, 1859.

"Gentlemen,—My iron ship Thomas Hamlin, when built, eight years ago, was coated inside and outside with your Zinc Paint; the inside coating has never been renewed.

"From the reports on other ships of even less age, I was led to fear that both the plates and rivet heads might be a good deal destroyed, the ship having had frequently sugar cargoes home from India, and molasses from the West Indies.

"When the ship was opened fore and aft for the inspection of Lloyd's surveyors in London, my pleasure was not less than the surprise of those gentlemen, Messrs Ritchie and Light, to find that both the frames, plates, and rivet heads were as good as the day on which they were coated when the ship was building; in fact, to use the expressive words of the surveyor, 'nothing could be better.'

"The high state of preservation I attribute to having had them coated, before any red oxide had formed on them, with your Zinc Paint.—I am, Gentlemen, yours very truly,

"JAMES HAMLIN.

"Messrs HUBBUCK and SON, London."

THE HEALTH OF OUR HOMES.

"Hubbuck's Patent White Zinc Paint" is entirely free from any poisonous or pernicious property. Furniture and buildings painted with it are at once disinfected. Paralysis and painter's colic are avoided. Apartments may be immediately occupied without injury to the most delicate constitution. For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked that their children, on returning from the country to newly-painted houses, have suffered in health. The reason is evident,—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour.

"Among other tests to which it has been subjected has been that of painting the hold of a sugar vessel, which, after a voyage to St Kitts and back, was found, upon being washed, to be as white as the first day the paint was applied."—*John Bull*, Sept. 14th, 1850.

THOMAS HUBBUCK AND SON, WHITE LEAD, OIL, AND VARNISH WORKS,

24 *LIME STREET, FENCHURCH STREET, LONDON.*

HUBBUCK'S ANTI-CORROSIVE PAINTS.

The most valuable protection to iron roofs, bridges, piers, ships, and buildings, exposed to stormy weather and scorching sun they soon become extremely hard, do not blister, and are very durable. They are made of stone, slate, copper, white, blue, green or any other colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For coating iron and wood ships' bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed paints, oils, driers, &c.

HUBBUCK'S PALE BOILED OIL

Has less colour than raw linseed oil; is a quick, hard, and certain drier for white and light coloured paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

LONDON:—Printed and Published by DAVID AIRD, of 18½ Exeter street, Strand, in the parish of St Paul Covent Garden, at the ECONOMIST OFFICE, 340 Strand, parish St Mary-le-Strand, in the county of Middlesex—Saturday, March 11, 1865.

ADELPHI BANK, LIMITED.

At the ordinary half-yearly meeting of the shareholders, held at Liverpool on Jan. 24, 1865, the following report and statement of accounts was taken as read:—

It affords the directors much satisfaction that they are able to present a statement of accounts which so clearly evinces the continued prosperity of the bank. The accompanying balance sheet has undergone a strict examination by a committee of three members of the board; and the directors are thoroughly satisfied that every asset now upon the books may (subject to ordinary risks) be taken as good. A dividend has been declared for the past half-year at the rate of 10 per cent. per annum, clear of income tax, which will be paid on and after the 25th January. The reserve fund now stands at 46,500*l*, having been increased by 15,000*l*, the amount of premiums on the new shares, and 1,500*l* from the profits of the past half-year; in addition to which (and after writing off all known bad debts) the sum of 717*l* 18s 1d has been carried forward in favour of the current half-year. In consequence of the new issue of shares, the number of shareholders has been more than doubled, and the directors renew their appeal to the entire proprietary, for the exercise of their influence in increasing and extending the connections of the bank. During the half-year the directors were fully alive to the extraordinary risks that were consequent on the high rates which ruled in the money market, and which affected all classes of the community; and they would not be induced to engage in transactions of a merely speculative nature, which they believed were more than likely to result in embarrassment, if not ultimate loss.

STATEMENT of ACCOUNTS, from June 30 to December 31, 1864.

AGRA AND MASTERMAN'S BANK, LIMITED.

At the thirty-first annual general meeting, held at the London Tavern, Bishopsgate street, on the 11th March, 1865, the following report was read and adopted:—

The directors, in submitting to the proprietary the audited accounts for the year ended 31st December last, beg to report that, after making ample provision for bad and doubtful debts, the available surplus is 263,120*l* 8s 6d. Out of this sum the directors have paid two half-yearly dividends at the rate of 10 per cent. per annum each on the original shares of the bank, adding a bonus of 2*l* per share for the first six months, and of 3*l* per share for the second six months, thus making the total distribution for the year 20 per cent., free of income tax, on the original capital of one million sterling. The directors have also paid a dividend at the rate of 10 per cent. per annum on the new capital of 500,000*l*, adding a bonus of 1*l* 5s per share, together equal to 20 per cent. per annum, free of income tax, for the half year just ended. The balance of 16,321*l* 11s is carried forward to credit of profit and loss account for the current year. The directors have the pleasure to report that the amalgamation with the private bank of Messrs Masterman, Peters, Mildred, and Co. has been successfully completed, and that the new capital authorised by the special resolutions passed at the extraordinary general meetings of the company, held on the 7th and 21st May last, has been subscribed. Every arrangement incident to the amalgamation has been made, and the directors, after fulfilling the engagements into which they entered, have been able to make up the reserved fund of the bank to 500,000*l*, at which they propose that it shall in future stand. The sanction of the Board of Trade has been obtained to the present designation of the bank, and the directors have applied to Parliament for an act to enable the bank to divide their shares. Since last annual meeting the directors have opened a sub-branch of the bank in Melbourne. They have also arranged for the sale, on satisfactory terms, of the premises, No. 27, Cannon street, and of the building now occupied by the branch of the bank in Calcutta.

BALANCE SHEET—31st December, 1864.

ALLIANCE BANK, LIMITED.

At a general meeting of the shareholders, held at the London Tavern, on Tuesday, the 24th January, 1865, the following report was presented:—

The directors beg to submit to the shareholders a statement of the business of the bank for the half-year ending the 31st December last. The gross profits, including 6,580*l* 14s 9d brought forward from the previous half-year, amount to 185,896*l* 17s 8d, which, after deducting current expenses, interest on current and deposit accounts, and rebate on bills discounted but not yet due, leaves a net balance of 66,731*l* 19s 9d. The numerous and extensive failures of mercantile houses during the last three months of the past year have pressed with special severity on this company, and the directors regret that the losses to be provided for on accounts now in liquidation will absorb the profits for the half-year, and a further sum of 61,737*l* 11s 5d, whice has been carried from the reserve fund to the profit and loss account. In addition to these losses, the directors think it their duty to state that there are transactions not yet matured in connection with a heavy account, which may possibly entail a large additional loss. The bank, however, holds securities, which it is hoped may be realised favourably; but whatever loss may arise will be dealt with separately, and written off the reserve fund. Under these circumstances the declaration of a dividend cannot be recommended. It is satisfactory to the directors to be able to state that, after a most careful scrutiny by themselves and the auditors, they have every reason to believe that the current business of the bank is in a sound condition, and they look forward with confidence to the future prosperity of the institution. Of the 10,000 shares authorised by the extraordinary meeting in August last, to be issued at 20*l* per share premium, 9,766 have been applied for and allotted, and the amount of premium received thereon has, in accordance with the resolutions passed at that meeting, been added to the reserve fund. The directors have to record with regret the death of Mr De Castro, and the resignation of Mr G. P. Robinson, who has left England for India; thus causing two vacancies in the direction.

BALANCE SHEET—December 31, 1864.

ANGLO-ITALIAN BANK.

Annexed is the first report, presented at the general ordinary meeting held on the 30th day of January, 1865, at the London Tavern, Bishopsgate street:—

The directors have the pleasure of submitting to the proprietors the first annual balance sheet of the Anglo-Italian Bank. Although the Government readily accorded to your directors the necessary permission to open a bank in Italy, still the legal formalities consequent thereon, together with the difficulty in finding suitable offices, and competent managers for the different branches, were productive of considerable delay, so that the office at Turin was only opened for business on the 1st of October, and the branch at Milan on the 1st of December, 1864. A branch will be opened at Florence in a few days, and the directors also intend to commence business at Naples as soon as possible, a manager and staff having been already appointed. Acting under the power given them by the articles of association, the directors have appointed local committees for Turin and Milan. The following gentlemen, representing some of the most influential firms in those cities, have consented to act in this capacity, viz.:—For Turin, Signor Giuseppe Dupre (Dupre pere et fils), Signor Vincenzo Denina, Signor Gaetano Piaggio, Signor Gaetano Spinelli (Fedele Berne and Co.); and for Milan, Signor Giulio Belinzaghi, Signor Pietra Brambilla (Brambilla and Co.), Signor Giuseppe Oneto (Oneto, Cavajani, and Co.), Signor Giovanni Noseda (Noseda and Burocco). The directors think themselves most fortunate in having secured the co-operation of these gentlemen. The gross profits up to the 31st of December have amounted to 25,102*l* 3s 7d; deducting 8,420*l* 5s 5d for expenses, and 4,652*l* 13s 4d for rebate, at 7 per cent. per annum, there remains a sum of 12,029*l* 7s 10d, out of which, after the payment of 6s per share by way of interest, free of income tax, being at the rate of rather more than 6 per cent. per annum, amounting to 5,500*l* 10s, your directors recommend that 2,831*l* 13s 1d be written off from preliminary expenses, and 2,000*l* placed to a reserve fund, leaving a balance of 1,697*l* 4s 9d undivided profit to be carried to the next account. In exercise of the power conferred on the board by the articles of association, the directors have added the following gentlemen to their number, viz., Sir J. P. Lacaita, K.C.M.G., Member of the Italian Parliament; Sab no Leonino, Esq., of the firm of Leonino Brothers, of Genoa, and Commendatore Devincenzi, President of the Royal Commission for the Cultivation of Cotton in Italy and Member of the Italian Parliament.

BALANCE SHEET—31st December, 1864.

ASIATIC BANKING CORPORATION.

Subjoined is the first report of the court of directors to the shareholders, presented at a general meeting held May 4,1865 :—

The court of directors, in presenting their first report and balance sheet, have great pleasure in congratulating their co-proprietors upon the position attained by the bank during the brief period that has elapsed since the commencement of its operations.

The half-year for which the accounts are now rendered, and during which period a portion only of the existing branches of the bank have been working, represents not only the least favourable season of the year in India, but has also been characterised by a severe monetary crisis in this country, which has necessitated the exercise of the utmost caution in conducting the business of the bank, and a consequent restriction of its operations.

Notwithstanding these drawbacks, the net profits, after deducting all charges upon the current business of the bank, and fully providing for all bad and doubtful debts, amount to £70,439 4s 8d.

This sum the directors propose to distribute in the following manner, viz. :—

£37,500	0s	0d	by a dividend at the rate of 15 per cent. per annum.
£12,500	0s	0d	by a bonus of 10s per share, equal to 5 per cent. per annum, being together equal to 20 per cent. per annum on the paid-up capital on 31st December, to be paid to the proprietors free of income tax.
£8,484	11s	11d	in liquidation of the whole of the preliminary expense.
£5,500	0s	0d	to be added to the reserve fund, which, with the premiums arising from the recent issue of new shares, will then amount on 30th June next to £175,000 ; and the balance, say—
£6,454	12s	9d	they propose to carry to the credit of the Profit and Loss Account for the current year.

The directors have further the pleasure to congratulate the shareholders upon the successful issue of the New Shares, both here and in India, which were all promptly taken up upon the terms specified in the circular addressed at the time to the original proprietors : the additional capital, though not required by any exigencies of the bank, was deemed desirable to place it upon a footing suitable to its increasing business.

The directors, whose term of office has now expired, being eligible for re-election, offer themselves accordingly, and they recommend the re-election of the present able professional auditors, and the election in addition of a non-professional auditor for the current year.

The directors also recommend the shareholders to authorise them to declare and pay such an interim dividend half-yearly, for the current and future years, as they may deem desirable, pending the final adjustment of the accounts.

GENERAL BALANCE—Dec. 31, 1864.

BANK OF AUSTRALASIA.

The thirty-first annual general meeting of proprietors was held on March 13, at the offices of the corporation in Threadneedle street ; when the following report and statement of accounts was read :—

The directors have the pleasure of placing before the proprietors the accompanying statements, showing the results of the operations of the bank for the financial year ending the 10th of October, 1864. It will be seen that these results contrast favourably with those presented last year, and that the business in New Zealand, where the principal part of the new capital was employed, was of limited amount throughout the whole period to which the accounts refer, the directors hope that the improvement will be accepted as highly satisfactory. The directors have to regret the reirement from the direction of two valued colleagues. Mr Rasch has resigned his seat owing to long continued illness, and Mr Childers in consequence of having accepted office under government. These vacancies will have to be filled up this day, in conformity with the deed of settlement. The fourth series of new shares having been paid up, the capital of the corporation is now augmented to 1,200,000*l*, the amount limited by the charter. The first instalment of 10*l* per share received dividend in October last ; the second instalment will participate in dividend in April, and the third in October next, after which date dividend will be paid on the entire capital of the corporation, and the distinction between old and shares will cease. The directors have declared a dividend on old shares, payable on the 11th of April, at the rate of 6 per cent. per annum, and a bonus at the the rate of 8 per cent. per annum, both free of income tax, being together at the rate of 14 per cent. per annum, or 2*l* 16s per share for the half-year. A dividend and bonus at the same rate per cent. will be paid at the same time on the first and second instalments of 10*l* each on the new shares, amounting together to 1*l* 8s per share.

Profit and loss account from October 12, 1863, to October 10, 1864 :—Dr. To charges of management—London, 11,751*l* 6s 9d ; colonial, including New Zealand, 78,823*l* 10s 3d ; together, 90,570*l* 17s ; to charge on the profit of the year in reduction of the cost of bank premises, 7,715*l* ; total charges, 98,289*l* 17s ; to half-year's dividend, April, 1864, of 6 per cent. per annum, and a bonus of 8 per cent., being together 14 per cent. per annum, or 2*l* 16s per share on old capital, 63,000*l* ; to ditto October, 1864, including 75,000*l* new capital, 68,250*l* ; together 131,250*l* ; to balance of undivided profit, October 12, 1864, 154,065*l* 2s 4d ; total, 383,604 19s 5d. Cr. By balance of undivided profit, October 12, 1863, 140,611*l* 11s ; by profit from October 12, 1863, to October 10, 1864, after decucting interest on deposits, and income tax, provision having been made for bad and doubtful debts, 242,923*l* 8s 5d ; total, 383,604*l* 19s 5d.

General Balance Account, October 10, 1864.—Dr. To specie, bullion, and cash at banker's, 606,586*l* 10s 8d ; to government securities and loans, 346,080*l* 16s ; to guarantee fund investment as under, 200,000*l* ; 96,797*l* 11s 11d Consols purchased at 90⅜, 87,500*l* ; 25,000 Bank stock purchased at 210, 52,500*l* ; 60,000*l* Geelong corporation debentures, guaranted by the government of Victoria, at par, 60,000*l* ; together 200,000*l*. To bills receivable, securities for advances, and other assets, 3,788,784*l* 14s 5d ; to bank premises—in Australia and London 150,346*l* 3s 9d ; in New Zealand, 19,200*l* ; together, 169,546*l* 3s 6d ; total, 5,110,998*l* 4s 10d. Cr. BANK OF BRITISH COLUMBIA.

At the general meeting held at the London Tavern, on Tuesday, April 4, 1865, the following report was read :—

The directors in submitting their report have to congratulate the shareholders on the success that has continued to attend the transactions of the bank. From the accompanying statement of accounts it will be seen, that after paying current expenses and deducting rebate of interest on bills not due, the amount of undivided profit at the conclusion of the half-year, ended 31st December last, was 18,680*l* 12s 1d, which the directors propose to appropriate as follows, viz. :—8,333*l* 6s 8d in payment of a dividend at the rate of 10 per cent. per annum (being for six months on 125,000*l*, and for four months on 62,500*l*, paid 1st September last) ; 7,000*l* to be added to reserve fund, which will be thereby increased to 13,000*l* ; leaving 3,347*l* 5s 5d to be carried forward to the current half-year.

BANK OF EGYPT.

The annexed report was presented to the ninth annual general meeting of shareholders held on February 3, 1865:—

The directors of the Bank of Egypt have the pleasure, at this, their ninth annual general meeting, to submit to the shareholders the annexed statement of accounts for the half-year which ended on December 31, 1864. The net profits, after providing for bad and doubtful debts, amount to 20,028*l* 13s 9d. This, added to 6,272*l* 12s 8d, the balance brought forward from the previous half-year, makes a total of 26,301*l* 6s 5d available for appropriation. The directors recommend that 6,482*l* be carried to the reserve fund, which, with interest, will then amount to 20,000*l*; that a dividend be declared, as on the last occasion, at the rate of 10 per cent. per annum for the half-year (12,500*l*), and a bonus of 5s per share (2,500*l*), both free of income tax, leaving a balance of 4,819*l* 6s 5d to be carried forward to the next account.

BALANCE SHEET—December 31, 1864.

BANK OF ENGLAND.

A general court of the governor and company of the Bank of England was held on the 16th March at the board room, to consider the dividend; Mr Henry Lancelot Holland, the deputy-governor, in the chair.

The deputy-governor, after expressing regret at the absence of the governor, who had recently sustained a very severe accident, which rendered his attendance impossible, added that, although he could not be present to hear the verification of what he had addressed to them on the last occasion, yet he was with them in heart and feeling for the interests of the bank. He begged to acquaint the court that this was one of the half-yearly meetings appointed by the bye-laws for the declaration of a dividend. The net profits for the half-year ending Feb. 28 were 807,317*l* 13s 2d, making the amount of the rest on that day 3,830,084*l* 7s 10d; after providing for a dividend at the rate of 5½ per cent., the rest would be 3,029,669*l* 7s 10d. The directors therefore proposed, if the shareholders approved of it, for this half-year a dividend of 5½ per cent., payable on the 6th April, without any deduction on account of income tax. That was the question they had to submit to the court of proprietors.

The report was unanimously adopted, and the court were informed that the dividend warrants would be ready to be delivered and paid on Thursday the 6th of April.

Mr Clarke proposed a vote of thanks to the governor, deputy-governor, and the directors.

Mr Poole complained that a loan had been made to the Spanish government by some of the directors of the Bank of England, and it was generally believed in Spain the advance had been made by the Bank of England itself.

Mr Alderman Salomons objected to vague charges of this description being made without notice being given. He bore testimony to the admirable way in which the governor and court of directors had conducted the affairs of the bank during the last half-year. If the Bank of England were well managed, as it had been, they never could have a crash, and the great safety of the commercial and monetary interests was the prudence of the of the governors and directors of the bank, and the example they had set in the recent crisis was highly beneficial.

Mr J. Higham objected to individual directors of the Bank of England advancing loans to a defaulting government. Such a course was condemned by the majority of the monetary and commercial world, and those directors ought not to remain connected with the bank.

The deputy-chairman had no hesitation in saying that the Bank of England had nothing to do with the loan referred to.

Thanks were then voted to the governor and the court of directors, and the business concluded.

BANK OF HINDUSTAN, CHINA, AND JAPAN, LIMITED.

At the annual meeting, held at the London Tavern on the 15th of May, 1865, the annexed report was adopted:—

The directors beg to submit to the shareholders a general statement of the affairs of the company for the year ending the 31st December, 1864. The net profits of the year, after defraying all expenses and providing for losses, amount to 15,893*l* 12s 11d, including a balance of 827*l* 11s 1d brought forward from the accounts of the previous year, out of which the sum of 14,746*l* 5s has already been paid as an interim dividend on the 20th August last, leaving a balance of 1,147*l* 7s 11d, which it is proposed to carry forward. The directors have to express their regret that the operations of this company during the past year have not exhibited a more profitable result; but taking into consideration the comparative recent formation of the bank, and the gradual extension of the branches abroad, the peculiarly disorganised condition of commercial affairs in the latter part of the year 1864, and the existence of a state of things specially calculated to embarrass the successful working of the branches, its must be a source of satisfaction that the transactions of the year have resulted in a profit, that a solid footing has been acquired by the bank, and its business and connections further extended. The causes which acted prejudicially to the welfare of the bank were of a peculiar and exceptional character. They have now ceased to exist. The operations of the present year have shown decided progress and satisfactory results, and it is therefore evident that the temporary interruption to the successful operations of the bank was caused by circumstances which were beyond the control of the directors. The meeting which confirmed the amalgamation with the Imperial Bank of China, India, and Japan (Limited) took place on the 12th of September last, and on and after the 12th of October the names of the shareholders in that institution (with the exception of those who expressed their dissent within the specified time) were transferred to the register of shareholders of this bank. The number of shares unallotted in the Imperial Bank of China, India, and Japan (Limited) was 1,310, and the number of shares refused by shareholders in that bank expressing dissent was 58. Thus, of the 20,000 shares of the new issue by this bank, 1,368 may be considered as unallotted. The total amount of capital in this bank on the 31st December, 1864, was 586,237*l*, and on the 29th ult. it amounted to 720,444*l*. The directors have the pleasure to report that notwithstanding a variety of adverse circumstances, the calls have, on the whole, been remarkably well met. The reserve fund of the bank amounts at present to 92,950*l*. In July last the Colombo branch with its sub-branches at Kandy and Point de Galle were opened. The progress of these establishments, although extending over a period of scarcely six months, is satisfactory. The directors have also to announce that in February last a branch was opened at Yokohama.

of January, 1865, Sir John Villiers Shelley, Bart., M.P., in the chair, after authentication of the register of shareholders, by affixing the common seal of the company, the following report was read by the Secretary:—

By the annexed statement of accounts, made up to the conclusion of the past half-year, which the directors have now the pleasure of submitting, it will be seen that the balance of profit amounts to 101,272*l* 2s 2d. After payment of interest upon the new shares, liquidating the current expenses, including a gratuity to the clerks of the establishment of 10 per cent. upon the amount of their respective salaries, making full provision for all bad or doubtful debts, and allowing for rebate of interest on bills discounted not yet due, there remains for disposal the sum of 62,719*l* 13s 5d. The directors declare a dividend at the usual rate of 10 per cent. per annum, and a bonus of 2*l* 10s per share, amounting together to 20 per cent. per annum, both free of income tax, and they transfer 30,000*l* to the reserve fund, which, with the addition of 136,570*l* received in respect of the new shares, now amounts to 296,570*l*. The balance, viz., 2,505*l* 4s 8d, is carried to the credit of profit and loss account of the current half-year.

BANK OF NEW SOUTH WALES.

At the half-yearly general meeting of the proprietors, held at the chief banking house, Sydney, on the 16th day of October, 1864, the following report was adopted:—

The directors have the pleasure to present to the proprietors the following abstracts of the bank's liabilities and assets, and of the profit and loss account for the half-year ended on the 30th ultimo. The net profits for that period, after deducting rebate on current bills, interest on deposits, providing for bad and doubtful debts, and reducing valuation of bank premises and office furniture, amount to 74,176*l* 16s 8d; to which is to be added—recoveries from debts previously written off as bad or doubtful, 2,106*l* 3s 11d; undivided balance from last half-year, 3,896*l* 15s 8d, giving for distribution, 80,179*l* 16s 3d, which the directors appropriate as follows:—To payment of dividend at the rate of 15 per cent. per annum, on old stock for six months, 56,250*l*; on new ditto, paid in the colonies, five months, 8,172*l* 10s; on new ditto paid in London, three months, 1,894*l* 10s; bonus at the rate of 2½ per cent. per annum on capital paid up, 11,052*l* 16s 8d; balance carried to "profit and loss," new account, 2,809*l* 19s 7d. The proprietors will observe that a larger amount of new capital has been paid than was called for on the 27th April last, and upon which dividend is now being paid; the next payment will be due to-morrow, of which intimation has already been given. The directors have the pleasure to report the advantageous purchase of a site in London upon which suitable banking premises are about to be erected. Branches of the bank have been opened in this colony at Richmond, and in Queensland, at Bowen, Port Denison.

BANK OF NEW ZEALAND.

Annexed is the sixth report of the directors of the Bank of New Zealand, presented at the half-yearly general meeting of the proprietors, held at Auckland, on 20th October, 1864:—

The directors have to lay before the proprietors the following statement of the affairs of the bank as at 30th of September last; and, while congratulating them on the increase of business, and generally successful manner in which it has been conducted, they have to express their regret that the monetary and commercial crisis which Southland has experienced during the past six months, and an indiscreet advance at Dunedin, have entailed losses much greater than may again be reasonably looked for, and but for which the profits would have been greater than during any previous half-year. Ample provision has been made for all bad and doubtful dependencies, some portion of which may yet be recovered. The net profit for the half-year after providing for all bad and doubtful debts, and making considerable reductions in bank premises and furniture accounts, amounts to 32,295*l* 14s 10d; which is to be added—undivided balance from last half-year, 2,259*l* 17s 11d—making a total available for division of 34,555*l* 12s 9d. With the addition now to be made to the reserve fund, it will amount to 100,000*l*, being in excess of 25 per cent. of the paid-up capital of the bank. The directors therefore recommend the following appropriation of the above profits:—Payment of dividend at the rate of 10 per cent. per annum, 18,231*l* 16s; bonus equal to 5 per cent. per annum, 9,115*l* 18s; addition to reserve fund, 5,000*l*; balance carried to profit and loss new account, 2,207*l* 18s 9d.

BANK OF QUEENSLAND, LIMITED.

Annexed is the report of the directors presented at the third ordinary general meeting of the shareholders on 17th May, 1865:—

The directors now submit their third report to the shareholders, accompanied by the accounts duly audited, showing the result of

Digitized by Google

the operations of the bank for the half-year to Dec. 31, 1864. The balance of undivided profit on that date amounts to 6,999*l* 1s 10d. This sum the directors propose to appropriate as follows:—500*l* to be added to the reserve fund; 509*l* 16s 8d, or 10 per cent. of the balance, to be written off preliminary expenses; 5,008*l* 16s in payment of a dividend of 12s per share, free of income tax, on the shares issued, which, with a dividend of 14s per share paid for half-year to 30th June last, will be a distribution for the year 1864 of 6¾ per cent.; 125*l* 4s 5d in payment of income tax on the dividend; and the balance of 855*l* 4s 9d to be carried forward to profit and loss new account. It was intimated in previous report that arrangements were in progress for opening a branch at Dalby. Business was commenced there on 1st September last, and the progress already made has fully realised the expectations of the directors. A branch was opened at Rockhampton on 15th December last. This is a place of considerable importance, being the present outlet for the trade of a well-settled and extensive squatting district; and the directors purposely delayed this branch until they were in a position, with larger capital paid up, to avail of the business offering. Since the 31st December last a branch has also been opened at Toowoomba, a rising town in the rich pastoral district of the Darling Downs. The formation of all these branches was necessary for satisfactorily carrying out the increasing inland business emanating from the chief branch at Brisbane. They have been established at moderate cost, which has been entirely defrayed out of the bank's earnings for the half-year. The directors fully anticipate a satisfactory and profitable result to the bank from all these establishments. The colony continues to progress, and trade during the last half of the year was active. The imports and exports for the year 1864, as compared with the previous year, show a large increase, the values being, imports, 2,267,954*l*; exports, 1,247,054*l*, an increase of 32 to 40 per cent. respectively. Of the exports, 1,037,663*l* consisted of wool, and 83,292*l* of gold and gold dust. In conclusion, the directors have pleasure in reporting that during the half-year the circulation of notes and deposits have increased 89 and 55 per cent. respectively; and that during same period the number of current accounts has increased upwards of 80 per cent.

BANK OF SCOTLAND.

The following are extracts from the report of the directors of the Bank of Scotland to the annual meeting of the proprietors held April 29, 1865:—

The directors, in presenting their report upon the affairs of the bank, have to inform the proprietors that they have thought it advisable that the financial year of the bank should close at the end of February, instead of the 31st December as hitherto, with the view of bringing down the accounts as nearly as possible to the date of the annual meeting, which is appointed, by the Act of Incorporation, to be held upon the last Tuesday in March. In order to effect this change, it is necessary that the statements to be submitted to the proprietors at this meeting should embrace a period of fourteen months. The directors have now to report that, after deducting the expense of management (including a gratuity at the rate of 10 per cent. upon their salaries to all the officers of the establishment), interest upon deposits, rebate upon bills not due, and making ample provision for bad and doubtful debts, there remains of net profit, for the fourteen months ending 28th February last, the sum of 161,774*l* 12s 5d; two half-yearly dividends have been paid to the proprietors at the rate of 4½ per cent., and amounting to 90,000*l*—leaving a balance of 71,774*l* 12s 5d. The directors have the pleasure of recommending that a dividend be now declared at the increased rate of 10 per cent. per annum for the half-year ending the 28th February. After payment of this dividend, which amounts to 50,000*l*, there remains a surplus of 21,774*l* 12s 5d; out of which the directors have made the following appropriation: — In reduction of the heritable property in the occupation of the bank, 8,000*l*; to the reserve fund, which will then stand at 250,000*l*, 6,928*l* 10s 9d—leaving a balance of 6,841*l* 1s 8d to be carried forward at the credit of the profit and loss account for the current year. While the business of the bank has been highly satisfactory, and the general position of its affairs has warranted the directors in recommending an increased rate of dividend, which they have every reason to believe will be maintained, they think it right to caution the proprietary against anticipating a continuance of the unusually large profits recently realised, and which have arisen from the peculiar state of the money market during the past year. The following statement exhibits the liabilities and assets of the bank at the 28th February:—

Liabilities.	£	s	d
Paid-up capital	1,000,000	0	0
Deposits	6,488,227	1	0
Note circulation	573,160	0	0
Drafts issued, payable within fourteen days	225,197	4	5
Credits and acceptances by the bank and its London correspondents	136,294	8	0
Half-yearly dividend, payable April 11, 1865	50,000	0	0
Reserve fund	250,000	0	0
Balance of profits carried forward	6,846	1	8
	8,709,724	15	1

Assets.	£	s	d
Gold and silver coin, and notes of other banks	529,081	0	10
Government securities, cash with London bankers, and short loans in London	2,175,918	10	5
Stock of the Bank of England, and other similar securities	390,731	16	7
Bank premises at Edinburgh, and the branches	125,386	4	10
Bills discounted, cash accounts, and other advances	5,488,607	2	5
	8,709,724	15	1

The meeting, in accordance with the recommendation of the directors, declared a dividend at the increased rate of 10 per cent. per annum.

BANK OF VICTORIA.

At the half-yearly general meeting, held at the bank, in Melbourne, on February 7, 1865, the following twenty-fourth report was read:—

The board of management have much pleasure in submitting the following statement of the business of the bank for the half-year ending 31st December, 1864:—Balance of undivided profits, 30th June, 1864, 7,200*l* 5s; net profits for the past half-year after providing for bad and doubtful debts, 37,203*l* 17s 10d—together, 44,404*l* 2s 10d. Which the directors propose to apportion as follows, viz.:—Dividend at 12½ per cent., 31,250*l*; bank premises Cr. account, 5,000*l*—36,250*l*: leaving 8,154*l* 2s 10d, being balance of undivided profits carried forward. It will be observed that the proposed dividend has been increased to 12½ per cent. per annum; a rate justified in the opinion of the directors by the profits made during the past half-year; the reserve fund at the same time amounting to one hundred thousand pounds. The dividend will be payable at the head office on and after to-morrow, and in London and at the branches on receipt of advice.

BANK OF WALES,

The fourth ordinary general meeting of shareholders was held on the 4th of February, at the London Tavern; John N. Daniell, Esq., in the chair. The following is the directors' report:—

The directors have the pleasure of submitting the following report and balance sheet for the half-year ending the 31st December last. The annexed balance sheet shows that the gross profits for the last six months, including 203*l* 16s 8d brought forward from last account, amounts to 10,374*l* 10s 3d, and that, after deducting current expenses, directors' remuneration, and auditors' fees, there remains a balance of 1,940*l* 3s 7d. Out of this sum the directors recommend that 1,808*l* 15s be appropriated for a dividend at the rate of 5 per cent. per annum for the half-year. The shareholders have already been informed by circular that arrangements have been concluded for an amalgamation of this bank with the Provincial Banking Corporation, upon equal terms. Your directors were induced to take this step in consequeece of the rapid development of the business of the Welsh branches requiring more capital than was at their disposal, and the large available resources of the Provincial Banking Corporation met that want without necessitating a further call upon the shareholders. It is satisfactory to state, after some experience of the working of the combined banks, that this fusion of interest will considerably add to the future success of the amalgamated bank, and enable it at all times to meet every requirement of the branches. Your directors cannot make this last report to the shareholders without tendering their thanks for the confidence placed in them, and they have no doubt that their property—being now placed upon a substantial basis—will materially increase in value. Balance sheet to December 31, 1864. Dr. To capital, 72,435*l*; to reserve, 500*l*; to amount due on current, deposit, and other accounts, 164,222 16s; to gross profit: from last account, 203*l* 16s 8d; forfeited shares, 2,500*l*; profit after making provision for bad and doubtful debts, 7,670*l* 13s 7d; together, 10,374*l* 10s 3d; total, 247,532*l* 6s 3d. Cr. By preliminary expenses, 6,273*l* 12s 6d; by cash on hand and at bankers', 38,994*l* 8s 3d; by freehold and leasehold premises, furniture, expenses of establishing and purchasing branches, &c., 19,261*l* 16s 9d; by bills discounted, loans, &c., 174,563*l* 2s 1d; by current expenses, including arrears of directors' fees, &c., 6,406*l* 12s 1d; by interest paid, 2,027*l* 14s 7d; —247,532*l* 6s 3d. Profit and loss account. Dr. To current expenses as above, 6,406*l* 12s 1d; to interest paid, 2,027*l* 14s 7d; to dividend at 5 per cent. per annum, 1,808*l* 15s; to balance carried forward, 131*l* 8s 7d;—total, 10,374*l* 10s 3d. Cr. By gross profit, 10,374*l* 10s 3d.

BILSTON DISTRICT BANKING COMPANY.

Annexed is the twenty-eighth annual report, dated 7th February, 1865:—

Your directors have audited the accounts of the bank to the 31st December last, and they have pleasure in submitting the following statements:—

BIRMINGHAM BANKING COMPANY.

At the thirty-fifth annual general meeting, held at the Assembly room, Exchange buildings, on February 15, 1865, the following report was presented:—

The directors of the Birmingham Banking Company have the pleasure of presenting this, their thirty-fifth annual report, which they believe the proprietors cannot but consider to be a satisfactory one, as they are again enabled to state that the business returns of the bank have largely increased, and the profits realised during the past twelve months very far exceed those of any previous year. The net profits for the year ending the 31st December last, after writing off bad debts, allowing for the rebate of interest on bills not yet matured, and paying all current expenses, amount to 67,154*l* 7s 5d, which, with the balance of 1,702*l* 15s 6d brought forward from the previous year, makes an available total of 69,857*l* 2s 10d. Out of this sum, 20,000*l* were taken for the dividend and bonus paid in September last, and 12,000*l* which your directors appropriated on the 30th June last in liquidation of the Dudley bad debt account, and you are now recommended to declare a dividend of ten shillings and a bonus of ten shillings per share, payable on the 1st day of March next, which will absorb 26,196*l*, and to carry forward the balance of 10,661*l* 2s 10d to the current year. Bearing in mind that a largely increased amount will be required for the dividend and bonus during the current year, and having regard to the permanent interests of investors, the directors feel sure that the proprietors will consider it a wiser course to carry forward a large amount than to increase the market value of the shares by paying an additional bonus. The statement will then be as follows:—Balance of undivided profits brought forward, 1,702*l* 15s 5d; net profits for 1864, 67,154*l* 7s 5d; together, 68,857*l* 2s 10d. Less transfer to Dudley branch on June 30, 12,000*l*; dividend and bonus paid September 1, 20,000*l*; dividend and bonus payable March 1, 1865, 26,196*l*; balance to be carried forward, 10,661*l* 2s 10d. With reference to the issue of new shares your directors have to report that the whole the 5,000 shares reserved for the proprietors were taken up by them, and that of the remaining 5,000 shares, 1,894 have been advantageously placed, leaving 3,106 to be disposed of as occasion may require, as authorised by the special meeting in June last. It is with much satisfaction that the directors announce the appointment of Mr Thos. F. Shaw, as sub-manager at Birmingham, which they feel sure will be of great advantage to the working of the concern, and they have also to inform you that the branch at Wednesbury was opened on the first instant, under the management of Mr J. B. Hargreave, late cashier at the head office, and they have reason to anticipate profitable results therefrom.

BRADFORD OLD BANK, LIMITED.

The following report of the directors to the proprietors was read at their first annual general meeting held on Monday, Jan. 23, 1865:—

In meeting the shareholders for the first time, the directors have much pleasure in presenting a balance sheet, which they believe will be considered highly satisfactory. The estimate which was formed of the future prospects of the bank, when the terms of its purchase from Messrs Harris and Co. were agreed upon, has been more than realised by the results of the year's working. Consequent upon the distribution of shares among new connections, a large increase of business has flowed into the bank. The transactions of the customers of the late firm of Harris and Co. have also been on a more extended scale; and there has been a satisfactory increase in the number and amount of the deposit accounts in the bank. It will be seen from the appended balance sheet that the net profits of the bank for the year, available for division, amount to 39,511*l* 3s 1d:—viz., 17,004*l* 9s 6d in the half-year ending June 30, and 22,506*l* 13s 7d in that ending December 31. The directors recommend that this sum be appropriated as follows:—In liquidation of preliminary expenses, 554*l* 17s 9d; in payment of a dividend of 25s per share on 14,670 shares, 10*l* paid, 18,337*l* 10s; to reserved fund, 15,510*l*; balance carried to next half-year, 5,108*l* 15s 4d—total, 39,511*l* 3s 1d. The above-named dividend of 25s per share (which it is proposed to declare free of income tax), is at the rate of 12½ per cent. on 10*l* paid for the entire year; or 19½ per cent. on a like sum for the time it has actually been paid up by the shareholders. So much of the stability of a bank depends upon the possession of a reserved fund, that the directors feel no hesitation in recommending the amount of 15,510*l* as stated, to be appropriated for that purpose. There is already a sum of 5,490*l* standing to the credit of this account, arising from premiums on shares issued. The fund now, therefore, will stand 21,000*l*. The balance of profit, viz., 5,108*l* 15s 4d, is carried forward to the next half-year's account. The question of a site for new bank premises has occupied the serious attention of the directors. It is found impossible to carry on with comfort and convenience to the public, or to the bank, the increased business in the present confined premises; and the directors are making every effort to remedy this evil, though, as yet, no suitable site for new premises has been met with. This matter will continue to have the best attention of the directors, until some satisfactory arrangement is made. In accordance with clause 38 of the deed of settlement, the directors are prepared to receive applications for a portion of the reserved shares, at a price of not less than 30*l* per share, including 10*l* paid thereon; the premium realised by the disposal of such shares to be placed to the credit of the reserved fund. In conclusion, the directors congratulate the shareholders on the result of the first year's working of the bank, and feel every reason to look forward to future years of continued prosperity. Their policy has been that of safe extension; every account offered has been carefully considered, and none have been entertained where any reasonable doubt of security was apparent. This policy they propose to continue, being convinced that a safe and legitimate business will be found more remunerative in the long run, than an unduly inflated one.

BRITISH AND CALIFORNIAN BANKING COMPANY, LIMITED.

The first annual meeting of the shareholders of this company was held at the London Tavern, on April 3, when the annexed report was read:—

The directors have the pleasure to submit to the shareholders the audited balance sheet of the bank to Dec. 31, 1864, showing at the credit of profit and loss account the sum of 6,231*l* 17s 3d, from which the deduction of the current expenses, amounting to 2,362*l* 7s, leaves an available balance of 3,869*l* 10s 3d. In the report addressed to the shareholders on the 12th December last, the directors gave an outline of their proceedings up to that date. They have now to state that the branch in St Francisco commenced business in their own premises under the management of Mr Henry S. Babcock, at the end of November, consequently the accounts only include the results of a few weeks' operations in California. The paid-up capital of the bank on the 31st December amounted to 100,000*l*; since which time the first call of 50,000*l* has become due, and has been well responded to. The advices from San Francisco respecting the development of local and general business are satisfactory, and the arrangements concluded with establishments and commercial firms of eminence in the different localities connected with the trade of California promise to be of importance, and have already begun to bear profitable results. The directors now declare a dividend of three shillings per share, free of income tax, payable to the proprietors on and after the 10th April, which will absorb 3,000*l*, and leave 869*l* 10s 3d to be carried forward to the credit of profit and loss new account.

CARLISLE CITY AND DISTRICT BANK.

The twenty-eighth annual general meeting of this company was held on the 14th February, Mr George Relph in the chair, when the following report of the directors was submitted to the shareholders, and unanimously adopted:—

The balance sheets now laid before the meeting show the net business profits for the half-year ending 30th June to amount to 7,423*l* 18s 7d, being at the rate of 25*l* 12s per cent. per annum; and for the half year ending 31st December, 1864, 8,772*l* 18s 3d, being at the rate of 30*l* 5s per cent. per annum, and making on the whole year 16,196*l* 16s 10d, or at the rate of 27*l* 18s 6d per cent. per annum on the paid-up capital. A dividend of 9 per cent. having been paid for the half-year ending 30th June last, your directors recommend a dividend of 9 per cent. to be declared for the half-year ending 31st December last, making in all 18 per cent. for the past year. In conformity with the resolution of the general meeting of shareholders held on the 11th day of February, 1862, authorising the increase of the guarantee fund to 30,000*l*, your directors have added a further sum of 5,000*l* to that fund, which now stands at 28,000*l*. The loss on the two bad debts reported and estimated at 750*l* at the last annual meeting has been ascertained to amount to 881*l* 19s 6d. This sum, together with an additional bad debt of 50*l* 10s 11d incurred at Carlisle this year, has been written off the auxiliary fund. After these payments have been made there will remain a balance of 2,453*l* 16s 11d in the auxiliary fund, subject to a half-year's income tax. Towards the close of last year the directors concluded to establish branches at Workington and Maryport, and to augment the resources of the bank by a further issue of shares, and they are happy to state that this arrrngement has met the approval of the shareholders, from the fact that a considerable portion of these shares have been taken up by them, and the directors purpose disposing of the unallotted shares to parties whose position and influence are likely to advance the interests of the bank. It is with deep regret the directors have to allude to the death of Mr Allison, the recently appointed agent at the new branch at Workington. His business habits, local knowledge, and the high esteem in which he was held, eminently qualified him for the office. The directors have engaged Mr David Tweddle, of Workington, as his successor. Mr Joseph Huddleston Wood has been appointed agent at the Maryport branch. Mr John Wakefield, honorary director, Messrs George Relph, Thomas Clarke, and Thomas Gibbons, ordinary directors, retire from office in accordance with the eighth clause of the deed of settlement, but are eligible for re-election.

ABSTRACT of the BALANCE SHEET for Half-year ending 31st December, 1864.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

The eleventh ordinary general meeting of the proprietors of this bank was held on the 12th April, at the London Tavern, Bishopsgate street, Mr A. Mitchell, M.P., in the chair. The report of the directors, which was taken as read, was as follows:—

The general balance sheet for the year ended 31st December last, now presented to the shareholders, exhibits a net profit of 103,827*l* 18s 5d, to which has to be added the sum of 13,061*l* 14s 4d carried forward from the previous year. After deducting the half-yearly interim dividend declared on 5th October last, amounting to 54,540*l*, there remains a disposable balance now of 63,349*l* 12s 9d. The directors regret that they feel under the necessity of setting aside a sum of 22,000*l* to meet bad and doubtful debts, chiefly attributable to the recent depreciation of eastern produce held as collateral security. Out of the sum of 41,346*l* 12s 9d remaining, they recommend the shareholders to declared a dividend for the half-year ended 31st December last, at the rate of 10 per cent. per annum, free of income tax; and which, with the previous half-year's interim dividend, will amount to 12½ per cent. for the whole year. A balance of 1,349*l* 12s 9d will then remain to be carried over to the new account. At the last annual meeting, the directors reported that the premium on the issue of 7,800 new shares had been received; and they have now to add that all the calls in furtherance of this increase of the bank's capital, raising it to 800,000*l*, were duly paid up—the reserve fund now amounting to 105,000*l*. The directors consider it extremely desirable for the interests of the bank to obtain for the shareholders the right, which most chartered banks and all companies incorporated by Act of Parliament appear to possess, of re-electing immediately all the directors duly qualified, who may go out annually by rotation; the existing charter of this bank restricts the shareholders' choice to the re-election of only one of the out-going directors. The opportunity of this application to the Treasury would also be availed of to solicit that the directors may make ample provisional appointments to be subject to confirmation by the shareholders at the next ensuing ordinary general meeting. They propose, accordingly, to apply to Her Majesty's Treasury for those privileges; and in terms of the deed of settlement, two extraordinary general meetings of the shareholders must sanction the application.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The following is the seventh annual report of the court of directors to the shareholders:—

The directors have the pleasure of presenting to the shareholders, the audited balance sheet, and profit and loss account of the bank, for the year ended 31st December last. After providing for all bad and doubtful debts, and defraying expense of management at all points, the net profit amounts to 126,082*l* 1s 1d, to which has to be added a sum of 75,831*l* 11s 2d undivided profit brought forward from the preceding year, making a total of 201,913*l* 12s 3d. Out of the above total, 136,153*l* 5s has been paid in two half-yearly dividends, making together 20 per cent. on the paid-up capital of the bank. The unappropriated balance of 65,760*l* 7s 3d is carried forward to the profit and loss account of the current year. The last instalment of 12*l* 10s per share, due 2nd January last, upon the ten thousand new shares issued 1st December, 1863, has been paid. The Newera Ellia and Tuticorin agencies have been closed, the results not answering expectations, and for a similar reason the Mauritius branch will be closed at the end of the current year. The court recommend an increased allowance being made to the chairman, and a resolution in terms of clause 113 of the deed of settlement will be brought forward accordingly.

GENERAL BALANCE, for the Year ended December 31, 1864.

CITY BANK, LONDON.

At a general meeting of the shareholders, held at the London Tavern, on the 17th January, 1865, the following report was read by the secretary, viz.:—

The annexed statements of the liabilities and assets and of profit and loss for the six months to the 31st December last, show, after payment of interest on current and deposit accounts, a gross profit of 79,933 15s 8d, which, added to 7,969*l* 17s 9d brought from last half-year, makes a total of 87,903*l* 13s 5d. This result, after providing for current expenses, bad debts, rebate of interest on bills discounted not yet due, and the half-yearly deduction from the building account, enables the directors to declare the usual dividend of 6*l* per cent. per annum on 500,000*l*, the present paid-up capital of the bank, and a bonus of 1*l* 10s per share (together equal to 12 per cent. per annum), free of income tax. and to carry forward 4,685*l* 9s 11d to the new profit and loss account. The directors regret that the late severe commercial crisis has not passed without entailing considerable losses on the bank; they have, therefore, decided to reserve a sum of 30,000*l* which they believe will be amply sufficient to meet any deficiency that may arise upon estates now in course of liquidation. The progress of the Bond street branch continues satisfactory. The dividend and bonus will be payable at the bank on and after the 24th instant. A dividend was declared for the period ending the 31st December last, at and after the rate of 6*l* per cent. per annum on the paid-up capital, and a bonus of 1*l* 10s per share—both free of income tax.

COMMERCIAL BANKING COMPANY OF SYDNEY.

At a general meeting of the shareholders, held at the banking house, George street, Sydney, on Tuesday, the 24th January, 1865, the following report was presented:—

The directors have now the pleasure to submit to the proprietors the following statement of the position of the bank on 31st December last. The net profits for the half-year, after deducting rebate upon current bills, all expenses of management, provision for bad or doubtful debts, &c., &c., including the undivided balance from previous half-year, amount to 39,866*l* 5s 5d; which the directors have decided to appropriate as follows:—To dividend for half-year at the rate of 15 per cent. per annum, 28,099*l* 9s 7d; bonus of 5s per share, at the rate of 25*l* per share fully paid up 1st July, 3,746*l* 10s 2d; increase of reserve fund, augmenting it thereby to 104,000*l*, 4,000*l*; balance undivided profit carried to next half-year's account, 4,020*l* 5s 8d. During the half-year branches have been opened at Armidale, Muswellbrook, and Wentworth, all in the colony of New South Wales; and Dalby and Gayndah, in Queensland. All calls on new shares (capital and premium) were responded to within the time prescribed, so that the capital on 31st December last stood at 400,000*l*, as appears by the balance sheet. By the application of the premium on new shares, the reserve fund at same date attained the sum of 100,000*l*.

COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.

At the first ordinary general meeting of the shareholders of this bank, held at the London Tavern, on Wednesday, the 26th of April, the following report and balance sheet were read by the secretary:—

The royal charter incorporating the bank having passed the great seal on 19th February, 1864, the directors took immediate steps to carry out the arrangements made with the Commercial Bank of India. The allotment of shares was made on the 22nd April, 1864, in accordance with the terms of the prospectus previously issued; and the calls on these shares have, with some trifling exceptions, been since paid. The amount received up to 31st December last in respect of the new capital was 355,590*l*, and of the premiums on shares allotted in England 91,282*l* 10s. It was not until the 11th November that all the requirements of the Lords of the Treasury could be complied with; but on that day the requisite certificate was obtained, and business was commenced at the head office, under the charter, on the 21st of the same month. On the 1st January, 1865, the business of the Commercial Bank of India was transferred, at all the branches, to the Commercial Bank Corporation; and the former bank now exists only for the purpose of liquidation. The assets and liabilities of the Commercial Bank of India have been taken over exactly as they stood on the 31st December last.

	£	s	d
The capital of that bank was	500,000	0	0
The new capital when fully paid up will be	500,000	0	0
Making the total capital of the Corporation	1,000,000	0	0
The net profits of the year 1864, after writing off all known bad debts up to 31st December, were	154,426	11	4
A dividend and bonus for the first half of the year were paid to the shareholders of the Commercial Bank of India in Bombay, amounting to £45,000 0 0			
And a dividend has since been paid in London, at the rate of 10 per cent. per annum on the whole paid-up capital as it stood on the 31st December, for the second half of the year, amounting to 39,925 0 0			
	84,925	0	0
Leaving balance	69,501	11	4

The directors regret to report that several failures have taken place since the commencement of the present year, involving losses, which in the unsettled state of the produce markets it is not easy to estimate accurately, but they have deemed it prudent to carry forward the entire balance, after paying the above dividends, as a provision for them, in the hope that such a course will, under the circumstances, meet the approval of the shareholders.

	£	s
The reserve fund of the Commercial Bank of India, transferred on the 1st of January, amounted to	73,301	0
And the premiums on shares allotted in London, already stated £91,282 10 0		
Amount outstanding on the 31st December 4,717 10 0		
	96,000	0
Making the reserve fund of the Corporation	169,301	0

In addition to which a sum of 16,703*l* 17s 7d has been transferred to the corporation by the Commercial Bank of India, being the balance standing to the credit of the insurance account. An agency in Singapore had been decided upon by the Commercial Bank of India in the beginning of last year, and this agency was established in November last. The directors have had under their consideration the acquisition of suitable premises for the bank. In the mean time they have, at a moderate expense, so far improved their present accommodation as to be enabled to await, without any inconvenience, a favourable opportunity of securing more commodious premises.

COMMERCIAL BANK OF SCOTLAND.

At the annual general meeting of the proprietors, held on the 17th December, 1864, the following abstract of the balance sheet was submitted:—

Liabilities.	£	s	d
Paid-up capital	800,000	0	0
Deposits, notes in circulation, and all other liabilities	7,381,236	16	5
Rest or surplus fund	418,643	18	0
Net profit for year £124,906 4 10			
Less half-year's dividend paid in July 40,000 0 0			
	84,206	4	10
	8,684,786	19	3

Assets.	£	s	d
Bills discounted and advances on account	5,716,596	13	5
Bank's premises in Edinburgh, Glasgow, and at the branches (reduced to)	19,777	12	11
Government stock and Exchequer bills	1,034,770	17	8
Bank of England stock, other bank stocks, debentures, and other securities	986,621	4	2
Gold and silver coin, Bank of England notes, and notes of other banks, and cash balance with London bankers	862,850	11	1
	8,684,786	19	3

The capital of the bank was increased by the meeting from 800,000*l* to 1,000,000*l*, without any call on the proprietors. The dividend was continued at 10 per cent. per annum without deduction of income tax; and the free rest, after appropriating 200,000*l* to make the capital 1,000,000*l*, was declared to be 303,550*l* 2s 10d subject to the payment of the half-year's dividend 50,000*l* due in January next.

CONSOLIDATED BANK, LIMITED.

Annexed is the report of the directors, presented to the proprietors at the half-yearly meeting held January 24, 1865:—

The directors submit the statement of accounts and balance sheet of the bank, for the half-year ending 31st December, 1864. During that period the capital of the company has been slightly increased by the sale of 593 shares, to make the total issue 150,000 shares, representing 600,000*l* paid up. The net profits of the bank during the half-year (after deducting current expenses, rebate of interest on bills not due, interest accrued to customers, income tax, and directors' remuneration, and making ample provision for bad and doubtful debts) amounted to 62,351*l* 8s 9d; the balance left unappropriated on the 30th of June was 6,976*l* 6s 10d; the premium on shares sold, 4,158*l* 17s—making a total of 73,486*l* 12s 7d. From which it is proposed to carry to reserved surplus fund 15,000*l*; and premium on shares 4,158*l* 17s; to declare a dividend for the half-year at the rate of 10 per cent. per annum, and a bonus of 3s per share (being an additional 7½ per cent. per annum) free of income tax, 52,500*l*; to carry forward to next account, 1,827*l* 15s 7d—73,486*l* 12s 7d. The reserved surplus fund, which stood on the 30th June at 38,500*l*, will, by the addition of six months' interest, 962*l* 10s, and the appropriations now recommended, 19,158*l* 17s, be increased to 58,621*l* 7s.

CONTINENTAL BANK CORPORATION.

The third half-yearly ordinary meeting of shareholders was held on the 27th February, at the London Tavern, Mr W. W. Cargill, M.P., in the chair. The following directors' report was taken as read:—

The report and balance sheet, which the directors now submit to the proprietors, for the half-year ending 31st December last, are not such as they would have wished to present on this occasion. Unlike the report for the first six months of 1864, which showed a most satisfactory result, the present accounts exhibit a considerable loss, by the failure of constituents during the late commercial crisis. Under these circumstances, the directors deem it their duty to make the shareholders acquainted with the precise condition of affairs, to exhibit the whole loss incurred, and to offer their suggestions as to the best mode of dealing with it. After a most careful examination of the accounts at the head office and branches, the total loss is found to amount to 19,500*l*; and, after deducting therefrom the net balance of profits, 5,090*l* 1s 6d, and the reserved fund, 1,000*l*, the remaining deficiency is 13,409*l* 18s 6d. This sum the directors recommend should be written off capital account. While regretting this result, the directors look forward with every hope to the future. An excellent business has been obtained, the rate of current profits since the last year's accounts were closed has very much increased, and a prospect has been opened up of extended connections of a most profitable nature. The amalgamation to which reference was made in the last report not having been carried out, it became necessary, for the requirements of the bank, to add to the paid-up capital by calls on the shares, viz.:—5*l* on the original shares on 10th September, and 5*l* on 10th December; and on the new shares, 5*l* on 1st October, and 5*l* on 2nd January, 1865. These calls have been fairly met, and there still remains 10*l* to call on the new shares, to make them equal to the first issue. The directors were enabled to make a judicious purchase of a freehold site for a permanent office, in Clement's lane, Lombard street, and they have since contracted for building suitable premises at a very moderate cost, which they hope will be ready for occupation in the course of the present year. Two directors retire from office on this occasion, namely, Messrs William James Maxwell and Robert Alfred Routh, who, being eligible, offer themselves for re-election; and Messrs Alexander Robertson and Edward Cheshire, the auditors, who retire in accordance with the articles of association, have also intimated their readiness to offer themselves for re-appointment.

BALANCE SHEET—December 31st, 1864.

EASTERN EXCHANGE BANK, LIMITED.

At the first ordinary general meeting of the Company, held at the bank, Cook street, Liverpool, on February 2, Mr Andrew McKean, sub-manager and secretary, read the following report and accounts:—

The directors in calling the shareholders together for the first time, beg to submit an audited statement of accounts of the bank since its formation to December 31, 1864. The difficulty in obtaining a suitable manager, the high rate of interest, and the generally embarrassed state of mercantile credit, induced the directors to postpone making calls and opening branches abroad; they have, however, been enabled to employ satisfactorily the amount of capital in their hands, during the few months the bank has been in operation, as appears by the annexed statement, showing a balance of profit of 3,368*l* 2s 3d, out of which they recommend a dividend for the half-year of 1s 6d per share, free of income tax, say at the rate of 5 per cent. per annum, leaving 368*l* 2s 3d to be carried forward to next account. The directors delegated Mr J. H. Etheridge, general manager, to proceed to Egypt to establish a branch at Alexandria. The advices received from him are highly satisfactory, and it is anticipated that a large and profitable business will be transacted by the bank there. Mr R. E. W. Baker, formerly of the Agra and United Service Bank, and of the Bank of Hindustan, China, and Japan, has been appointed resident manager at Alexandria. The directors who retire by rotation are Mr Patrick Hunter, Mr G. M. Bowen, and Mr A. Malcolmson, and being eligible for re-election they offer themselves accordingly. The meeting will also have to elect an auditor for the ensuing year, and fix his remuneration.

GENERAL STATEMENT and BALANCE SHEET for the Half-year ending December 31, 1864.

EAST LONDON BANK, LIMITED.

The following is the second report of the directors of this bank:—

The directors submit their second report to the shareholders, together with the accounts for the half-year ending 31st December, 1864, certified by the auditors. During the half-year the business of the bank has steadily and satisfactorily progressed, notwithstanding the recent commercial depression. The amount standing to the credit of profit and loss, after making ample provision for bad and doubtful debts, is 13,596*l* 16s 7d. Deducting the amount of current charges, interest due to customers, rebate on bills not matured (at 6 per cent.), and the sums written off the amounts standing to the debit of bank premises and preliminary expenses, there remains a balance of 3,841*l* 18s 10d. The directors recommend the payment of a dividend at the rate of 5 per cent. per annum, free of income tax, which will absorb 2,500*l*, and leave 1,341*l* 18s 10d, together with the rebate, 1,893*l* 10s 1d, making the sum of 3,235*l* 8s 11d to be carried forward to the present half-year. The premises in Cornhill, for the head office, are on the point of completion, with the exception of one house not yet in possession, and they will be ready for occupation during the ensuing month.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

At the twenty-third ordinary meeting on the 30th January, 1865, the following report was adopted:—

The directors have to state that notwithstanding the protracted depression which has prevailed in commercial affairs in the colony of New South Wales, the profits of the bank for the last half-year have, on the whole, been satisfactory, and that the Adelaide branch, the business of which continues steadily to advance, possesses all the elements of ultimate success. The balance at credit of profit and loss account, although reduced to 26,267*l* 2s 8d by the provision which it has been found necessary to make for expected losses arising from failures at Melbourne, will, however, admit of the usual rate of dividend, and of such an increase of the reserved fund as will bring it up to 50,000*l*. The directors therefore recommend that the amount be applied as follows, viz.:—To the payment of a dividend at the rate of six per cent. per annum, free of income tax, on 600,000*l*, the paid-up capital of the bank, 18,000*l*; towards the reduction of bank premises and furniture accounts, 1,000*l*; to the reserved fund, 7,000*l*; leaving to be carried to the next account, 267*l* 2s 8d.

ENGLISH AND SWEDISH BANK, LIMITED.

At the first ordinary general meeting of shareholders, held at at the London Tavern, on March 14, 1865, the following report was presented:—

The directors have the pleasure to submit to the shareholders the annexed statement of accounts from the establishment of the bank, made up to the 31st December last, and duly vouched by the auditors. This being the first ordinary meeting of the bank, the directors have to report their proceedings since its formation. Having secured the co-operation of gentlemen of position in Stockholm and Gothenburg to form the local boards, and appointed managers with experience of English banking, the business of the bank was commenced in temporary offices at Stockholm on the 8th February, and at Gothenburg on the 24th March; but it was not until the 20th June that the branch at Stockholm was enabled to open its permanent premises and transact general banking business, while at Gothenburg the permanent offices have only been occupied since the 17th January of the present year. The bank's operations were materially impeded by the legal restrictions in Sweden prohibiting a higher rate of interest than 6 per cent., but as the directors at the time of the formation of the bank had reason to anticipate, the law has since been repealed and interest is now free in Sweden. The new law did not, however, take effect until the 14th of September last. The directors have great satisfaction in stating, that notwithstanding these circumstances every description of business has been on the increase at both branches, and especially since the opening of the bank's permanent premises. The fixed deposits (in particular at Stockholm) show a steady and marked improvement from month to month. The directors are happy to say that they anticipate no loss from the recent failures in Stockholm. From the annexed statement of accounts it will be seen that the gross profits amount to 25,961*l* 13s 5d, which, after paying current expenses and allowing for rebate of interest, leaves a balance of 12,912*l* 11s 3d. This the directors propose to appropriate as follows:—To the reduction of preliminary expenses, 1,658*l* 0s 5d; to the payment of a dividend of 9s per share, free of income tax, 8,783*l* 11s 0d; to the payment of income tax on the same, 219*l* 11s 9d; leaving 2,224*l* 8s 1d to be carried to next account.

GENERAL BALANCE SHEET, from the formation of the Company to the 31st December, 1864.

IMPERIAL BANK, LIMITED.

At the fifth ordinary general meeting of the shareholders held at the London Tavern, Bishopsgate street, on the 19th of January, 1865, the following reports of the directors and auditors, and the balance sheet, were read by the Secretary:—

The directors, in accordance with the regulations of the bank, submit the accompanying statement of account and balance sheet for the half year ending the 31st of December, 1864, together with the auditors' report thereon. The proprietors will notice that of the capital authorised to be raised by the issue of the new shares, only 6,575*l* remains to be paid; and also that, from the 31st ult., the amount thereon will cease to carry interest; but these shares will, in lieu thereof, participate equally in all future dividends with the other shares in the original capital of the bank. The directors have to report that, after defraying the current charges of the bank, making allowance for bad and doubtful debts, rebate on bills, and providing for a dividend at the rate of 10 per cent. per annum, together with interest on the new shares, there remains a balance of 5,228*l* 18s, which the directors recommend to be carried forward to the profit and loss new account. The directors have the gratification to announce that the business of the bank is progressing satisfactorily, and ask the shareholders to assist in extending its operations.

IMPERIAL OTTOMAN BANK.

The following, dated Dec. 9, 1864, has been issued:—

Notice is hereby given, that an interim distribution by way of interest, up to the 31st December, 1864, of 10s per share (the limit allowed by the statutes), will be payable on the 2nd January, 1865, on the paid-up capital of the bank.

LAND MORTGAGE BANK OF INDIA,

(CREDIT FONCIER INDIEN), LIMITED.

The following report was presented to the second ordinary general meeting of shareholders, held at the London Tavern, on 19th April, 1865:—

The accounts submitted, made up to the 31st December, 1864, comprise actual operations over eight months only, which show a net profit of 12,288*l* 7s 8d, to which is added the interest earned in India to 31st March, 10,651*l*, showing a sum of 22,939*l* 7s 8d available for dividend, &c. The directors therefore recommend that a dividend of 4s per share (free of income tax), being 5 per cent. on the paid-up capital, be now declared, payable on and after the 22nd instant. The capital in India on 31st March amounted to 611,933*l* 19s 3d, of which 404,407*l* was invested on mortgages of real property, and 197,970*l* on Government securities, at an average rate of 9 per cent. The total applications for mortgage loans amounted, by last advices, to 1,318,500*l*, of which 404,407*l* has been granted, and of the remainder under consideration a large amount will probably be accepted. Great

Digitized by Google

caution has been used in making these advances, and the appraised value of the properties mortgaged to the company is double the amount actually advanced upon them. Every title undergoes the rigid scrutiny of the bank's solicitors and standing counsel at the Presidency cities. Each property is carefully valued by inspector, sub-agent, or other competent valuer; and the chief agents only grant the loan on the satisfactory termination of the investigation. The Registration Act, now in force throughout India, also affords an additional security to the mortgages. The company is now firmly established, and its investments in India are such that the directors feel themselves justified in anticipating that a large and safe business, with annually increasing profits, has been secured for the future.

LEICESTERSHIRE BANKING COMPANY.

The thirty-fifth annual general meeting of the shareholders was held at the Three Crowns Hotel, Leicester, on the 8th February, Samuel S. Bankart, Esq., in the chair. The following report was read:—

The directors have pleasure in submitting to the proprietors the balance sheets for the half-years ending the 30th of June and the 31st December last. After making provision for bad debts, and paying the income tax, the net profit of the bank for the past year amounts to 25,231*l* 7s 7d. This sum, added to 4,440*l* 17s 5d, the unappropriated balance of the preceding year, makes a total of 29,672*l* 5s, in which amount is included 1,124*l* 12s for interest on the guarantee fund. The directors paid a dividend of 1*l* 10s per share for the half-year ending the 30th of June, amounting to 7,500*l*, and they now recommend that the dividend for the half-year ending the 31st of December last be 1*l* 10s per share, being 10 per cent. on the paid-up capital. After the payment of these dividends, and the appropriation of the interest on the guarantee fund as above, a balance of profit amounting to 13,547*l* 13s will remain; out of this amount the directors further recommend the payment of a bonus of 15s per share, being at the rate of 2½ per cent. per annum; also, that 5,000*l* be transferred to the guarantee fund, and that the balance of 4,797*l* 13s be carried forward to the current year. The profit and loss account will then stand thus:—

Dr.	£ s d
Dividend paid to the shareholders for the half-year ending the 30th of June, 1864	7,500 0 0
Ditto, ending 31st December, 1864	7,500 0 0
Bonus of 2½ per cent	3,750 0 0
Interest on the guarantee fund	1,124 12 0
Amount transferred to the guarantee fund	5,000 0 0
Balance to be carried forward	4,797 13 0
	29,672 5 0

Cr.	£ s d
Net profit for the year 1864	25,231 7 7
Balance of profit for 1863	4,440 17 5
	29,672 5 0

And the guarantee fund thus:—

	£ s d
Balance, January 1st, 1864	37,208 1 0
One year's interest at three per cent.	1,124 12 0
Amount transferred from this year's profits	5,000 0 0
	43,332 13 0

At the solicitation of several valuable customers, the directors have for the last three months given a market day attendance at Swadlincote, in connection with the branch at Ashby-de-la-Zouch, from which place it is five miles distant; the accommodation to the locality is appreciated, and as the mineral products of the district and the manufactures are very considerable, the directors believe that before long it will become mutually beneficial. In consequence of the continued increase of the business, both at the head office and the branches, the directors deem it desirable that the capital be further increased by the sum of 50,000*l*, the same to be raised by calls on the shareholders, thus making the paid-up capital of the bank 200,000*l*. The directors, therefore, beg to inform the proprietors that it is their intention to make a call of 2*l* 10s per share, payable on the 1st of July next, and a call of 2*l* 10s per share, payable on the 1st of January, 1866, and as to the remainder, the shareholders will be duly informed at the next annual general meeting. The 27th article of the company's deed of settlement recites:—That two of the directors shall annually retire from office; the vacancies to be filled up at the annual general meeting; provided, nevertheless, that on all occasions any retiring director may be re-elected." It is, therefore, announced that Samuel Waters and John Howcutt, Esquires, are the retiring directors.

LIVERPOOL COMMERCIAL BANKING COMPANY, LIMITED.

At the thirty-second annual general meeting of the proprietors, the following report of the affairs of the company was read:—

The state of commercial affairs in the latter half of the year has, as is well known, been not a little disastrous, and though money was unusually dear, thus producing more than an average of profit, yet it failed to compensate for the injurious effect of the untoward course of trade. The net banking profits for the year ending 1864, including a balance of 9,594*l* 12s 9d, brought forward from profit and loss account 1863, after payment of income tax, rebate of interest on bills at 6 per cent. per annum, also expenses of management, and providing fully for all bad and doubtful debts, amounted to 39,476*l* 14s 9d; out of this sum have been paid two half-yearly dividends of 5 per cent. each on the paid-up capital of 350,000*l*, amounting to 35,000*l*; leaving a balance at credit of profit and loss account of 4,476*l* 14s 9d. The following is an abstract of the affairs of the bank, as they stood on the 31st December, 1864:—

Dr.	£ s d	£ s d
Capital subscribed, 35,000 shares of £20 each, £10 paid	£350,000 0 0	
Reserved surplus fund	183,000 0 0	
Profit and loss balance	4,476 14 9	
		537,476 14 9
Deposits bearing interest, including current accounts	609,153 10 1	
Ditto not bearing interest	23,903 0 0	
Seven day and other bills	82,551 0 7	
		715,607 10 8
		1,253,084 5 5

Cr.	£ s d	£ s d
Bills of exchange	£992,360 8 10	
Less rediscounted	470,570 6 7	
	521,899 2 3	
Cash on hand and at bankers	126 446 5 5.	
		648,345 7 8
Loans in account, with and without security	459,494 1 7	
Bank premises and freehold property	140,000 0 0	
Other securities	5,244 16 2	
		604,738 17 9
		1,253,084 5 5

The paid-up capital of the bank remains at 350,000*l*; and the reserved surplus fund at 183,000*l*. Various recent sales of property, especially in the immediate neighbourhood of the bank's freehold estate, indicate a considerable advance in its value since last reported on; the rental continues to increase.

LIVERPOOL UNION BANK.

At the thirtieth annual meeting of this bank, held at the Law Association Rooms on the 1st February, James Aspinal Turner, Esq., M.P., in the chair, the following report was read:—

In laying their thirtieth annual report before the proprietors, the directors beg to remind them that the past year has been characterised by extraordinary fluctuations in the value of money and produce, accompanied by serious mercantile disasters, so that they consider themselves justified in congratulating the proprietors in being able to submit to them the following statement. The paid-up capital of the bank is 450,000*l*, and the number of the proprietors 164. On the 31st December, 1863, the reserved surplus fund was 140,481*l* 13s; to which add net profits for the year 1864, after providing fully for all bad and doubtful debts, 57,433*l* 12s 3d—together, 197,915*l* 5s 3d; from which deduct two half-yearly dividends of 5 per cent. each, 45,000*l*, income tax paid by the bank, 1,827*l* 6s 8d, 46,827*l* 6s 8d; leaves the present reserved surplus fund, 151,087*l* 18s 7d.

	2,422,795	2	7

The original capital of the bank was 300,000*l*, which, with periodical additions of surplus earnings over dividends, including the present reserved surplus fund, is now doubled; and the directors hope that the time is not far distant when they will be able to carry fully into effect the resolution passed at the last annual meeting, empowering them to accumulate the reserved surplus fund to 200,000*l*. In consequence of the resignation, in March last, of their old and respected colleague David Cannon, Esq., who has been connected with the bank since its origin, the directors, in conformity with the deed of settlement, filled up the vacancy by appointing James Wilson, Esq., merchant, who, with Edgar Garston, Esq., retires by rotation, both of whose places will have to be supplied by the proprietors at this meeting. The directors, in asking the support of their co-proprietors, take this opportunity of stating that the bank, in consequence of its numerous country bank connections and agencies throughout the kingdom, is enabled to afford its customers every possible advantage in the transaction of their business.

LONDON BANK OF MEXICO AND SOUTH AMERICA, LIMITED.

The following report was presented to the shareholders at the first ordinary general meeting, held at the London Tavern, on the 14th March, 1865, adjourned from the 14th February last:—

The directors in presenting their first annual report have to congratulate the shareholders on the success which has attended the operations of the bank from its formation, as shown in the the accompanying balance sheet duly vouched for by the auditors. From the statement of accounts it will be seen that the gross profits up to December 31 last, amount to the sum of 27,315*l* 8s, and after payment of current expenses and carrying forward to profit and loss new account the sum of 5,842*l* 16s 4d for rebate of interest on bills discounted, but not then due, there remains a a balance of net profit of 13,405*l* 10s 2d, which, with 52*l* 19s 10d balance of unappropriated profit to March 31, 1864, amounts to 13,458*l* 10s. This sum the directors recommend should be appropriated as follows:—To be written off preliminary expenses, 1,000*l*; in the payment of a dividend, at the rate of 10 per cent. per annum (7s per share), 6,994*l* 8s; reserve fund, 1,000*l*; remuneration to directors since the formation of the two companies in March, 1863, to 31st December, 1864, 2,500*l*; leaving a balance of 1,964*l* to be carried forward to next year's account, less amount required to pay income tax and auditors' fees. The accounts from the Bogota branch have only been received up to the 30th November last, or within three weeks of its establishment. The directors have, therefore, been unable to include the profits of this branch in the balance sheet. The directors have pleasure in referring more particularly to the operations of the several branches:—

Mexican Branch.—This branch was opened on the 1st of August last, under the superintendence of Wm. Newbold, Esq., whose energetic and careful management has been productive of the best results, and the directors are pleased to be able to state that the bank has taken a position of the first importance in Mexico, and has realised every expectation they had been been led to anticipate.

Lima and Callao Branches.—The Lima branch was handed over by the London and South American Bank, on the amalgamation in April last, and has progressed satisfactorily. The branch at Callao was opened on the 21st November. With a view to the enlarged operations of the bank in Peru, the directors on 2nd November last appointed George Wallace, Esq., to be their representative in that important country. The reports and accounts from Mr Wallace give the directors every reason to believe that the bank there will continue to make improved progress.

United States of Colombia Branch.—The directors have much satisfaction in reminding the shareholders, that in these States the bank enjoys special privileges—having secured from the government, as already made known, a very valuable concession, including among other privileges the sole right of issue of notes, to be received as legal tender in payment of all dues, taxes, &c.

LONDON, BIRMINGHAM, & SOUTH STAFFORDSHIRE BANK, LIMITED.

The third ordinary meeting of the shareholders of this company was held at the head office, 110 Cheapside, on the 28th February. The following report and accounts were read by the secretary:—

In submitting their third half-yearly report to the shareholders, the directors regret that they are unable to declare a dividend as before—the long and heavy pressure on the money market during the autumn and close of the past year, although entailing comparatively small losses, having indirectly tended to the lessening of the profits of the bank, as will be seen on reference to the annexed accounts. The balance sheet, which has been examined with the utmost care by your auditors, both of whom are professional accountants of known repute, shows that the gross profits on the half-year amount to 12,146*l* 13s 4d, which, added to the sum of 4,226*l* 10s 7d, brought forward from the last audit, makes a total of 17,353*l* 3s 11d; but, after payment of all expenses, writing off the bad and making the most ample allowance for all doubtful debts, there is an actual deficit of 4,874*l* 10s 8d. Although it is believed that but few, if any, of the younger banks have passed through the late monetary crisis with so small a loss, and that the business of the bank would prove a profitable and increasing one during the current half-year, the directors still entertaining the same views as expressed at the last meeting of the shareholders, and having regard to the present most unjustifiable depreciation of the shares of the bank on the market, have negotiated and concluded a provisional agreement for the transfer of the business to the European Bank, Limited, on terms which they recommend as highly advantageous to the shareholders, and which will be submitted for approval at the extraordinary general meeting convened for this day. In order legally to carry out this arrangement, it will be necessary for the bank to be voluntarily liquidated, and a resolution to this effect will be proposed at the said extraordinary meeting.

BALANCE SHEET—December 31, 1864.

Liabilities.	£	s	d
Capital paid up on 5,000 shares at 22*l* each, 110,000*l*; in advance of calls, 237*l*; on 3,524 new shares, 10,572*l*; less calls in arrears, 246*l*—10,326*l*	120,563	0	0

LONDON AND COUNTY BANKING COMPANY.

At the annual meeting of the proprietors held on the 2nd February, 1865, at the London Tavern, Bishopsgate street, the following report for the Year ending December 31, 1864, was read by the Secretary:—

The directors have the pleasure to submit to the shareholders the balance sheet of the bank for the half-year ending December 31 last. They have satisfaction in reporting that, after paymen[t]

Digitized by Google

of all charges, interest to customers, making provision for bad and doubtful debts, and presenting a gratuity to each officer, the net profits amount to 126,431*l* 17s 4d which, with 21,726*l* 16s 2d, brought forward from last account, produces the sum of 148,158*l* 13s 6d for appropriation. The directors recommend the payment of the usual dividend of 6 per cent. for the half-year, together with a bonus of 12 per cent., making 18 per cent. for the six months; these payments will absorb 129,529*l* 1s 3d, and leave 18,629*l* 12s 3d to be carried forward to profit and loss new account.

LONDON, HAMBURG, AND CONTINENTAL EXCHANGE BANK, LIMITED.

The following report was submitted to a meeting of proprietors, at the premises of the bank, 79 Lombard street, on Tuesday, the 31st January, 1865:—

In fulfilment of the promise held out in their circular of the 16th ult., the directors have called you together to submit to you a statement of the bank's position. This statement is now before you, and the directors trust that you will consider it much more favourable than you may have been led to expect from the wild and unfounded rumours so industriously circulated for the past few months. The long-continued pressure in commercial circles, from which we are now emerging, will account for many of these rumours, from which we have suffered in common with other institutions, much stronger, in every sense, than our own. In the face of great difficulties, you will not expect that the business of the bank, during the interval which has elapsed since our last meeting, has maintained the development and extent which its earlier career promised; but if that business has been of necessity curtailed, the directors can, at any rate, state that no losses have been incurred by the bank in its recent transactions; and that the losses that now appear, though heavier than were anticipated at your last meeting, have been, in reality, the consequence of previous transactions. The directors find that the gross profits of the bank for the fourteen months of its existence amount to 24,745*l* 3s 2d, of which 9,494*l* 5s 3d has been earned during the past four months. The losses during the entire period amount to 8,652*l*. The directors believe that they will be able shortly to announce that they have filled the vacancies caused since the last meeting by the retirement of two of your directors from the board by gentlemen of high commercial position; they are also in treaty with a gentleman of great experience and ability to fill the vacant post of manager. The petition by a shareholder to wind up the company, which was the subject of the circular before referred to, was shortly after withdrawn, and the admission of the solicitors to the petition, that there was no ground for such a proceeding, proves how unjustifiable was the attempt thus made to damage the credit of the bank. The directors have every confidence in the future career of the bank, and hope to see it ere long strengthened in credit and capital. They trust this brief statement will serve to dissipate the doubts and anxieties which appear to have weighed on the minds of many of the shareholders, and induce them to give the bank their confidence and support more freely than they have hitherto done. The shareholders will now be able to see for themselves that their property has not been depreciated to the extent indicated by the late very low quotations of the bank's shares.

LONDON JOINT STOCK BANK.

At a general meeting of the shareholders, held at the banking house of the company, in Princes street, Mansion House, on the 19th of January, 1865, the following report was presented:—

The directors have much pleasure in placing before the shareholders the annexed statement of the liabilities and assets of the bank, and of the profit and loss account for the half-year ending the 31st ultimo, by which it will be seen that the bank has made a net profit of 171,125*l* 9s 7d, including 26,976*l* 7s 10d brought forward from the previous half-year. Of this amount the directors have appropriated the sum of 150,000*l* for the payment of the usual dividend at the rate of 12½ per centum per annum, with a bonus of 1*l* 17s 6d per share, and have carried 21,125*l* 9s 7d to the credit of the guarantee fund. In pursuance of the resolution of the general meeting of the 18th August, confirmed on the 15th September last, the issue of 12,000 new shares has been made, and the directors have the satisfaction to acquaint the shareholders that the subscribed capital of the bank is now 3,600,000*l*, divided into 72,000 shares of 50*l* each, paid up to the extent of 15*l* per share, thus making the paid-up capital 1,080,000*l*, entitled to participate in profits from the 1st January. The guarantee fund has been credited with the sum of 1,372*l* 19s 6d realised on the sale of 227 new shares not taken up by the allottees. This fund is also credited with accruing interest and debited with 4,875*l* to cover the depreciation in value of the Government securities since the 30th June, and now amounts to 298,069*l* 7s 1d. With a view to avoid the inconvenience of varying the guarantee fund at the close of every half year by an entry to regulate the market value of the goverment securities held by the bank, and which is of no practical utility, inasmuch as these securities are held as a permanent investment, a resolution, of which notice by circular has been given to the shareholders, will be proposed to the meeting to authorise the directors to value for the future, at par, the exchequer bills; and at the fixed price of 90, all Consols and New 3 per Cents. held by the bank.

LONDON AND SOUTH AFRICAN BANK.

At the fourth ordinary annual general meeting, held at the London Tavern, Bishopsgate street, on Thursday, 4th May, 1865, the following report was read:—

1. The directors have the satisfaction of submitting to the shareholders the audited accounts of the company to the 31st December, 1864. 2. After deducting all charges for the past year, and providing for bad and doubtful debts, there remains a disposable balance of 26,924*l* 8s 4d. From this sum 2,500*l* will have to be placed to the reserved fund, which will then amount to 18,053*l* 6s 3d, and 1,608*l* 6s to preliminary expenses, At the end of the next year this latter account will be closed. 3. Having regard to the depressed state of trade in the South African colonies, it was deemed prudent in October last to declare an interim dividend of 3½ per cent. only, but the satisfactory returns since received from the several branches, enable the directors to recommend for the approval of the shareholders a dividend of 18s per share, which, with the payment made in October, 1864, will be at the rate of 8 per cent. per annum, free of income tax, leaving a balance of 377*l* 9s 4d to be carried forward to the profit and loss account for the next half-year.

LONDON AND VENEZUELA BANK, LIMITED.

Annexed is the first report of the directors of this bank, dated May 18, 1865:—

In making this their first report, and in presenting the accompanying balance sheet, the directors have to congratulate their co-proprietors on the favourable result of the first three months' operations, business having commenced at Caracas on the 2nd of January last; although, had it not been necessary to comply with the companies act by holding a meeting and presenting a statement of accounts in this month, they would rather have deferred it so as to have shown the results of a complete half-year. It will be seen, however, that the net profits earned by the bank in those three months are equal to more than 10 per cent. per annum on the capital paid up, although the rate of exchange has been considerably against the bank, and the expenses are necessarily on a scale adapted to the employment of a much larger capital. It is the determination of the directors to undertake nothing but safe business, and to decline all exceptional profits that are earned on transactions of an insecure character; but as there is in their judgment abundant good business for the employment of a much larger capital than they have at present at their command, they beg to urge upon the proprietors the desirability of increasing the deposits of the bank as much as possible by inducing their friends to take advantage of the liberal terms offered, as large profits may be earned on money so deposited. The directors do not at this meeting propose to declare a dividend, for although the success which has attended the operations of the bank so far is, in their judgment, of a very satisfactory character, and offers much promise for the future, they feel (and hope the shareholders will concur with them) that at this early period the most beneficial course for the permanent interests of the bank is to carry forward to the next account the amount of profits shown by the balance sheet to have been realised.

LONDON AND WESTMINSTER BANK.

At the annual general meeting held at the bank in Lothbury, January 18, 1865, the annexed report was adopted:—

The directors have to report that—after making provision for all bad and doubtful debts—paying the income tax,—setting apart 2,000*l* towards the buildings of the bank,—and presenting gratuities on their salaries to all the officers of the establishment,—the net profits of the bank for the last half-year amount to 238,405*l* 16s 9d. This sum, added to 8,830*l* 1s the unappropriated balance of the preceding half-year, will amount to 247,235*l* 17s 9d. Out of this amount interest on the rest or surplus fund at the rate of five per cent. per annum (7,500*l*) has been added to such fund, which now amounts 307,500*l*. The directors now declare a dividend to the shareholders at the rate of six per cent. per annum, and by way of further dividend out of the profits, a bonus of thirteen per cent. on the paid-up capital. After these payments are made there will remain a balance of 79,735*l* 17s 9d, which the Directors have appropriated as follows, viz.:—27,878*l* 16s 4d on account of the purchase of Messrs Jones, Loyd and Co.'s Bank, 20,000*l* towards the alterations and improvements of the chief office, and 22,500*l* to be added to the rest, which will then amount to 330,000*l*, and the

MANCHESTER AND COUNTY BANK, LIMITED.

At the fourth ordinary general meeting, held on the 10th of February, 1865, the following report was submitted to the shareholders :—

The directors have much pleasure in submitting to the shareholders the balance sheet for the half-year ending the 31st December, 1864, which completes the second year of the bank's establishment. After laying aside 12,000*l* for rebate on bills on hand, the net profit for the half-year is 42,284*l* 8s 6d, from which the directors propose to pay a dividend of 12s per share, being a little more than at the rate of 8½ per cent. per annum on the capital, part of which was only paid up in September last. Out of the remaining profit the directors have applied 6,000*l* as a provision for bad and doubtful debts, leaving 15,000*l* to be added to the reserve fund (which will thus be raised to 25,000*l*), and 889*l* 16s 2d to be carried foaward. The business of the bank has continued steadily to increase, both at the head office and at the branches. In December last a branch was opened at Burnley.

MANCHESTER AND SALFORD BANK.

At the annual general meeting of the proprietors, held in the Board room in Mosley street on the 8th February, 1865, the following report was presented by the directors :—

When the proprietors of the Manchester and Salford Bank were last assembled in annual meeting, the prospects of trade were such as to cause unusual anxiety in the minds of experienced commercial men. The risks attending the high scale of prices, which many articles of foreign produce had attained, and a spirit of reckless adventure, fostered by great abuse of credit, threatened extensive mercantile disaster, which eventually occurred. The injurious influence of the war in North America upon the manufacturing industry of this district showed then as now little sign of abatement. The rapid formation of new companies of various character, both at home and abroad, and the development of new fields of enterprise were already creating considerable disturbance of the currency. The combination of all these circumstances has caused the requirement of a much larger capital than usual in the mercantile and financial operations, has led to considerable pressure upon the resources of the Bank of England during the past year. Hence the high rate of interest which has prevailed with less intermission than ever remembered. The capital employed in banking business has yielded from this cause an unusual amount of profit; not perhaps out of proportion to the greater risks incurred in such times; but (when bad debts have been avoided) giving results hardly anticipated and little likely to recur. Notwithstanding recent reductions in the scale of commission and the liberal allowance of interest to depositors, the directors may congratulate the proprietors on the fruit of their labours during the past year. The net profits of the business in 1864, after allowing for rebate of interest upon bills in hand, and deducting bad debts, charges, salaries, &c., amount to 66,808*l* 16s. The directors have appropriated to the guarantee account, 10,000*l*, and have made a further addition of 28,125*l* to the capital stock of the bank, by the declaration of a bonus of 18s 9d per share, viz., 6s 3d in July, and 12s 6d in January, leaving a balance of 28,683*l* 16s, plus a balance in profit and loss account from 1864, 515*l* 17s 5d, wherewith to pay the usual dividend of 8 per cent. per annum and income tax. The paid-up capital of the bank is now at 12*l* 3s 9d per share, 355,021*l* 17s 6d. The reserved surplus fund, 100,000*l*; and the surplus value in the guarantee account, by estimation, about 35,000*l*. The allotment of 700 shares at a premium of 7*l* per share has brought in a sum of 4,900*l*. This has been applied in reduction of the cost of the new building, which will now stand at a valuation under 30,000*l*. There still remain unappropriated 870 shares. The branch of this bank at Salford makes satisfactory progress. Having recently opened a branch at Southport, where several shareholders of the bank reside, the directors obtained the consent of a special general meeting, held on the 15th December and confirmed this day, to extend the limit of residence required by the trust deed as a qualification for the office of director, so as to embrace residents in the branch bank as well as at the head office. By this change in the rules, Mr William Atkinson, one of the earliest and largest shareholders in the bank, who, as long as he resided in the vicinity of Manchester, was also a director, has again become quallfied for a seat at the board; and there being at present one vacancy, the directors recommend him to this meeting for election.

MERCHANT BANKING COMPANY OF LONDON, LIMITED.

Annexed is the report of the directors to the shareholders :—

In submitting their first annual report, the directors congratulate the shareholders upon the favourable results of the operations of the Company up to the 31st December last. By the annexed statement of accounts made up to that date, it will be seen that the gross profits (including a sum of 10,000*l*, the enhanced value of the company's premises over the cost thereof), amount to 64,644*l* 7s 3d, and that after the payment of current expenses, rent, rebate of bills, and making provision for bad and doubtful debts, there remains an available balance of 44,556*l* 7s 7d, which the directors recommend to be appropriated as follows :—4,666*l* 13s 4d to interim dividend of 9s 4d per share paid to 30th June last; 10,000*l* to further dividend of 1*l* per share, being together with the above interim payment, at the rate of about 12 per cent. per annum; 10,000*l* to the reduction of amalgamation account; 10,000*l* to reserve fund; 3,750*l* to suspense account, for remuneration to directors and auditors, and payment of income tax; 1,000*l* to the reduction of preliminary expenses; 5,139*l* 14s 3d to be carried forward to new account—total, 44.556*l* 7s 7d. It is satisfactory to the directors to show, that in the purchase of the premises from Messrs H. and J. Johnston and Co., at 10,000*l*, they have secured a very valuable property, for which they have since been offered the sum of 20,000*l*; the 10,000*l* estimated profit thereon has been applied by them in reduction of amalgamation account. As the steady progress of the business of the company indicates that an increase of capital can be beneficially employed, the directors have resolved upon the issue of 5,000 new shares, of which 1,800 shares will be appropriated to the late firm of Messrs H. and J. Johnston and Co., in fulfilment of an agreement with them; and the residue allotted at par to the present shareholders, in approximate proportions to their existing interests.

MIDLAND BANKING COMPANY, LIMITED.

At the third ordinary general meeting, held at the London Tavern, Bishopsgate street, on January 27, 1865, the following report was presented :—

The directors feel pleasure in laying before the shareholders the following statement of accounts and balance sheet for the half-year ending December 31, 1864, duly examined and certified by the auditors. From the balance sheet it will be seen that the gross profits for the half-year, including 713*l* 14s 3d brought forward from last account, have been 15,553*l* 9s 6d after providing for bad and doubtful debts, and that after deducting all the current expenses of the bank, interest paid to customers, &c., and allowing for rebate of interest on bills discounted and not yet due, there remains a disposable balance of 4,169*l* 19s 11d. The directors recommend that out of this sum, 384*l* 3s 2d, being at the rate of 10 per cent. per annum, should be written off preliminary expenses; that 2,029*l* 18s should be appropriated to the payment of a dividend at the rate of 5 per cent. per annum, free of income tax, upon the paid-up capital of the Company; that 1,000*l* should be added to the reserve fund, and that the balance 755*l* 18s 9d should be carried forward to profit and loss new account. The shareholders are aware that in October last arrangements were provisionally concluded between the directors of this Company, and the directors of the London and Northern Bank, for an amalgamation of the two companies. These arrangements were not confirmed by the shareholders of the London and Northern Bank, but before the close of the year your directors were able to conclude terms for the transfer of the business of the London and Northern Bank at Huddersfield, Leeds, and Sheffield, to the Midland Banking Company, which they believe cannot fail to prove highly advantageous to the shareholders. The directors have also the pleasure to report, that since the date of the accompanying balance sheet, the position of the bank has been further strengthened by the addition of upwards 240 names to its proprietary; that number of shareholders in the London and Northern Bank, holding together upwards of 3,800 shares (25*l* paid), have applied to have allotted to them a like number of shares in this Company (15*l* paid), in lieu thereof, with the understanding that they are to receive any sum beyond the 15*l* per share which may be realised out of the assets of the London and Northern Bank. By these allotments, the subscribed capital of the bank will be at once raised to about 800,000*l*, the new shares being chiefly held by proprietors residing in the districts of the branches, and therefore in a position to promote the success of the bank.

NATIONAL BANK.

The following report of the directors was submitted to the proprietors, at the thirtieth annual general meeting, held at the bank, Old Broad street, 31st January, 1865 :—

The directors of the National Bank have much pleasure in presenting to the proprietors the thirtieth annual report of the state of the society, made up to the close of 1864. In July last the directors submitted to the proprietors their report for the half-year ended the 30th June. The present report, however, incorporates the accounts for both half-years of 1864, as the directors believe that the relative progress of the bank will be best judged by the proprietors comparing the results of each year with those of the preceding year, rather than by comparing one half-year with another. The dividends payable for the year 1864 have been struck at the same rates as those paid for 1863, but compared with a surplus of 25,445*l* 13s on the operations of 1863, 104,009*l* 4s 10d, are added to the rest from the operations of 1864, in addition to the 500,000*l* which have accrued thereto from the premium on new shares issued under the provisions of the two special general meetings held on the 23rd and 24th March last. The following accounts in the usual form exhibit the state of the company's affairs at the close of 1864 :—

ASSETS and LIABILITIES—December 31, 1864.

Net profit for the half-year to 31st December, 1864, after writing off all bad, and providing for all doubtful debts £125,253 17 2			
Less rebate of interest on bills not due 24,145 0 0	101,108	17	2
	859,850	15	0

Since these accounts were made up a dividend at the rate of 8*l* per cent. per annum on the capital of the bank, and an extra dividend of 16s per share, have been struck on the old shares of the company, 30*l* paid up, and a pro rata dividend of 1*l* per share has been declared on the new issue, 15*l* paid up, which will be payable at the head office and branches of the company on and after 8th February next. In the half-yearly report issued by the directors in July last, they announced that it was their intention to adhere to the same rate of dividend until the new shares were paid up to the amount of 30*l* per share, so that the shareholders of both classes might equally participate in the increased profits which have accrued in consequence of the increased capital and reserves. There has been a call of 5*l* per share made on the new shares during the present month. The next call will be made in April, and the sixth call (which will bring the amount of the paid-up capital to 30*l* per share on the new shares and thus assimilate them to the old) will be made in July next. When this last-mentioned call shall have been made, the directors propose to convene two special general meetings of the proprietors to sanction the issue of 10,000 other new 50*l* shares, 30*l* paid up, for which the provision will be transferred from the rest. These shares, paid up to 30*l* each,

Digitized by Google

the directors propose should be presented free of charge and by way of bonus to the proprietors of the bank for the time being, in the proportion of one new share, 30*l* paid up, for every four shares held by each shareholder respectively. This operation, when carried out, will increase the paid-up capital of the bank to one million and a half sterling and will leave the undivided profits, it is estimated, at nearly half a million. The directors believe this mode of augmenting the stock of the company, and thereby the revenue of the shareholders, is preferable to a sudden distribution of increased dividends or cash bonuses, and they advise the proprietors thus early of their intention, because the rate of profit is already so far in excess of the rate of dividend, that it is proper the directors should explain how they propose to distribute their increased revenue. On the 1st October the directors opened their fifth Metropolitan Branch, at 23 Old Cavendish street, Oxford street. On the 22nd August they opened a branch of the bank at Belfast, and on the 1st November a branch at Ballymahon, in the county of Longford, all of which are working satisfactorily. The directors have to report that their London agency for several banking companies, negotiated during the past year, come into operation in the present, and will, it is hoped, form a safe and profitable department of the company's business.

NATIONAL BANK OF AUSTRALASIA.

The following, dated Melbourne, October 20, 1864, has been issued to the shareholders of this bank :—

The directors have pleasure in submitting the following report on the affairs of the corporation, with a statement of accounts for the half year ended 30th September. The net profits for that period, after making allowance for bad and doubtful debts and rebate on bills, amount to 30,387*l* 0s 10d. The directors recommend this sum to be appropriated as follows :—Dividend at the rate of 10 per cent. per annum, 20,000*l*; reserve fund (making a total of 45,000*l*), 9,000*l*; balance carried forward, 1,387*l* 0s 10d; total, 30,387*l* 0s 10d. During the last half-year branches have been opened at Colac in Victoria, and at Auburn in South Australia. The shareholders will be glad to learn that the position and prospects of the London agency are of a most encouraging character. Three gentlemen of standing and influence have been appointed a local board to co-operate with the manager, and your directors are confident that this agency will, in a short time, contribute materially to the general interests and prosperity of the bank. The general meeting will be held at the banking house, Collins street, on Tuesday, 1st November, at noon.

NATIONAL BANK OF INDIA, LIMITED.

The following is the report of the directors for the second half-year ending Dec. 31, 1864 :—

In presenting the annexed accounts for the half-year ending Dec. 31, 1864, your directors have pleasure in congratulating the shareholders on the steady and solid progress made by the bank during that period. The disturbed state of the monetary and commercial atmosphere, which prevailed during the last six months, rendered it desirable rather to restrict than to extend the bank's operations, and although, therefore, the benefits which may reasonably be expected to be reaped from the branches have as yet been derived only to a limited extent, it is satisfactory on the other hand that your directors are able to state that the bank has enjoyed a complete immunity from bad debts. The accounts now submitted show that after deducting all current charges and allowing for rebate on bills purchased and discounted, and for interest due to the public, &c., the net profit amounts to 84,889.9.6 rs, including 1,260.11.0 rs brought forward from last half-year's account. Your directors recommend that out of the amount, a dividend at the rate of 6 per cent. per annum, or 7.4 rs per share, be paid, free of income tax, on the capital of the bank, as from time to time received during the half-year, viz., on 15 lacs from 30th June to 15th July, and on 25 lacs from 15th July to 31st December, 1864. This will absorb 72,500 rs, leaving 12,389.9.6 rs, as to the disposal of which your directors recommend that 10,000 rs be carried to the reserve fund, and 2,389.9.6 rs to next half-year's account. The reserve fund will then stand at 25,000 rs, being one per cent. on the whole paid-up capital of the bank. During the half-year just closed branches have been opened at Bombay and London. Owing to the sudden death of the agent at Bombay, before the branch had been fairly started, the agency has been transferred, as a temporary measure, to the bank of Bombay. The agency, however, will shortly be put on an efficient footing under the management of Mr Windram, at present sub-manager at Calcutta. The London agency was opened on the 12th October, and it is gratifying to state that all advices from London mention that the bank has been well received. The influential and well-known names composing the London board will, it is believed, be highly acceptable to the shareholders, and will be of great service in advancing the interests of the bank in England. Your directors have received a requisition numerously signed, by the representatives of the important tea planting interest of the province of Cachar, asking that the bank should establish a branch at Silchar, in Cachar; to this request your directors are prepared to accede, provided certain concessions now under consideration of Government can be obtained. The board take this opportunity to impress upon the shareholders the necessity for giving the bank the benefit of their direct support and influence—a hearty and active individual interest on the part of the shareholders being essentially necessary in the present days of keen competition in banking.

Total	84,889 9 6

NATIONAL BANK OF LIVERPOOL, LIMITED.

The following report was submitted to the proprietors at an ordinary general meeting, held in Liverpool, 24th January, 1865 :—

The directors of the National Bank of Liverpool, Limited, have much pleasure in presenting to the proprietors their third report on the business of the company, and the balance sheet to the 31st December, 1864. During the past half-year, which has been marked by many commercial disasters, the aim of the directors has been to transact a safe rather than an extensive business; and they are happy to state that they have placed a sum of 12,671*l* 10s 6d to the credit of profit and loss, after writing off all bad, and amply providing for doubtful debts. To this must be added 5,514*l* 5s 4d carried forward from last half-year, leaving 18,185*l* 15s 10d for distribution; which the directors propose should be applied as follows ;—Dividend of 10s per share on 20,000 shares, 10*l* paid, 10,000*l*; dividend of 1s per share on 7,506 shares, 1*l* paid, 375*l* 6s; reserve fund, increasing it to 97,530*l*, 5,000*l*; profit and loss next account, 2,810*l* 9s 10d; —total, 18,185*l* 15s 10d. The dividend herein proposed is at the rate of 10*l* per cent. per annum (free of income tax), and as the directors have been able to provide for this, and at the same time to add 5,000*l* to the reserve fund, and carry forward 2,810*l* 9s 10d, they consider they have made as much progress as could have been expected during the past half-year. The

Digitized by Google

assets and liabilities of the bank, and the profit and loss account to the 31st December are as follows:—

Assets.	£	s	d
Cash in hand and at bankers'	124,255	0	6

		12,671	10	6
		18,185	15	10

In accordance with the resolutions of two extraordinary meetings, held respectively on the 17th August and the 5th September last, 10,000 new shares were offered to the proprietors at 5*l* premium; and though between the dates of the meeting and the time fixed for taking up these shares, serious pressure occurred in the money market, 7,506 out of the 10,000 were accepted by the proprietors to whom they were offered, leaving 2,494 on hand, which other shareholders offered to take at the premium of 5*l* per share, but which offer the directors declined. The premium on the 7,506 new shares, say 37,530*l* has been carried direct to the reserve fund, in accordance with the resolution of the last half-yearly meeting. The directors now offer to the proprietors the remaining 2,494 new shares at a premium of 7*l* per share in the proportion of one new to ten existing shares, provided the sum of 12*l*, being 5*l* call and 7*l* premium, be paid here, or to the National Bank, London, or its branches, on or before the 4th February next. These shares will hereafter rank the same as the 7,506 new shares, and be liable to the call of 5*l* which will be made on the whole 10,000 shares, payable about the 10th April next. The portion of the new premises not occupied by the bank has been let on satisfactory terms.

NATIONAL PROVINCIAL BANK OF ENGLAND.

At the general meeting held May 11, 1865, the following report was read:—

The directors have much satisfaction in submitting their thirty-second annual report for the period ending 31st December last, for the approval of the shareholders. The features marking the commercial operations of last year have been of an important character. The enhanced prices which prevailed in the great staples of our manufacturing industry, the vast proportions which our trade relations assumed, the enlarged development of new schemes of enterprise, and the augmented basis of existing institutions, all absorbing an amount of capital almost unprecedented in the most active years of modern speculation, have contributed to extend the demand for money, and to sustain it for a lengthened period at an elevation hitherto unknown in this country. During the year 1864 there have been no less than fifteen fluctuations in the Bank rate of interest, varying from 6 to 9 per cent., and giving an average of not less than 7¼ per cent. The effect of this strain upon the commercial classes (however favourable it might be for banking profits) began to manifest itself towards Midsummer, and increased in intensity as the autumn approached, when a severe reaction in prices occurred, leading to the downfall of a large number of commercial firms and involving one or two country banks in the catastrophe. The harvest (with the exception of roots) having proved favourable, this circumstance, combined with the low price of cereals and a good home trade, tended materially to mitigate those commercial disasters. The directors, however, have to record with satisfaction that the losses of this establishment from bad debts or other casualties have not been more than the average of ordinary years. Under the influence of such an enhanced value of money, the result of the year's operations could not be otherwise than favourable for augmenting the returns much beyond the average of ordinary seasons; and accordingly the profits this year rank higher than any that have preceded it. This of course must be considered altogether exceptional. The result of the year's transactions are as follows, viz.:—

January 1, 1864.	£	s	d
Rest or undivided profits at 31st December, 1863, as exhibited at the annual meeting in May, 1864, including premium on shares	272,452	5	2
Less—Bonus declared and paid in cash in 1864 out of this, amounting to	63,000	0	0
Reserve fund set apart on Government securities	209,452	5	2
December 31, 1864.			
Net profits of 1864 after making allowance for bad and doubtful debts, &c.	303,800	1	0
	513,252	6	2
Add undivided profits carried forward for 1863	10,000	0	0
Total	523,252	6	2
Deduct—			
Dividend on company's stock, paid July, 1864	38,400	0	0
Do. December, 1864, paid January, 1865	40,800	0	0
Bonus of 9 per cent. do. do.	86,400	0	0
Undivided profits carried to next half-year	20,000	0	0
	185,600	0	0
Leaving	337,652	6	2

Out of these profits the directors propose to declare, in addition to the foregoing dividends and bonus paid to proprietors above stated, a further bonus of 11 per cent., making a division of profits in 1864 in all 28 per cent. upon the paid-up capital at 31st December, 1864, free of income tax, amounting to 112,200 0 0

Leaving reserve 225,452 6 2

The directors, with a view to mark their appreciation of the zeal and efficiency of the staff, and to characterise the highly prosperous and exceptional nature of the year's operations, voted a gratuity of 5 per cent. to their officers, in addition to the usual bonus of 10 per cent. of recent years, which was paid at Christmas last. In furtherance of the views expressed in the last annual report that the interests of the bank required that its operations should be extented to the metropolis, measures were adopted during the autumn in order to obtain legislative relief in the present session of Parliament from the disabilities which English banks of issue are subjected to in London; accordingly, representations were made to Her Majesty's Government on the subject, and after much discussion the Chancellor of the Exchequer introduced a bill for the removal of the grievances in question, which has already passed through committee in the House of Commons. The directors consider it highly advantageous for the bank's interest to come within the provisions of the bill with the least possible delay, and accordingly propose to call two general special meetings of the proprietors, to submit resolutions with that object for their approval and adoption. A desire having been expressed for additional banking accommodation at Carmarthen and Newcastle Emlyn, in Wales, the directors have opened branches at those places under encouraging circumstances. The directors have to congratulate the proprietors on being able to meet them under such favourable auspices for the first time in their new building, which, when completed, they trust will do credit to the architect and to the company, and afford suitable accommodation for carrying on the present and future operations of the bank. The directors have to record, with much regret, the death of your late general manager and honorary director, Daniel Robertson, Esq. With a view to commemorate the great services which he rendered to the bank, the directors have ordered a marble bust of him to be executed by Baron Marochetti, to be placed in a prominent position in the bank's new building, as a mark of respect, which they hope will meet with the approbation of the shareholders.

NORTH-WESTERN BANK, LIMITED.

At the first ordinary general meeting of the company, held at the Law Association rooms, Liverpool, on Monday, January 30, 1865, the directors submitted the following report to the proprietors:—

The directors, in presenting their first report to the shareholders, have much pleasure in stating that the arrangements with Messrs Moss and Co. have been satisfactorily carried out. The annexed balance sheet and statement of profit and loss account show the result of the operations of the bank from the commencement of business, on April 18 to December 31, 1864, a period of rather more than eight months. The net profits, after payment of all the preliminary expenses incurred in the formation of the company, salaries and general expenses, rebate of interest at six per cent. on bills current, and after making ample provision for bad and doubtful debts, amounts to the sum of 24,215*l* 18s 8d, which the directors have decided to apply as follows, viz.:—Dividend at the rate of 10 per cent. per annum (free of income tax) on 54,000 shares at 6s 3d per share, 17,875*l*; reserve fund, 7,000*l*; profit and loss new account, 1865, balance carried forward, 340*l* 18s 8d—24,215*l* 18s 8d.

GENERAL BALANCE SHEET—December 31, 1864.

ORIENTAL BANK CORPORATION.

Annexed is the fourteenth annual report of the court of directors to the proprietors:—

The general statement of affairs and balance sheet for the year 1864, now submitted by the directors for the information of their co-proprietors, show the net profit of the corporation for that period to be 206,089*l* 18s 4d, after defraying current expenses, and providing for all bad and doubtful debts. The dividend of 8 per cent. for the half-year ending 30th June, already paid, has absorbed 100,800*l* of the profits, leaving 105,289*l* 18s 4d available for present distribution, out of which it is now proposed to pay an additional dividend of 5 per cent., and a bonus of 3 per cent., making, with the previous payment, a distribution of profit for the year 1864 equal to 16 per cent. on the capital of the corporation. The present dividend and bonus, amounting to 2*l* per share, will be paid, free of income tax, on and after the 1st proximo, at the office of the corporation; and after these payments have been provided for, there will remain a balance of 4,489*l* 18s 4d to be carried to the credit of the next account. The consent of the Lords Commissioners of Her Majesty's Treasury having been obtained to an increase of capital, a further issue of 25*l* shares was made on the 20th of May last, and the same were allotted to the proprietors then registered on the books of the corporation in the proportion of one in six. These shares were issued at a premium of 20*l* each, which premium was carried to the credit of reserved fund; and the directors have the satisfaction to report that the entire amount has been fully paid up, making the capital of the corporation 1,500,000*l*, and the reserved fund 444,000*l*. The operations of the past year have not resulted so favourably as those of 1863; nevertheless, having regard to the critical state of commercial and monetary affairs during the period under review, the directors have good reason to congratulate the shareholders, that timely precaution in restricting credits and limiting business generally, while reducing the dividend, has prevented much actual loss which might otherwise have arisen, and has diminished the prospective risk necessarily attaching to current transactions in times of difficulty.

PARES'S LEICESTERSHIRE BANKING COMPANY.

At the twenty-ninth general annual meeting of proprietors held at the Bell hotel, Leicester, on the 1st day of February, 1865, the directors presented the following report:—

The directors have pleasure in meeting the proprietors on this occasion, and in placing before them results of the business of the past year. The year 1864 opened with a general advance in the value of money, and during the whole year greater changes have taken place in the rate of discount than can be remembered in any former period; this with other circumstances has required unusual watchfulness and care, and your directors are glad to be able to report that the result of the business of the year has been very satisfactory. The profits, after making ample allowance for doubtful debts, and paying all expences and losses, amount to the sum of 32,695*l* 0s 7d; this with the balance of 3,802*l* 4s 9d carried over on 31st December, 1863, makes a total of 36,497*l* 5s 4d to be now dealt with. The directors recommend the payment of a dividend of fifteen shillings per share on the old shares, and of six shilings per share on the new shares, free of income tax, being at the rate of 6*l* per cent. for the half-year, they further recommend that 9,049*l* be placed to the reserved fund, and that the balance be carried to the credit of the account for 1865, the result will then be as under:—Dividend paid in August on old shares, 10,125*l*; dividend paid in August on new shares, 951*l*; dividend on old shares as now recommended, 10,125*l*; dividend on new shares as now recommended, 1,902*l*; allowed for income tax, 860*l*; reserved fund, 9,049*l*; profit and loss for 1865, 3,485*l* 5s 4d—total, 36,497*l* 5s 4d. The paid-up capital of the bank is now 200,450*l*, consisting of 13,500 old shares of 12*l* 10s each, fully paid up, and 6,340 new shares of like amount upon which five pounds per share has been paid. The reserved fund with the foregoing addition (together with the addition of 1,120*l* received for premiums on new shares sold), will now amount to 72,000*l*. The proprietors will observe that the directors are carrying a larger amount than usual to this fund, in preference to declaring an increased dividend, but after serious consideration they are satisfied it will be the best course to adopt, having regard to the increasing business of the bank, and the increase in the capital which will be made when the whole of the calls upon the new shares shall have been paid up. The directors recommend that this meeting should make a further call of 2*l* 10s per share upon the holders of the new shares, to be paid upon the 3rd of July next, making the amount paid up on these shares 7*l* 10s per share.

PROVINICIAL BANK OF IRELAND.

The following is the thirty-ninth yearly report made to the proprietors, on Thursday, May 19, 1864:—

The directors have the pleasure of stating, for the information of the proprietors, that the result of the bank's business for the past year has been satisfactory. The summer of 1863 was favourable for agriculture, and the crops were generally more productive and of better quality than they had been for four previous years. The late grain crops were, no doubt, much injured by rain and exposure in the harvest season, and the price of corn has been very low; but, on the other hand, the prices of cattle and sheep, and of wool and flax, have been high, and these, to the large landholders especially, have in some degree compensated for the low price of grain. The condition of the small farmer has not, however, improved, and the ordinary retail trade of the country is still depressed. The different branches of the linen trade have been extremely active and prosperous, and the beneficial effects have been felt throughout the Northern counties of Ireland, to which, as the proprietors are no doubt aware, the linen manufacture and the cultivation of flax are, as yet, almost entirely confined. Considerable fluctuations took place in the value of money, no fewer than twelve changes having been made in the minimum rate of the Bank of England during this bank's year of account ending on March 26. The rate during that period ranged from 3 to 8 per cent.; the average for the whole year having been a fraction over 5 per cent. This state of the money market, and the peculiar circumstances of the times, rendered it necessary for the directors to exercise increased circumspection and caution in the management of the business, and in the employment of the resources of the bank, but they have have been careful to meet the usual and reasonable requirements of the bank's customers. Upon considering the whole circumstances of the past year, the directors expect that the proprietors will concur with them in viewing with satisfaction the statement of accounts, to which the attention of the meeting is now requested. The account submitted to the yearly general meeting in May, 1863, showed the amount of rest or undivided profits at March 28, 1863, to be 250,913*l* 9s 6d; out of which there has been paid to the proprietors the amount of two ordinary and extraordinary dividends as follows:—At Midsummer, 1863—ordinary dividend of 4 per cent., 21,600*l*; extraordinary dividend of 6 per cent., 32,400*l*,—54,000*l*; at Christmas, 1863—ordinary dividend of 4 per cent., 21,600*l*; extraordinary dividend of 6 per cent., 32,400*l*,—54,000*l*;—together, 108,000*l*;—leaving a balance of, 142,913*l* 9s 6d; to which there has since been added the amount of net profits for the year ending March 26, 1864, after deducting property tax, and providing for all bad and doubtful debts, 109,954*l* 6s,—making the rest, or amount of undivided profits, at March 26, 1864, 252,867*l* 15s 6d. This statement shows a small addition to the rest. and the directors propose continuing the dividend at the same rate as for some years past. They have, therefore, now to intimate to the proprietors their intention to pay, in July next, an extraordinary dividend of 30s on each 100*l* share, and 12s on each 10*l* share, of the capital stock of the bank, in addition to the ordinary dividend of 4 per cent.; making the amount to be then paid 2*l* 10s on each 100*l* share, for the half-year ending at Midsummer next; and they will also, as heretofore, pay the property tax for the proprietors.

SCINDE, PUNJAUB, AND DELHI BANK CORPORATION, LIMITED.

At the third half-yearly meeting of the shareholders in this company, held at the London Tavern, Bishopsgate street, on Nov. 29, 1864, the following report was presented:—

The bank has now branches in operation at Bombay, Kurrachee, Lahore, Umritsur, and Calcutta, and is represented by agencies at Madras, Hong Kong, Ceylon, Sydney, and Alexandria. The Lahore and Umritsur branches were opened on the 6th April and 2nd May respectively; the Calcutta branch on the 18th July. The result of the operations of these branches cannot be brought into account before the 31st December next. The shares last issued at 2*l* per share premium were taken up and paid upon to the extent of 7,889 out of the 12,500 offered to the shareholders, and according to advices by last mail from Bombay branch, the 1,000 shares placed at the disposal of that branch had all been allotted to the public at 5*l* per share premium, which premium, together with a deposit of 2*l* per share, had been paid. The total amount realised by premiuns—viz., 24,974*l* 1s 6d, has been carried to the reserve fund. No returns have yet been received from the other branches as to the shares appropriated to them. The accounts for the half-year ending 30th June last, as per annexed statement, which have been duly audited, show a gross profit of 26,613*l* 12s, including balance brought forward 1st January, 1864, after deducting interest on current and fixed deposits. From this sum, 9,270*l* 9s 4d has been deducted for current expenses, and 12,433*l* 8s 1d for rebate on bills and commission on acceptances running, including a due provision for bad and doubtful debts, leaving a balance of 4,909*l* 14s 7d at the credit of profit and loss, which the directors propose to carry over to next half-year.

BALANCE SHEET made up to 30th June, 1864.

SHEFFIELD AND ROTHERHAM BANK.

At the ordinary general meeting of proprietors, held at the bank in Sheffield, on the 1st February, the following report was read:—

Your directors in presenting to the shareholders their annual report have much pleasure in saying the business and profits of the bank during the past year have far exceeded those of any former year. In consequence of the increasing business at the Buxton branch, your directors have found it necessary to take more commodious premises and open the branch daily. The new bank premises were opened on 1st June last, under the management of Mr Issac Walton, formerly cashier of the Bakewell branch; the result has been satisfactory. For some time past your customers at the bank at Sheffield have been put to great inconvenience in consequence of the inadequate accommodation of the present banking house, and your directors have decided to build a new one in order to meet the requirements of the increased business, and now propose to lay aside a sum out of last year's profits for that purpose. The profit and loss account, after payment of the alterations at Buxton, the expenses of management, and income tax, and presenting a gratuity of 10 per cent. on their salaries to all the officers of the bank, shows a net gain of 38,287*l* 11s 6d. Your directors propose on this occasion, and for the future, to fix the dividend at not more than 12½ per cent., and any further sum applicable as dividend will be divided as bonus. Your directors have written off for losses 1,290*l* 3s 5d, transferred 5,000*l* to new building account, and they now declare a dividend out of the profits for the year ending Dec. 31, after the rate of 12½ per cent. per annum, together with a bonus of 2*l* per share on the 100*l* shares, and 10s per share on the quarter shares. The proprietors in August last received on account, and in anticipation of this dividend, an instalment after the rate of 5 per cent. per annum; the balance, together with the bonus, will be payable at the banks of the company on and after the 8th instant. The balance remaining, 1,865*l* 8s 1d, has been passed to the credit of the reserved fund. This fund at the close of 1863 amounted to 65,082*l* 0s 5d; profit on sale of ten shares held by the bank, 360*l*: amount transferred from profit and loss as above, 1,865*l* 8s 1d; total, 67,307*l* 8s 6d; deduct vote to directors at last annual meeting, 700*l*; total Dec. 31, 1864, 66,607*l* 8s 6d.

SOUTH-EASTERN BANKING COMPANY, LIMITED.

The following report was presented to the shareholders at the first general meeting, held February 6, 1865:—

The directors have much pleasure in presenting to the shareholders their first report, together with a statement of accounts to December 31, 1864. On the formation of the bank the business of Messrs Mangles—The West Surrey Bank—established 1836, and carried on at Guildford and six other places, was taken as a nucleus, and shortly afterwards the bank took over the business of Messrs Burgess and Canham, the Ramsgate Bank. The result of these purchases has proved highly satisfactory. Fifteen new branches and three agencies have since been opened, making in all twenty-six places where the bank is now carrying on business. By the annexed statement it will be seen that the gross profit up to December 31, 1864, was 14,117*l* 13s 8d. After deducting interest paid to customers on deposit and current accounts, current expenses, rebate on bills discounted not yet due, and providing for a loss of 216*l* 5s 1d in transit through the post, there remains a net profit of 4,845*l* 6s 3d. The directors recommend the payment of a dividend at the rate of 6*l* per cent. per annum (free of income tax) on the paid-up capital, which will absorb 2,387*l* 13s 4d; that 367*l* 15s be written off the preliminary expenses—1,112*l* 18s off the purchase of the old banks, being at the rate of 10*l* per cent. per annum—and that the sum of 500*l* be appropriated to a reserve fund. This will leave 476*l* 19s 11d, together with rebate calculated at 6*l* per cent., 1,030*l* 8s 11d, making the sum of 1,507*l* 8s 10d to be carried forward to new profit and loss account.

STANDARD BANK OF BRITISH SOUTH AFRICA, LIMITED.

Subjoined is the third report of the directors to the shareholders, dated 10th November, 1864:—

The directors have much pleasure in submitting to the shareholders the accounts of the company for the half-year ending 30th June last, showing a net profit (after payment of all charges, commissions, and interest, deduction of rebate on all bills, discounted, but not due, and making provision for bad and doubtful debts) of 20,068*l* 17s 7d, or from 11 to 12 per cent., which, with 76*l* 12s 6d brought forward from the previous account, and 6,134*l* 16s premium on shares issued, makes a total of 26,280*l* 6s 1d. The directors recommend that the above sum of 26,280*l* 6s 1d should be disposed of as follows, viz.:—Reserve fund, 8,110*l*; preliminary expenses, 188*l* 1s 11d; suspense account, 1,200*l* (to be disposed of as the proprietors may direct to remunerate the directors and auditors, and to pay the income tax for the shareholders); dividend to proprietors at the rate of 8*l* per cent. per annum on the amounts paid upon their respective shares, 14,134*l* 16s 8d; balance carried forward to profit and loss new account, 2,647*l* 7s 6d;—total, 26,280*l* 6s 1d. Since the directors last report to the shareholders, they have opened a branch at Malmesbury, and have successfully completed the negotiations for incorporating the Beaufort West Bank, which became a branch of the Standard Bank from the 1st April last. The directors have further to report that about three-fourths of the shares which were allotted, under the special resolutions of the proprietors of the 27th April and 16th May last, have been taken up. The ordinary general meetings of the company are, by clause 46 of the articles of association, limited to one in each year, but the directors believe they will best consult the wishes of the shareholders by proposing for their sanction such alteration of this clause as will enable them to hold an ordinary general meeting once in each half-year. For the accomplishment of this object, special resolutions will be submitted to the proprietors at this meeting and recommended for their adoption.

UNION BANK OF AUSTRALIA.

The following is a supplementary report of the directors, presented at the special general meeting of the proprietors, held on 9th January, 1865:—

The accounts which it is the duty of the directors to present at this supplementary meeting are so satisfactory as not to require any lengthened remarks from them. As usual, their preparation has been preceded by a close investigation of the business of the bank at its various branches, and careful provision for everything that could be estimated as doubtful to latest dates; the results are considered by the directors to be very favourable, and they are gratified to report accordingly. The proprietors will notice the profit obtained by the disposal of unallotted shares, and the completion of the funds that were formed when the new capital was created; also that the remaining 50,000*l* of imperial 4 per cent. debentures has been obtained and applied to the reserve fund in terms of the proprietors' resolution of 12th July, 1858. The directors have been deprived during the half-year of the co-operation of two of their old and esteemed colleagues by the resignation of Charles Edward Mangles, Esq., and the death of Thomas Young, Esq. These vacancies have been provisionally filled by the nomination of Charles Henry Mills, Esq., and Sir Henry Watson Parker; the former a member of the firm of Messrs Glyn, Mills, Currie, and Co., and the latter long influentially connected with the colony of New South Wales, and with banking in Sydney. Both gentlemen, in accordance with the terms of the deed of settlement, now retire, and offer themselves for election. The profits of the half-year, as shown by the subjoined statement of accounts, have enabled the directors to declare a dividend of 2*l* 5s per share, after which there remains a balance of 1,320*l* 9s 7d to carry forward; the dividend will be payable in London on 17th instant, free of income tax; and in the colonies as soon as the inspector shall fix after receipt of advices.

STATEMENT of LIABILITIES and ASSETS, at the Branches, on the 30th June, and at the London Office, on the 31st December, 1864.

UNION BANK OF IRELAND.

The annexed report was made to the shareholders at the fourth ordinary general meeting, held at the London Tavern, Bishopsgate street, January 27, 1865:—

The directors have to record their deep regret at the loss the bank has sustained by the death of their colleague, the late Henry Bruce, Esq., whose sound judgment, ability, and untiring energy, were to the last devoted to its interests. The accounts now submitted show that the gross profits of the half-year ending 31st December, 1864, after making full provision for all bad and doubtful debts, amount to 18,782*l* 16s; and after deducting all current expenses, and interest paid and due to customers on current and deposit accounts, there remains (including the amount brought forward from last account), a total available balance of 7,972*l* 19s 3d. The directors propose to appropriate the above amount as follows:—500*l* to the reserve fund, 500*l* in reduction of preliminary expenses, 5,000*l* in payment of a dividend of 10s per share (free of income tax), leaving a balance of 1,972*l* 19s 3d to be carried to new account, in which sum is included rebate of interest on bills discounted not yet due. During the past half-year branches of the bank have been established at Kells, Co. Meath, Fethard, Co. Tipperary, and at Tipperary. The first named was opened in August last, and has made good and satisfactory progress; the two last-named have not yet been sufficiently long established to enable the directors to estimate correctly their ultimate success. The expenses attending the formation of these branches have been defrayed out of the profits of the past half-year. The general progress made by the bank in all its branches is satisfactorily evinced by the steady increase in the business, the acquisition of several valuable accounts, and a marked appreciation of the liberal policy which has been adopted in its management.

UNION BANK OF SCOTLAND.

The following is the thirty-fifth annual report of this bank, dated Glasgow, May 11, 1865:—

The directors have now the pleasure to exhibit to the proprietors an abstract of the bank's affairs as at April 1 last, and to report the results of another prosperous year. The balance of profit and loss account at April 1, 1865, after providing for all bad and doubtful debts, is 148,028*l* 2s 3d. From this sum the directors have written off 5,000*l* in reduction of the cost of bank offices, leaving a clear available balance of 143,028*l* 2s 3d; adding to this the balance of rest from last year, after payment of the dividend then declared, 102,368*l* 6s 7d;—the total accumulation of profits at April 1, 1865, is, 252,396*l* 8s 10d. Out of this sum it is proposed to set apart 80,000*l* for payment on June 1 and December 1 next, of a dividend to the proprietors at the rate of eight per cent. per annum, less income tax. Notwithstanding the highly profitable results of the year's business, the directors trust that the meeting will concur with them in the propriety of retaining the dividend for the present year at the rate of eight per cent. per annum. During the year the directors have elected Mr John Buchanan, Cawder house to the office of director, in room of Mr Stirling, resigned,—an appointment which the meeting is now requested to confirm.

WORCESTER CITY AND COUNTY BANKING COMPANY.

The following report of the directors for the year ending Dec. 31, 1864, was presented to the shareholders at the annual general meeting, held Feb. 1, 1865:—

In presenting their twenty-fourth annual report and accounts of the bank for the year ending Dec. 31, 1864, the directors have first to thank the proprietors in general for their co-operation in obtaining business for the establishment, which has had the result of enabling the directors to produce a more satisfactory balance sheet than has ever before been presented, notwithstanding the financial difficulties of the past year, from which this concern, in common with many others, has not escaped without losses. The balance sheet this day presented (after writing off bad debts, and a sum of 1,000*l* in further outlay on the bank's premises) exhibits a net profit for the year of 21,151*l* 10s 4d. Out of this sum an interim dividend at the rate of 10 per cent. per annum has been already paid for the half-year ending the 30th June last, and the directors now recommend a similar dividend for the half-year ending the 31st December. This will leave a balance of 11,151*l* 10s 4d, making, with the present reserved fund of 33,600*l*, and contingent fund of 5,550*l* 2s 1d, an aggregate amount of 50,301*l* 12s 5d. The directors advise that out of this sum a reserved fund, or rest, of 50,000*l* should be established, and that the remainder, 301*l* 12s 5d, should be carried to the profit and loss account for the current year. Thus will be established a guarantee fund which will enable the directors to look forward with confidence to giving the proprietors ere long a bonus, either by way of addition to capital, or in such other shape as may be considered most conducive to the interests of your bank. They propose this course to the shareholders as one more conducive to the permanent interests of the bank than the declaration of a dividend to the extreme verge of profits. It affords the directors much pleasure to state that the purchase of the Ludlow and Tenbury Bank has been carried out to their entire satisfaction; the whole of the valuable connection of the latter company has been secured, and the union has proved mutually advantageous to the parties interested. The business at all the branches has gone on steadily increasing during the year, and the directors have every reason to be satisfied with the progress made, and with the flattering prospects in all quarters where the bank is in operation. In conclusion, the directors would once more press on the attention of each individual shareholder how desirable it is, for the furtherance of the company's prosperity, that they should continue to direct their endeavours to the acquirement of fresh business for the bank.

YORKSHIRE BANKING COMPANY.

The half-yearly meeting of the shareholders of this bank was held on the 1st of February, in the large room of the bank, Leeds. Mr Scott, the general manager, read the following report of the directors:—

The directors have much pleasure in meeting the shareholders to present their usual report The profits for the half-year ending the 31st December last amount to 30,866*l* 12s, out of which it is proposed to pay the usual divipend of one guinea per share (free of income tax), amounting to 15,234*l* 9s; to add to the new share fund, 13,727*l* 10s, or equal to 2*l* 10s per share on 5,491 shares; carrying the surplus, 1,904*l* 13s, to the credit of the bad and doubtful debt fund. The average value of money having ruled high during the past six months, the bank has been enabled to employ its resources to more than ordinary advantage; and whilst the directors cannot but congratulate the shareholders on the result, as shown in an increase of 3,517*l* 13s 8d over the previous half-year's profits, they at the same time deem it right to suggest such a result can scarcely be expected to be maintained on decreased rates of interest. With the sum now proposed to be added to the new share fund, that fund will amount to 50,791*l* 15s, or within 6,863*l* 15s of its completion. The following is the statement of liabilities and assets, as certified by the auditor, who also makes a separate report, which is annexed:—

Liabilities.	£	s	d
Shareholders for capital stock	152,344	10	0
Dividends unpaid	176	19	0
New share fund	37,084	5	0
Deposits and credit balances	1,201,138	15	8

	1,599,556	14	7

YORK CITY AND COUNTY BANK.

Annexed is the report of the directors to the proprietors, at their annual general meeting, held on January 26, 1865:—

The directors have the satisfaction to state, in this their thirty-fifth annual report, that, after making provision for bad and doubtful debts, and crediting the reserved surplus fund with 1,218*l* 8s 2d (interest at 4 per cent.), there remains a profit for the year 1864, of 22,028*l* 19s 3d, from which they recommend a dividend of 8 per cent. on the increased capital, and a bonus of 30s per share (together 17,500*l*), free from income tax, and that the balance of 4,528*l* 19s 3d be carried to the reserved surplus fund, which will then amount to 36,207*l* 12s 9d. Before dividing the profits the directors voted a bonus of 10 per cent. to the staff, and also voted a gratuity of 1,000*l* to Mr Smallwood in recognition of his long and valuable services.

Literature.

A Mission to Gelele, King of Dahome. With Notices of the so-called Amazons, the Grand Customs, the Yearly Customs, the Human Sacrifices, the Present State of the Slave Trade, and the Negro's Place in Nature. By Richard F. Burton, late Commissioner to Dahome. Tinsley Brothers, 18 Catherine street, Strand.

If King Gelele could have foreseen the effec upon his white friends of the vivid and photograph-like sketches that were fashioning themselves under the industrious fingers of his guest, he would scarcely have congratulated himself on Captain Burton's zeal in taking notes and polite attention to minutiæ, or have sent him that gratifying message of "compliments and thanks," with the assurance that as "no white man had ever before taken so much trouble," so "everything should be shown" to him. The recent defeat and disgraceful flight of its army before Abeokuta will not do more to open the eyes of Europeans to the real weakness of this dreaded African kingdom, or to destroy the prestige of the name of Dahome, than the plain statement of facts contained in these two volumes.

They are not pleasant reading; far from it. Some "softening veil" of romantic unreality is much needed by the writer who would make a tribe of dancing, drinking, slave-hunting negroes into interesting savages. Captain Burton did not find them so on a close inspection, and he ruthlessly strips off every rag of concealment from the naked hideousness of the truth. It is not that he tells us worse things of Dahome and its King than we knew before; on the contrary, he confirms Commodore Wilmot's statement that the extent and cruel nature of its customs have been much exaggerated, but he tells us meaner things, and changes unintelligent horror into intelligent contempt. Awhile ago, Abeokuta fared but badly at Captain Burton's hands. It is now her enemy's turn, who fares even worse. The glory of Dahome is indeed departed, and we heartily join in the aspiration with which the bearer of our latest "friendly message" to that kingdom concludes his estimate of her losses in the recent war,—"Many years must elapse before Dahome can recover from the blow, and before that time I hope to see her level with the ground."

The favourable reception given to Commodore Wilmot in the winter of 1862 encouraged Her Majesty's Government to hope that the time was come for a successful attempt at moral pressure upon the court of Dahome. A resolute Envoy and suitable presents, it was thought, might effect some change in its evil habits. The first was well selected: Captain Burton's long familiarity with the negro character, his profound contempt for it, and his indomitable will, if they did not fit him peculiarly for the office of friendship-bearer between England and King Gelele, at least put our intercourse with him on a right footing. There is no danger that our last Envoy should be taken for a tribute-bearer from Queen Victoria to the King of the Blacks. The presents, unfortunately, were a failure: the tent was too small, and though handsome, the "only part of it admired was the gingerbread lion on the pole-top." The pipe was never used—Gelele, like many other smokers, preferring his old clay: "the belts caused great disappointment" because they were not bracelets; the coat-of-mail was too heavy; altogether, the King expressed no gratitude; on the contrary, his disappointment was kept from open and impolite expression by "the state of feeling" best expressed in our popular adage, "Better luck next time." On the whole, we should say, the literary results of our Envoy's mission are considerably more important than the political ones are ever likely to prove; King Gelele showing a "stubborn resolve to ignore, even in the smallest matters, the wishes of Her Majesty's Government," frankly refusing to put a stop either to human sacrifices or to the export slave trade, and meeting the remonstrances of his "white friends" with the counter demand that since by their own testimony the export of slaves from Africa was about to cease altogether through lack of buyers, he might be permitted to make hay while the sun still shone, and transport his criminals or war prisoners profitably without opposition. By this concession on our part he would be convinced of our friendly feeling, but at any rate he objected on principle to our asserted right of search. "Slavers," he told Captain Burton, "were captured near his beach, which could not be permitted. Some of these prizes had, or might have, on board orders from him, and this rendered interference with them a personal offence." We much fear that at this rate the English carriage and horses on which the Majesty of Dahome has set his heart will not soon add their lustre to the yearly display of his wealth, but that he must be content to be drawn by his faithful and applauding subjects at the time of the customs in the Bath chair, or the "antiquated red-lined vehicle, a mongrel between a cab and a brougham, in which he figured before Captain Burton at Agbome."

The distinguishing points in the domestic policy of Dahome, the constitution of its army and the yearly assize, review, and religious ceremonial that passes under the name of the Customs, are well known by report to our readers. Captain Burton, however, believes that much misconception exists among Western nations upon both these points, and devotes himself to their study and elucidation with a zeal and determination to master their details, and to give his readers a clear understanding of the subject, at whatever cost of weariness and disgust on their part and his own,—highly characteristic of the energy and hard moral and intellectual fibre of the man. Captain Burton has strong prejudices; he airs these and his peculiar theories on social questions all the more, we are inclined to think, in proportion to their distastefulness to the public for whom he writes. He is in the highest degree "bumptious." Even in the best of his works there is much to offend an educated taste and a right-thinking mind;—his almost rabid aversion to Christianity is curiously exemplified in these volumes, where he goes out of his way to fall foul of the *Southern Cross*, calling it "a boy's lob-sided kite," or "a badly-made four-legged stool." His style, nervous and effective as it is, is disfigured by scraps from all the modern tongues, and by words coined for his own use, at whose meaning the uninitiated reader can only guess; yet, in spite of all defects and deformities, his books will be read widely and deservedly, for they have a life, a distinct individuality of their own, and reproduce with much power the keen observation, the vigorous if not very profound thought, of a clear intellect and an original mind, enlarged by wide travel and still wider reading. If the "excessive detail" for which Captain Burton apologises in this description of Dahome is compared with the yet more "excessive detail" of Captain Speke's *magnum opus*, the distinction between a real artist and one in whom industry is made to take the place of talent will be clearly seen. In the one, the strokes, however apparently trifling and minute, have each their part in producing the life-like effect of the picture; in the other, they only over-crowd and confuse it.

"In this year of grace, 1864," writes Captain Burton, "there is at least an equal amount of uncertainty concerning the 'Land of the Amazons' (as in the last century), but it shows rather in things metaphysical than physical." So well-informed a journal as the *Saturday Review* (July 4th 1863), gravely informs its readers that "The King of Dahome has lately been indulging in a sacrifice of 2,000 human beings, simply in deference to a national prejudice (!) and to keep up the good old customs of the country (!!)" Now, human sacrifice in Dahome is, he states, "by no means done to keep up the "good old customs of the country." The object is not "to offer a valuable and acceptable present to Heaven;" nor is it penance, or self-deprivation, done because "the thing parted with is precious or coveted;".....it "is founded upon a purely religious basis, which not only strengthens but perpetuates the custom. It is a touching instance of the King's filial piety, deplorably mistaken, but perfectly sincere. The Dahoman Sovereign must, I have said, enter Deadland with royal state, accompanied by a ghostly court of leopard-wives, head-wives, birthday-wives, Aga-wives, eunuchs—especially the chief eunuch-singers, drummers, kings' 'jotosi,' and 'kings' devils,' bards, and soldiers. This is the object of what we have called the 'Grand Customs,' when the victims may amount to a maximum of 500"......"Every year, moreover, decorum exacts that the firstfruits of war and that all criminals should be sent as recruits to swell the King's retinue. Hence the ordinary annual customs." Seventy-eight or eighty prisoners and criminals were, Captain Burton believes, put to death at the present King's yearly customs, at which he was present; but he adds that "it must be remembered that throughout the year customs' time is the only period of punishment;" that prisoners of war are saved for sacrifice who would not otherwise receive quarter in the field, or who would be sold as slaves to the traders; that the executions are now "performed without cruelty;" that we ourselves execute our chief criminals, and that we increase the number of Gelele's victims by shutting off the safety-valve of interest. "That as our efforts to abolish the slaves' export are successful, these horrors will greatly increase, there is no room to doubt," is the cheerful conclusion at which our author arrives. He tells us, also, that it is indignantly denied in Dahome that any Dahoman who is not a criminal suffers in these customs; yet, if the filial duty of the King makes it needful to send a special messenger to inform his deceased father of every event of note in his own life, or even of every "trivial action" he performs,—if the slaughter, as Captain Burton says (Vol. II., p. 25), can hardly be rated at "less than 500 in average years of the annual customs, and less than 1,000 during the year of the grand customs,"—if the signs of cultivation and the pleasant villages of which older writers speak have disappeared, and "Africa, as far as I know, has shown few such ruined regions as that viewed during the last four days'" march on the road to Agborne, —we must venture to think either that the criminal law of Dahome is exceptional in its severity, or that criminal and foreign messengers are not always at hand when needed for the pious and filial purposes of the King.

The boasted army which was to extinguish Abeokuta in the approaching campaign, including its far-famed Amazons, was found by Captain Burton in a corresponding state of decay and inefficiency. He foretold its ensuing rout, and endeavoured, in his capacity of friend, to open Gelele's eyes to the danger he was wilfully running into, but in vain. If boasting could ensure victory, or "tall-talking" make up for want of courage and discipline, neither the King nor his army would have needed to buy captives wherewith to celebrate their triumphal return to Agbome, after a defeat which surprised their enemies by the ease

Digitized by Google

with which it was gained. The Amazons are not behind their brethren in arms, in their use either of the tongue, or of weapons usually considered more masculine. In *phisique*, they equal if they do not surpass them, as also in strength and power of endurance This peculiarity of physical make is not confined to those women chosen as soldiers, but holds good of the fair sex generally in Dahome, and in the neighbouring regions. The women are robust, angular, strong, while the men are often smooth-limbed and supple, rather than powerful. The women are perhaps the least cowardly of the two. Here we have one cause of the singular custom perfected, but not originated by the late King of Dahome. Another may be found in the superior security a King enjoys who is guarded by a regiment of wives, for such in theory the Amazons are, and occasionally also in fact. "Gezo ordered every Dahoman of note in the kingdom to present his daughters, of whom the most promising were chosen, and he kept the corps clear of the servile and the captive. Gelele, his son, causes every girl to be brought before him before marriage, and if she pleases he retains her in the palace. The only subjects exempt from this rule are the old English and French slaves at Whydah. These girls, being Royal wives, cannot be touched without danger of death. They never leave their quarters unless preceded by a bell to drive men from the road, and all have slaves who act as spies. The sexes meet on the march and in the field; at parades, as has been shown, they are separated by the typical bamboo." The Amazons take precedence of the men soldiers on all occasions of ceremony. Their numbers are now greatly reduced. Captain Burton ridicules the figures set down by previous travellers, and considers 2,500 (of which "one-third are half-armed or unarmed") the outside estimate of their strength. His description of these chaste and courageous maiden warriors is not pleasing; we should be sorry to retail much of it, but one brief sentence will dispel any mist of sentiment that lingers round these African Britomarts. "I expected to see Penthesilias Thelestrises, Dianas"—lovely names! I saw old, ugly, and square built frows trudging "grumpily" along with the face of 'cook,' after being much 'knagged' by 'the missus.'" If any one, not deterred by this untempting introduction, wishes to know more of this "monstrous regiment of women," or to see an African kingdom as it really is, he cannot do better than read Captain Burton's mission to Gelele, King of Dahome.

AUTUMN RAMBLES IN NORTH AFRICA. By JOHN ORMSBY, of the Middle Temple. With Illustrations from the Sketches of the Author. London: Longmans. 1864.

This slight but pleasant volume is mainly devoted to the author's recent excursions in Algeria, and has every appearance of being a faithful picture of North African life. There is but little substance in the book, but it is so amusingly written, and the salient points of African scenery and manners are so happily touched, that we can heartily recommend it as a new chapter of Eastern travel. Mr Ormsby, though slightly fast in his style, has real ability and culture, and allows himself to be serious now and then, when really moved by his subject. Perhaps the most interesting parts of the book are the remarks on the geography, physical and historical, of the regions described. For instance, we do not remember to have heard before the fact mentioned by Mr Ormsby, that the climate of Algeria north of the mountains, in the region known as the Tell, is "far more like that of Southern Europe than of Africa," and that it is not until the mountains are crossed, and the traveller enters the Sahara, that "he is in the genuine unmodified Africa. Passing through that wondrous gorge of El Kantra is almost like passing from Kew Gardens into the great palm house." Another interesting point is Mr Ormsby's endeavour to identify the classical Mount Atlas with the modern Djebel Auress, which he says, complies accurately with nearly all the conditions laid down by Herodotus. "Between Thebes and the Atlas he enumerates five hills of salt, separated each from the other by an interval of ten days' journey, all situated in the 'ridge of sand,' and, therefore, in a line nearly parallel with the West." The first, second, and fifth of these salt hills Mr Ormsby identifies, the fifth being the great salt mountain of El Outaia, which "stands at the S.W. corner of the group of the Auress, which from its height and position is naturally a cloudy mountain tract," answering to the description of Herodotus, who says that near the fifth salt hill is a mountain called Atlas, "said to be so lofty that its summits cannot be seen, for the clouds never quit them, summer or winter." Moreover, as Mr Ormsby remarks, "through all the legends touching Mount Atlas, together with the idea of loftiness and ruggedness, there runs the apparently incompatible idea of great fertility and richness"; an idea quite consonant with the beauty and fruitfulness which still characterise the Auress valleys, whose luscious grapes and abundant water-melons are particularly grateful to the desert traveller.

Mr Ormsby concludes his book with a chapter of hints on African travelling which sound very practical, and will probably be of much use to those of his readers who may feel inspired by his anecdotes of adventure in the mountains, forests, and plains of Algeria, to tread in his footsteps, and behold for themselves "the beginning of the desert and the end of Respectability." A number of graceful and effective wood-cuts add to the charm of this agreeable volume.

COMMERCIAL AND MISCELLANEOUS NEWS.

As regards the state of the money market at Calcutta, for the fortnight ending April 21, a report says:—With a continuance of easy money, the demand for it is still very moderate. On the 13th inst. the Bank rate was reduced 1 per cent. Supplies of specie from abroad have been very large, while exports to the rice ports have greatly declined. In the bazaar, loans are made at 8 to 9 per cent., and the tendency is to lower rates. Government securities advanced a little about the 11th inst., and 5½ per Cents. were done at 9.12 to 10 rs, but they have again declined, and are dull to-day at our last quotations of 9.4 to 9.8 rs. Transactions have been on a very limited scale. Exchange—On the 17th the rate opened at 2s 0¼d to 2s 0 5-16d for six months' sight credits, at which a large business was done. To-day, with a scarcity of buyers, an advance has been obtained, and credits are taken at 2s 0⅜d to 2s 0 7-16d.

Messrs Clason and Co., writing from Bombay on the 28th ult., thus allude to the state of the money market for the fortnight ending as above:—The pressure continues without alleviation, all banks acting with the greatest reserve. It is said that several of them have received positive instructions from London to pause in their operations. For the moment all business of importance is suspended, every one wishing to see the chances for the future more clearly developed. Our banks continue to have enormous funds at disposal, which are held back through want of confidence. The Bank of Bombay, making but limited advances on very few descriptions of joint stock paper, has not relieved the market. The great majority of shares are utterly unsaleable. Quotations are nominal, but show an alarming decline. The heavy April bargains in cotton were settled yesterday; but, notwithstanding the present enormous losses arising out of these contracts, we have heard of no failures.

Annexed are the returns of the Bank of Bengal for the weeks ending April 11 and April 18:—

Liabilities.	April 11.		April 18.
Proprietors' capital, paid up	£2,200,000	...	£2,200,000

ADELPHI BANK, LIMITED.

The half-yearly meeting was held at the Law Association Rooms, Cook street, Liverpool, on July 20; Mr W. R. Camidge, chairman of the company, presiding. The following report was taken as read:—

The past half-year has been distinguished by the numerous changes that have been made in the Bank rate, which, for the most part, has had a downward tendency, the average price of money having been below that of the previous half-year. Notwithstanding these circumstances, your directors have been able to employ the funds at their disposal on remunerative terms, and have now the pleasure to announce that, after payment of all expenses and making ample provision for bad and doubtful debts, there is a sum of 6,560*l* 2s 7d left for profit. Out of this sum the directors have declared a dividend for the past half-year at the rate of 10 per cent. per annum, free of income tax, and added 1,000*l* to the reserve fund; the balance of 991*l* 4s 7d has been carried forward in favour of the present half-year. The accounts have been audited, and the securites examined as usual by a special committee of two directors.

STATEMENT OF ACCOUNTS from December 31, 1864, to June 30, 1865.

Liabilities.	£	s	d
Subscribed capital, 260,220*l*; capital paid up on 4,293 shares at 10*l* each 42,930*l*; on 8,718 shares at 7*l* each, 61,026*l* - 103,956*l*; less calls unpaid, 1,671*l*	102,285	6	0
Amount due by bank on current and other accounts	187,883	14	2

ALLIANCE BANK, LIMITED.

At a general meeting of shareholders, held at the London Tavern, Bishopsgate street, in the city of London, July 21, 1865, Thos. Stenhouse, Esq., in the chair, the following report was presented:—

The directors have to report that the net profits of the bank, after deducting interest on current and deposit accounts, current expenses, provision for bad debts, and rebate on bills discounted but not yet due, amount to 27,653*l* 17s 6d, which they propose to dispose of as follows, viz.:—22,163*l* 2s in payment of a dividend; 1,000*l* in reduction of preliminary expenses; 4,485*l* 15s 6d to profit and loss account of the current half-year; total, 27,653*l* 17s 6d. The above sum of 22,168*l* 2s enables the directors to recommend a dividend of 12s 6d per share on the 30,000 shares, upon which 25*l* per share is paid, and 7s per share on the 9,766 shares upon which 20*l* per share is paid, being at the rate of 5*l* per cent. per annum. It is satisfactory to the directors to be able to state that the condition of the bank has materially improved since the last half-yearly meeting. With respect to the account specially referred to in their last report, the directors do not yet feel themselves in a position to determine the amount which will be required from the reserve fund to meet the loss that may arise thereon, as further time must elapse before the value of the securities and estates affecting it can be ascertained. In accordance with the wish expressed at the last meeting, the directors have increased their board by the election, subject to confirmation by the shareholders, of Christopher Atkinson, Esq., of Liverpool, and Matthew Hutton Chaytor, Esq., of London.

BALANCE SHEET, 30th June, 1865.

BANK OF AUSTRALASIA.

Annexed is the statement of the directors to the proprietors at the half-yearly meeting held at the office of the corporation, August 28, 1865:—

In conformity with the practice which has now been established some years, the directors have invited the attendance of the shareholders for the purpose of announcing a dividend, and of informing them that in the interval that has elapsed since their last report, the progress of the bank has been steady and satisfactory. It must be borne in mind that within the last few years the number of local banks in the Australian colonies has greatly increased, and that banking operations there are now carried on in the face of active competition in all quarters. The position of the bank is, however, fully maintained, and there is every reason to look confidently to the future. The business in New Zealand is becoming important, and the result for the half-year ending in April last is as good as was anticipated. The seat of government having been transferred from Auckland to Wellington, it has become necessary to open a branch at the latter place, for which the sanction of the court has been already given. The dividend and bonus will be payable on the 17th of October next, and will be at the rate of 14 per cent. per annum, free of income tax, that is to say, 2*l* 16s on each old share, and 2*l* 2s on each new share. Henceforward the old and new shares will stand on the same footing in regard to dividend and bonus, and all distinction between them will cease.

BANK OF BRITISH NORTH AMERICA.

At their twenty-ninth yearly general meeting, on June 6, 1865, the directors presented the annexed report to the shareholders:—

Your directors have pleasure in reporting that the increase of profit noticed in the report presented to the proprietors in December last, as exhibited in the returns received from the branches up to that time, was maintained throughout the year, and that the result of the business of the bank for 1864 is of a more satisfactory character than for some years past, notwithstanding that Canada has again suffered from a deficient harvest and from unremunerative prices in the United Kingdom for most kinds of produce. The business of the branches in Nova Scotia and New Brunswick has been on the whole of a satisfactory character; while the agency at New York, although having to contend with great difficulties, owing to the derangement of the American currency, has produced more favourable results than for several previous years. On the Pacific coast the business of the bank continues to make good progress, and your directors have been encouraged to extend their operations in that quarter, and have taken steps to open a branch at Cariboo, the seat of the principal mines in British Columbia. This branch, it is expected, will be of great use to the business of the Victoria branch, as well as a source of direct profit to the bank. From the annexed statement of accounts it will be seen that, after providing for all bad and doubtful debts, the net profit of the bank for the year 1864 amounted to 72,569*l* 16s 3d, and the rest or balance of undivided profit amounted on 31st December, 1864, to 132,593*l* 19s 1d, after providing for the dividend that was paid on the 5th January last.

BANK OF BRITISH COLUMBIA.

At the general meeting held at the London Tavern, on October 3, 1865, the annexed statement was read:—

The directors have the pleasure to submit to the proprietors the accompanying statement of accounts, for the half-year ended June 30 last, and have satisfaction in stating, that after paying all charges, deducting rebate of interest on bills not due, and making ample provision for bad and doubtful debts, the undivided profits amount to 20,078*l* 13s 8d, which the directors propose to appropriate as follows, viz.:—9,375*l* in payment of a dividend at the rate of 10 per cent. per annum; 7,000*l* to reserve fund, which will then amount to 20,000*l*; leaving 3,703*l* 13s 8d to be carried forward to the current half-year.

BANK OF EGYPT.

The following report was presented to an extraordinary general meeting of shareholders, held July 28, 1865:—

The directors have the pleasure to lay before the shareholders the annexed statement of accounts for the half-year which ended on the 30th June last, by which it will be seen that the net profits, including a balance of 4,819*l* 6s 5d brought forward from the previous half year, amount to 16,966*l* 18s 3d. This enables the directors to recommend a dividend for the half-year, as on the last occasion, at the rate of 10 per cent. per annum (12,500*l*) free of income tax, leaving 4,466*l* 18s 3d to be carried forward to the next account.

BALANCE SHEET, June 30, 1865.

BANK OF ENGLAND.

A general court of the proprietors in this corporation was held in the bank parlour on the 14th September, under the presidency of Henry Lancelot Holland, Esq., the governor. The secretary having read the minutes of the former meeting,

The Governor said that he had to acquaint the court that this was one of the quarterly general courts appointed by the charter, and that it was one of the half-yearly general courts appointed the 12th bye-law for the making of dividends; that the net profits for the half-year ending the 31st of August last were 704,269*l* 4s 6d, making the amount of the rest on that day 3,733,945*l* 3s 1d, and that after providing a dividend at the rate of 5 per cent., the rest would remain at 3,006,295*l* 3s 1d. The court, therefore, would be asked to adopt the recommendation for a dividend at the rate of 5 per cent. upon and after the 10th of October next, without deduction for income tax. The Governor said that no doubt the proprietors were prepared for the announcement of a smaller dividend than the previous one, but, taking into consideration all matters, he thought they would agree with him that there was great reason to be satisfied, and therefore there would be no dissentient voice to the resolution proposing to pay that dividend. He then formally moved that the dividend at the rate of 5 per cent. be declared, and stated that the warrants would be ready on the 11th October next.

Upon the motion that the court be adjourned, Mr Moxon wished to ask one or two questions. Last year he asked the directors whether they intended to allow the payment of interest on deposits, and the answer given was that the court had taken

Digitized by Google

the matter into consideration, but had not made up their minds upon the subject. He now repeated the question. Another point was one of great importance, and that was as to the state of the debenture debt, in which the bank was alleged, out of doors, to be largely affected with railway companies. One of the directors of the Bank of England had taken the trouble to write to the newspapers upon the debentures of the Great Eastern Railway Company, and he wished to know whether the Bank of England were large holders of that company's debentures. He was anxious to know this, as in the next session of parliament some action might be taken upon the subject. It was asserted that the Bank of England held debentures in different railway companies to the extent of between 8,000,000*l* and 9,000,000*l*, and in the interest of the proprietors and the public generally he wished to know whether such was the case. Whether the question was answered or not, he hoped that the matter would receive due attention at the hands of the court of directors at a future period.

The Governor said that with regard to the first question he thought the hon. proprietor had misunderstood the answer of the late governor. The subject of interest on deposits was every now and then pressed on the directors. But that was a question much wider and larger than at first sight appeared. No person could say what changes might take place, but at present the directors were of opinion that it was not the interest of the bank to allow interest on deposits. The second question was a very proper one, and the attention of the directors had been called to it. Though they had not held anything like the amount of debentures mentioned by the hon. gentleman, they held a considerable amount, something like 4,000,000*l*. But they had the pick of the railway debentures, and had not only good security but the respectability of the directors and of the management generally.

Mr Moxon asked what amount of Great Eastern debentures was held.

The Governor said they did not hold any great amount of the Great Eastern. There were fifteen or sixteen railways whose debentures they held, but the amount of any one was not very large. In this, as in other instances, by consulting their own interest they were doing all that could be required of them for the defence of the public. The House of Commons might take some action in the spring, and it was a matter more for that body than the Bank of England.

Mr Moxon referred to the case of the West Hartlepool to show the danger of these securities.

The dividend was then agreed to.

On the motion of Mr Cave, seconded by Mr Betley, a vote of thanks was passed to the governor and directors.

BANK OF LONDON.

At the nineteenth general meeting of the shareholders, held at the London Tavern, Bishopsgate street, on July 21, 1865, Sir John Villiers Shelley, Bart., in the chair, after authentication of the register of shareholders, by affixing the common seal of the company, the following report was read by the secretary :—

The statement of accounts, which the directors now submit, shows that the balance of profit at the termination of the past half-year amounts to 66,547*l* 11s 4d. This result, after providing for current expenses, bad and doubtful debts, and rebate of interest on bills discounted not yet due, enables the directors to declare a dividend at the usual rate of 10*l* per cent. per annum, and a bonus of 2*l* 10s per share, amounting together to 20 per cent. per annum, both free of income tax. The balance, viz., 2,324*l* 5s 2d, is transferred to the reserve fund, which, by such addition, is increased to 362,324*l* 5s 2d.

BANK OF NEW SOUTH WALES.

The half-yearly general meeting of the shareholders of the Bank of New South Wales was held in Sydney on April 26 last, the Hon. G. Allen, M.L.C., in the chair, when the secretary read the following report and balance sheet :—

The directors have the pleasure to report a steady progress in the business of the bank during the past half-year, and to submit herewith a statement of its assets and liabilities on the 31st ult.

		£	s	d
The net profits for that period, after deducting rebate on current bills, interest on deposits, providing for bad and doubtful debts, and reducing valuation of bank premises and office furniture, amount to..		86,551	8	10
To which is to be added—recoveries from debts previously written off as bad or doubtful		1,413	11	1
Undivided balance from last half-year		2,809	19	7
Giving for distribution		90,844	19	6
Which the directors appropriate as follows :—				
Payment of dividend at the rate of 15 per cent. per annum—On old stock for 6 months	£69,846 0 0			
On new do. for 5 do.	2,800 0 0			
	72,646 0 0			
Bonus at the rate of 3 per cent. per annum on capital paid up	14,529 4 0			
Balance carried to profit and loss "new account"	3,669 15 6			
		90,844	19	6

By the final payment, due this day, on account of the new capital, the bank stock account will be increased to 1,000,000*l*, and the reserve fund to 333,333*l* 6s 8d, the limits fixed by the act of incorporation and the deed of settlement. During the past half-year new branches of the bank have been established in this colony at Gundagal and Wagga Wagga. Since the last half-yearly meeting the bank has sustained a loss in the death of its late general manager, Mr Robert Woodhouse, in recognition of whose long and faithful services the directors have presented to his widow the sum of one thousand pounds. The vacancy created at the board by the resignation of Mr James Henderson, on his departure for England in February last, was temporarily filled by the appointment of Mr Joseph Scaife Willis, who now offers himself for election, and is the only candidate.

BANK OF NEW ZEALAND.

At the half-yearly general meeting of the proprietors, held at the banking house, Auckland, on April 28, 1865, the following report was read :—

The directors have much satisfaction in again laying before the proprietors the result of another half-year's operations, which affords very practical evidence of the continued success of the bank. The state of business throughout the colony during the past six months, combined with the dearness of money in England, has led to increased caution throughout the establishment; and the directors are glad to be able to assure the proprietors that every doubtful dependency has been provided for, and a margin allowed for prospective losses. It is in contemplation to initiate within the bank, on 1st January, 1866, a guarantee and provident fund for the officers of the establishment, to which the directors recommend the bank should now contribute 1,500*l* as a free donation; and that this amount be supplemented hereafter by further donations of 500*l* each for the next three succeeding half-years. The net profit for the half-year ended 31st March

Digitized by Google

after providing for all debts supposed to be bad or doubtful, and making a liberal reduction in bank premises and furniture accounts, amounts to 50,668*l* 15s 10d; to which is to be added undivided balance from last half-year, 2,207*l* 18s 9d; making a total available for division of 52,876*l* 14s 7d. Of the above profits the directors recommend the following appropriation:—To payment of dividend at the rate of 10 per cent. per annum, 22,456*l* 10s 2d; to bonus equal to 5 per cent. per annum, 11,228*l* 5s; to addition to reserve fund, 15,000*l*; to donation towards starting guarantee and provident fund, 1,500*l*; to balance carried to profit and loss new account, 2,691*l* 19s 5d—52,876*l* 14s 7d.

BANK OF OTAGO, LIMITED.

The following is the second report, presented to the shareholders at the ordinary general meeting, held at the London Tavern, on July 24, 1865:—

The directors, in submitting to the shareholders the annexed statement of accounts for the year ending 31st March last, have the pleasure to announce that the hopes expressed in their circular of 5th January last have been realised. The bank has received numerous offers of business, a portion only of which, however, it was deemed proper to accept, and the directors are happy to state that the business is in a very satisfactory position, there being every prospect of a continuance in its increase from the growing confidence of the public. A branch has been established at Queensland, which is the centre of a promising gold field, and it is hoped that this step will be attended with advantageous results. The shareholders are already aware of the large amount of the capital locked up in advances to the Southland Provincial Government upon their debentures. The agent of that Government, in London, and the directors, are empowered to offer the debentures at such a price as will ensure a sale; but it has not been considered advisable to bring them forward at present, because there is now good reason to believe that their value will soon be enhanced by the guarantee of the General Government of New Zealand. Unfortunately for the bank, the crisis so long prevailing in the money market, in London, during 1864, rendered it necessary to pay a high rate of interest for the advances absolutely required here in consequence of that loan; and this accounts for the heavy item of 6,145*l* 5s 11d paid for interest, as stated in the accounts now presented. The gross profits for the year, after allowing for bad and doubtful debts, amount to 29,490*l* 4s 8d from which it is necessary to deduct 1,080*l* 0s 10d the balance carried from last account, 13,623*l* 10s for the expenses of management in London and New Zealand, and 6,145*l* 5s 11d for interest paid for money during the high rates ruling in 1864, leaving a net profit of 8,641*l* 7s 11d, which the directors recommend shall be appropriated as follows, viz.:—500*l* in reduction of preliminary expenses, 600*l* in payment of travelling expenses to New Zealand, and 7,334*l* 15s 11d towards a dividend at the rate of 5 per cent. on the capital called up to 31st December last, free of income tax, and that the remainder 206*l* 12s be carried forward to profit and loss new account.

BANK OF QUEENSLAND, LIMITED.

At the fourth ordinary general meeting of the shareholders, held on October 18, 1865, the following report was read:—

The directors have pleasure in reporting to the shareholders the result of the bank's operations for the half-year ended June 30, 1865. In the accompanying accounts it will be noticed that the balance of undivided profit amounts to 12,381*l* 17s 7d, or about 12 per cent. per annum on the paid-up capital. The directors propose to appropriate this balance of profit as follows:—1,500*l* to be added to reserve fund; 688*l* 10s 4d to be written off preliminary expense account; 2,861*l* 5s 3d to be carried to next half-year, being rebate on bills discounted current at June 30, 1865; 6,261*l* in payment of a dividend of 15s per share, equal to 6 per cent. per annum; 130*l* 8s 9d in payment of income tax on the dividend; and the balance of 940*l* 13s 3d to be carried forward to profit and loss new account. It is gratifying to the directors to be able to present this report, which must be satisfactory to the shareholders. The gross earnings, after paying interest on deposits, and providing for bad and doubtful debts, it will be noticed, are large, amounting to upwards of 17 per cent. per annum on the capital paid up. Deposits and circulation have increased 41 and 40 per cent. respectively, and the number of new accounts opened has been 220, an increase in the half-year of 60 per cent. A large and lucrative business has now been established by the bank, which, it is confidently anticipated, will yet be still largely increased, and there is, therefore, every encouragement to expect that the operations in future half-years will continue to show equally satisfactory results. The colony is still prospering; the pastoral interests will be much enhanced by the facilities which the railways now under construction will afford in moving the wool and other station produce to market and to the seaboard. The gold fields are being gradually developed, and the precious metal now forms an important item in the list of exports. The number of public works in progress, and the great demand for labour, together with a continual immigration, keep up an increasing trade and an active demand for money and banking accommodation.

BIRMINGHAM TOWN AND DISTRICT BANKING COMPANY.

The twenty-ninth annual general meeting of the proprietors

Digitized by Google

of this bank was held at the Queen's hotel, on August 8; Edwin Gwyther, Esq., in the chair. The following report was read:—

The directors of the Town and District Bank have called the shareholders together to submit their twenty-ninth annual report, showing the operations of the bank for the past year ending June 30. The directors, upon a careful examination of the accounts, have the satisfaction to state that, after writing off from the gross profit a sufficient sum to cover bad debts, and paying income tax and all charges connected with the working of the business, there remains a net profit of 24,157*l* 0s 8d, being more than 20 per cent. on the paid-up capital of the company; to this amount must be added the sum of 2,376*l* 15s 7d, being the amount carried from the undivided profits of the former year, and also the sum of 8,435*l*, arising from premiums on shares allotted to various applicants who promised to exercise their influence in favour of the bank. The above amounts make a gross total of 34,968*l* 16s 3d, and the directors are of opinion that it will conduce to the interest of the bank to carry a large sum to the guarantee fund, and to pay a dividend for the last half-year of 9s per share, free of income tax, which, with the dividend of 9s and bonus of 3s per share, paid in March last, will make 21s per share on the year's trading. Should the dividend, as now recommended, be adopted by the shareholders, the distribution of the gross amount of 34,968*l* 16s 3d will be as follows:—Half-year's dividend at 9s per share, paid in March last, 8,586*l*; bonus of 3s per share, paid in March last, 2,862*l*; dividend proposed to be paid, on or after 1st September, of 9s per share, 8,671*l* 10s; building fund, 100*l*; guarantee fund from premiums on shares, 8,435*l*; ditto from profits of the present year, 1,565*l*, 10,000*l*; balance to next year's profit and loss account, 4,749*l* 6s 3d—total, 34,968*l* 16s 3d. The guarantee fund, which stood last year at 66,500*l*, will, by the proposed addition of 10,000*l*, amount to 76,500*l*. It is with feelings of deep regret that your directors have to announce the resignation of their late manager, Mr Bassett Smith, who for nearly thirty years, with untiring energy and great ability, conducted the business of the bank; and, as a mark of their high estimation in which his exertions are held, your directors recommend that a pension of 600*l* per annum be paid to him during the remainder of his life. His advanced age was the only reason which induced him to relinquish the post which he so long and ably filled. The directors have, however, the satisfaction to announce that Mr Smith has consented to take a seat at the board as a supernumerary director. The directors, after a careful consideration of the testimonials submitted by a large number of candidates for the vacant managership, came to the unanimous opinion that those sent by Mr Thomas Barney, of the Stamford, Spalding, and Boston bank, and previously of the London and Westminster bank, were the most satisfactory; therefore they proceeded at once to confer the appointment on him. The directors have much pleasure in stating that, from the experience they have already had of Mr Barney's qualifications, they are convinced that he is eminently adapted for the managership of the bank.

BRITISH LINEN COMPANY BANK.

At the general meeting of the proprietors of this company, held at Edinburgh, June 19, 1865, the following abstract of the balance sheet of the books at April 15, 1865, was submitted, along with the reports of the directors:—

LIABILITIES.	£	s	d
Deposits	6,886,894	7	6
Acceptances by the company and their London correspondents, and letters of credit outstanding	276,500	16	6
Notes in circulation	442,343	0	0
	7,605,738	4	0
Capital	1,000,000	0	0
Reserved fund or rest	300,000	0	0
Net profit of the year to April 15, 1865, after fully providing for bad and doubtful debts	151,642	9	7
	9,057,380	13	7

ASSETS.	£	s	d
Advanced on cash and credit accounts	2,142,032	15	10
Bills under discount	3,784,931	7	6
Bank premises at Edinburgh and the branches	132,977	6	7
Government stocks, short loans in London on Government securities, and on cash balances with London correspondents £1,577,400 4 9			
Stock in the Bank of England, and other stocks, bonds, railway debentures, &c. 992,161 7 7			
Gold and silver coin, notes of the Bank of England, and other banks 426,876 11 4			
	2,996,439	3	8
	9,057,380	13	7

After declaring a dividend for the year of 11 per cent. free of income tax, which absorbs 110,000*l*, the meeting ordered the surplus of 41,642*l* 9s 7d to be applied as follows:—

	£	s	d
1. In reduction of the cost of the bank houses and offices	10,000	0	0
2. In reduction of the cost of their government funds	10,000	0	0
3. To be carried forward to next year's account	21,642	9	7
	41,642	9	7

CALEDONIAN BANKING COMPANY.

At the twenty-sixth annual general meeting of shareholders, held on August 7th, 1865, the annexed report was adopted:—

The directors have much satisfaction in laying before the shareholders the result of another year's operations of the bank. The net profits of the year ending 30th June, after payment of income tax and providing for bad and doubtful debts, amount to 23,185*l* 15s 9d, being an increase upon previous years, caused by the more profitable character of the business during the first half of the year just terminated, and also by the realisation of some of the bank's securities at an enhanced value. The balance of profit brought forward from last year is 765*l* 16s 11d, making the total sum now falling to be disposed of, 23,951*l* 12s 8d, which the directors propose to appropriate as follows, viz.:—12,500*l* in payment of a dividend, at the rate of 10 per cent. per annum, without deduction of income tax; 9,000*l* for addition to the bank's surplus or guarantee fund, thereby increasing it to 38,000*l*; 750*l* for the usual annual instalment in reduction of the cost of the bank's houses; 1,701*l* 12s 8d balance to be carried to next year's account of profit and loss; total, 23,951*l* 12s 8d. The directors recommend that the dividend should be raised to 10 per cent., and they feel assured the shareholders will agree with them in thinking the increased rate of dividend is justified by the present position and prospects of the bank. The directors have to report that they have contracted for suitable premises for the branches at Grantown and Bonar-Bridge.

CARLISLE CITY AND DISTRICT BANK.

The directors of this bank have declared a dividend of 1*l* 2s 6d per share, for the half-year ending 30th June, 1865, being equal to 18s per cent. per annum. The profits for the half-year, after payment of expenses, amount to 6,978*l* 17s 2d, being at the rate of 24*l* 1s 3d per cent. per annum. After paying the above dividend, and 480*l* for alterations, safes, and furniture at the two new branch offices, there will remain in the auxiliary fund a sum of 3,653*l* 15s 6d. The guarantee fund now stands at 28,000*l*. Annexed is an abstract of the balance sheet of the company for half-year ending 30th June, 1865.

CENTRAL BANK OF WESTERN INDIA.

At an ordinary general meeting of the shareholders in this bank, Mr Cursetjee Nuserwanjee Cama, Esq., in the chair, the chairman read the following report, which was afterwards translated into Guzerathi for the information of the shareholders present:—

The directors have to report for the year ending Dec. 31, 1864, after writing off all expenses at head office and branches, and including rebates on undue bills, the total net profit amounted to

Digitized by Google

8,20,390-9-10 rs, to which has to be added 7,001-12-7 rs, being the unappropriated balance brought forward from the year 1863. Out of this sum a dividend of 10 per cent. was paid upon the old and new shares for the half-year ending June 30, 1864, which, together with the income tax on last year's profit, amounted to 4,14,057-1-2 rs. After deducting this sum, and the further charge for income tax on the half-year's earnings ending Dec. 31, 1865, there remains an undivided balance of 402,780-11-0 rs out of the net profits of that year; which sum the directors propose to carry forward to the present year without making a dividend. There are two vacancies in the directory to be filled up in the place of Venayekrow Juggonnathjee and Vurjurondass Madowdass, Esqs. Of these gentlemen, Mr Venayekrow offers himself, and is eligible for re-election.

CITY BANK, LONDON.

At a general meeting of the shareholders, held at the London Tavern, on Tuesday, 18th July, 1865, the following report was read by the secretary, viz.:—

The directors beg to submit to the shareholders the annexed statement of accounts to the 30th June, showing a gross profit for the six months (including the amount brought forward from the previous half-year) of 65,315*l* 9s. This result enables the directors—after defraying the current expenses, providing for bad and doubtful debts, and allowing rebate of interest on bills discounted not yet due—to declare the usual dividend of 6*l* per cent. per annum on 500,000*l*, the paid-up capital, and a bonus of 2*l* 5s per share on 10,000 shares, together equal to 15 per cent. per annum; and to carry forward 1,293*l* 13s 3d to the new profit and loss account. It is with deep regret the directors have to announce that, from circumstances which have recently transpired, Mr Peter Bell has deemed it necessary to tender his resignation as a director of this institution; they cannot, however, allow this opportunity to pass without acknowledging the important services rendered by him to the bank from its formation, and the high honour which has invariably characterised his relations with it. The business of the Bond street branch continues to afford highly satisfactory results. The dividend was then declared, for the period ending 30th June last, at and after the rate of 6*l* per cent. per annum on the paid-up capital, and a bonus of 2*l* 5s per share both free of income tax. It was resolved unanimously, that the report now read be received and adopted.

CITY OF GLASGOW BANK.

At the annual meeting of the shareholders, held July 5, 1865, the following report was presented and adopted:—

The directors have pleasure in submitting to the shareholders their annual report on the results of the last year's business, along with the usual abstract balance sheet of the bank's affairs, made up to the 7th June last. It affords them much satisfaction to be able to report that the business of the past year has been highly prosperous; that the deposits have largely increased both at the head office and branches; and that the future prospects of the bank are encouraging and satisfactory.

	£	s	d
At the last annual balance, the reserve fund, or undivided profits of the bank, amounted to	135,000	0	0
The balance at the credit of the profit and loss account, brought forward from last year, amounts to £10,038 3 9			
Less income tax on dividends paid in accordance with the resolution of last annual meeting 1,155 11 6			
Leaving the sum brought forward	8,852 12 3		
The balance at the credit of profit and loss account for the year ending 7th June last, amounts to	91,852 18 11		
	100,735	11	2
Making a total of	235,735	11	2
From which the directors recommend that a dividend at the rate of 7 per cent. per annum, free of income tax, be declared, payable 1st August and 1st February, amounting to	60,900	0	0
Leaving a balance of	174,835	11	2
The directors now propose to add 25,000*l* to the reserve fund, thereby making up the amount to £160,000 0 0			
To apply to the credit of property account, in reduction of the cost of bank buildings 5,000 0 0			
And to carry forward at the credit of profit and loss account to next year 9,835 11 2			
	174,835	11	2

CLYDESDALE BANKING COMPANY.

At the twenty-seventh annual general meeting of the partners, held on July 12, 1865, the following report of the directors was read:—

In terms of the contract of co-partnery, the directors have now to submit to the partners the annual statement of the affairs of the bank for the year ending June 14 last. The period in question has been one of more than usual anxiety in banking affairs, arising from the great fluctuations in the value of money, as well as of goods and produce, and the mercantile failures consequent thereon. Although the rate of discount for the last three months has been low, the average of the twelve months has exceeded that of late years, and the profits of banking have been very satisfactory. After making ample allowance for all bad and doubtful debts, the balance of profit and loss account for the year amounts to 112,150*l* 17s 11d; the balance brought forward from the previous year was 9,507*l* 14s 8d—together, 121,658*l* 12s 7d, which is now at the disposal of the partners. Representations have been made to the directors, that the period fixed by the contract for the annual balance of the books of the bank, viz., the 2nd Wednesday of June, is inconvenient in many respects, and that it would be desirable if the balance day were altered to the 31st December, a period when many of the

Digitized by Google

customers and nearly all the correspondents of the bank close their accounts. The directors concur in these views and a motion to carry the change into effect, with other necessary alterations in the contract, will now be submitted to the meeting. Should this motion be approved of, it will be necessary, in terms of the contract, to call a special meeting of the partners, to consider the proposed alteration, and a meeting for the purpose will accordingly be convened for Wednesday, the 16th day of August next. In anticipation of the proposed change in the balance day being adopted, the directors in the meantime recommend that out of the last year's profits a half-year's dividend, at the same rate as last year (viz., 9 per cent. per annum), and amounting to 40,500*l*, be paid to the partners (under deduction of income tax), on Wednesday, the 16th August next. That 15,000*l* be added to the reserved surplus fund, which will then amount to 235,000*l*, and 5,000*l* written off the cost of bank buildings; and that the balance of 61,158*l* 12s 7d shall be carried forward, and with the profits which shall accrue between the 14th June and 31st December, 1865, be placed at the disposal of the partners, at the meeting to be called for Wednesday, the 7th February, 1866, when a whole year's dividend will be declared.

COLONIAL BANK.

At the fifty-fifth half-yearly general meeting, held at the London Tavern, on July 5, 1865, the following report was received:—

Pursuant to the provisions of the charter, the directors present to the proprietors the following statement of the debts and assets of the corporation, on December 31, 1864, and of the net profit of the half-year terminating at that date:—

Debts.	£	s	d
Circulation	251,491	10	10
Deposits, bills payable, and other liabilities	1,905,707	1	9
Paid-up capital	500,000	0	0
Reserved fund	125,000	0	0
Balance of profit from last half-year	405	19	11
Net profit for the half-year	39,638	2	4
	2,822,242	14	10

Assets.	£	s	d
Specie	362,456	18	9
Due to the bank in the colonies, on bills discounted and purchased, including those past due, &c.	1,266,906	11	0
Due to the bank in the colonies on current accounts	28,026	10	3
Due to the bank in London on bills remitted, cash at bankers, &c. ...	1,154,921	14	10
Bank premises and furniture in London and the colonies	9,931	0	0
	2,822,242	14	10

The directors have the pleasure to report that at the latest dates in their possession from the branches, the business of the bank was proceeding very satisfactorily. They, therefore, feel warranted in again recommending that out of the net profit, which amounts, as per above statement, after providing for all bad and doubtful debts, and for income tax, to 39,638*l* 2s 4d; an ordinary dividend be made of 6 per cent. for the half-year ending December 31, 1864, being at the rate of 12 per cent. per annum on the paid-up capital of the corporation, which will require 30,000*l*, and an extraordinary dividend of 1 per cent., which will require 5,000*l*, leaving 4,638*l* 2s 4d; to which add balance brought forward from last half-year 405*l* 19s 11d, together 5,044*l* 2s 3d. From this amount the directors propose to carry to the reserve fund 4,000*l*, increased into 129,000*l*, and the balance of 1,044*l* 2s 3d carried forward to the next half-year.

COMMERCIAL BANKING COMPANY OF SYDNEY.

At a general meeting of the shareholders, held at the banking house, George street, Sydney, on July 25th, 1865, the following report was presented:—

The directors have now the pleasure to submit to the proprietors the following statement of the position of the bank on 30th June last. The net profits for the half-year, after deducting rebate upon current bills, all expenses of management, provision for bad or doubtful debts, &c., &c., including undivided balance from previous half-year, amount to 38,079*l* 7s, which the directors have decided to appropriate as follows:—To dividend for half-year at the rate of 15 per cent. per annum, 30,000*l*; bonus of 5s per share, 4,000*l*; balance undivided profit carried to next half-year's account, 4,079*l* 7s; total, 38,079*l* 7s. During the half-year suburban branches have been opened at Balmain and Newtown, and branches at the townships of Dubbo and Bourke in the colony of New South Wales.

CONSOLIDATED BANK, LIMITED.

The annexed report was presented to the proprietors at the half-yearly meeting, held in Manchester, July 26, 1865:—

The directors beg to lay before the proprietors the statement of accounts and balance sheet of the bank for the half-year ending June 30, 1865.

	£	s	d
After payment of current expenses, interest to customers, income tax, directors' remuneration, and providing for rebate of interest and bad debts, there remains a net profit on the half-year of	59,984	18	5
The unappropriated balance on 31st December, 1864, was	1,827	15	7
Making together a total of	61,812	14	0

available for distribution. With this sum your directors propose to deal as follows:—

		£	s	d
Declare a dividend at the rate of 10 per cent. per annum, and a bonus of 2s per share (being an additional 5 per cent. per annum), free of income tax, requiring	£45,000 0 0			
Carry to reserved fund	10,000 0 0			
Carry forward to next account	6,812 14 0			
		61,812	14	0

With the addition now proposed, and with interest which has been added at the rate of 5 per cent., the reserved fund will stand at 70,065*l* 16s.

CUMBERLAND UNION BANKING COMPANY, LIMITED.

The thirty-sixth ordinary general meeting of this company was held at Carlisle, on August 3; when the following report and balance sheet were submitted:—

The books and accounts have been audited by Messrs Quilter, Ball, and Co., who spent a fortnight in making a most searching investigation, and a copy of the statement of accounts certified by them is annexed hereto. The net balance at the credit of profit and loss account for the year, after writing off all bad debts, amounts to 28,246*l* 0s 9d. An intermediate dividend of 4*l* on the old shares was paid in February last which absorbed 8,000*l*, and a further sum of 4,178*l* 6s 7d is required to pay the interest at 6 per cent. on the new share instalments. After these payments there remains available the sum of 16,067*l* 14s 2d, out of which the directors have the satisfaction of recommending a dividend of 5*l* per share (payable on Monday, August 7), absorb-

Digitized by Google

ing 10,000*l* (making, with the dividend in February, 9*l* per share on the old shares), and they propose that 6,000*l* be appropriated to form a contingent fund to meet existing doubtful debts, and the balance of 67*l* 14s 2d to be carried forward to the current half-year's account. The directors are glad to be able to congratulate the shareholders upon the results of the important steps authorised to be taken by the extraordinary meeting in December last, by which the old-established business of Messrs J. M. Head and Co. was acquired, the liability of the shareholders defined, and the co-operation and assistance of gentlemen of wealth and standing in the county thereby secured as shareholders and directors. The demand for shares so greatly exceeded the number at the disposal of the directors for allotment, that in a majority of cases the applications had to be curtailed, and many altogether declined. The calls have been paid up with a punctuality almost unexampled, and, as the accounts show, the small amount unpaid at the date of the last call on 30th June has since been received. It is worthy of remark too, that this large sum of additional capital and premiums (upwards of 220,000*l*) has been received with scarcely any perceptible diminution in the amount of deposits or credit balances.

GENERAL BALANCE—June 30, 1865.

The report was unanimously adopted.

EASTERN EXCHANGE BANK, LIMITED.

The following report was presented to the proprietors, at their ordinary meeting, held at the bank, 14 Cook street, Liverpool, August 14, 1865 :—

The directors have the pleasure to lay before the proprietors an audited statement of accounts to the 30th June, 1865, showing a balance of net profit of 6,600*l* 11s 4d, which they propose to carry forward to next account. It will be seen that the gross profit for the half-year, 13,876*l* 1s, is at the rate of 14 per cent. per annum. In framing the account, it has been necessary on this occasion (owing to the temporary absence of constituents from Egypt, in consequence of the epidemic lately raging there), to include commissions to the extent of 4,000*l*, earned in Alexandria, based on the manager's estimate, who represents that the actual sum is over rather than under the amount stated. Although the time during which the bank has been in full operation in Alexandria does not exceed four months, in consequence of the cessation of business during the crisis in the early part of the year, the directors are satisfied that its foundation has been successfully laid. This has been done at moderate cost, and without payment for good-will. The business transacted has been free from bad debts, if they except one dependency, now in course of liquidation, on which it is possible they may sustain a loss of from 1,000*l* to 1,500*l*. There are, however, circumstances which induce them to hope for a more favourable out-turn.

EAST LONDON BANK, LIMITED.

Annexed is the third report of the directors of this bank for the half-year ending June 30, 1865 :—

The directors in submitting their report congratulate the shareholders on the continued progress and prosperity of the bank. Since the last half-yearly meeting the head office of the bank has been removed to and the business is now carried on at the premises in Cornhill. The profits for the half-year ending June 30, 1865, as shown by the accounts appended to this report, and certified by the auditors, after providing for all bad and doubtful debts, deducting rebate of interest on current bills and writing off an adequate proportion of the amounts standing to the debit of bank premises and preliminary expenses, enable the directors to recommend a dividend at the rate of 5 per cent. per annum, free of income tax. The directors think it right to add, that the number of current accounts, both at head office and at the branches, have been and are steadily increasing, and the amount of money deposited is much larger than heretofore. The directors believe that the undertaking is now recognised in the City of London and elsewere, as one of the solid and matured joint stock banks.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

The following report was read at the twenty-fourth ordinary meeting on July 31, 1865 :—

The accounts of the bank for the half-year ending in the colonies on the 31st March, and in London on the 30th June, of which a summary is annexed, show a balance of profit of 22,538*l* 17s 7d, after making provision for bad and doubtful debts. The directors regret that the necessity has arisen for writing off a further sum to meet loss from failures referred to in the last report, the effect of which is to make the result of the operations for the six months under review less favourable than had been anticipated. They are disposed, however, to regard as exceptional the present reduction in the amount available for distribution, and have confidence in the expectation that the future profits of the bank will admit of an increased dividend being maintained. They, therefore, recommend that out of the balance of 22,538*l* 17s 7d, a dividend be paid at the rate of 7 per cent. per cent. per annum, free of income tax, on 600,000*l*, the paid-up capital of the bank, which will require 21,000*l*; that the

Digitized by Google

premises and furniture accounts be reduced by 1,000*l*, and that 538*l* 17s 7d be brought forward to the current half-year.

ENGLISH AND SWEDISH BANK, LIMITED.

The following is the report of the directors:—

The directors have the pleasure to submit to the shareholders the annexed statement of accounts for the half-year ending June 30 last, duly examined and certified by the auditors. It will be seen that the gross profits for this period, including a sum of 2,224*l* 8s 1d brought forward from the last account, amount to 26,421*l* 17s 6d, which, after paying current expenses and deducting rebate of interest, &c., leaves a balance of 14,156*l* 7s 3d. Out of this the directors, in accordance with the power conferred on them by the articles of association, have the satisfaction of declaring an interim dividend of 8s per share, free of income tax, carrying forward a balance of 6,238*l* 19s 5d to the next account. The directors have reluctantly accepted the resignation of Mr J. A. Hankey as chairman, in consequence of his proposed lengthened absence from England, but he will still retain his seat at the board. Mr William Tottie has been elected his successor in the chairmanship of the bank. The directors much regret that death has deprived them of the valuable services of Mr Wm. Gibson, member of the Gothenburg local board, while at Stockholm they lose the able co-operation of Mr C. D. Arfewdson, whose other business engagements have necessitated a resignation of his seat at the local board. Mr B. Almquist, who had previously held the office of auditor at this branch, has been elected to fill the vacancy. The directors are happy to say that the reports from the branches show that the business of the bank continues steadily to progress, both at Stockholm and Gothenburg.

EUROPEAN BANK, LIMITED.

At an ordinary general meeting, held at the London Tavern, Bishopsgate street, on 7th August, 1865, the following report was read:—

The directors have the pleasure to submit to the proprietors their third half-yearly report, ending 30th June last, which cannot be considered otherwise than satisfactory. It will be perceived from the balance sheet that the gross profits realised, including the sum of 2,271*l* 16s 2d brought forward from last account, amount to 50,446*l* 6s 8d; and that, after defraying expenses of management, directors' remuneration, rebate on bills, and making a full allowance for bad and doubtful debts, a net profit remains of 29,685*l* 6s 9d. The directors recommend that 16,380*l* 15s 9d be applied for the payment of an interim dividend, being at the rate of 5 per cent. per annum, free of income tax, that 3,200*l* be written off premises, purchase, and preliminary expense accounts, and that the balance, 10,104*l* 11s, be carried to profit and loss new account, to be dealt with at the close of the financial year, when the premium accruing from the transfer of the business of the late London, Birmingham, and South Staffordshire bank will also be available. The directors continue to pursue the policy of seeking a sound business, and look with much satisfaction to the steady progress made during the past six months. It is very gratifying to the directors to find themselves in a position to report favourably as regards the branches, all of which have produced profitable results. The directors have to acknowledge many valuable accounts introduced to the bank by shareholders, in answer to an appeal made by the manager at the last meeting, and hope for a continuance of their support.

IMPERIAL BANK, LIMITED.

Annexed is the report of the proceedings of the sixth ordinary general meeting of the shareholders, held at the London Tavern, Bishopsgate street, July 17, 1865:—

The accounts which the directors have now the pleasure of submitting to the shareholders show the result of the operations of the bank during the past half-year to have been very satisfactory. Although considerable commercial depression has existed for some time past, yet the business of the bank continues steady. Notwithstanding the low rate of money which has prevailed during a great portion of the last six months, and that the dividend will have to be paid on 10,500 new shares, which previously only carried interest at the rate of 5 per cent. per annum, your directors are able to recommend a dividend at the rate of 8 per cent. per annum, free of income tax. After payment of the dividend, and all charges of the bank, together with allowance for rebate on bills discounted, bad and doubtful debts, there remains a balance of 6,879*l* 18s 2d, which the directors recommend to be appropriated as follows, viz.:—3,000*l* to the reserve fund, 889*l* 13s 9d to be written off preliminary expenses, and 3,008*l* 4s 5d to be carried to profit and loss new account.

IMPERIAL OTTOMAN BANK.

The following report was presented to the second annual general meeting of shareholders, held at the London Tavern, June 26, 1865 :—

The general committee have the honour to lay before the shareholders their second annual report. The accounts, made up to Dec. 31 last, show a gross profit for the preceding twelve months, after providing for bad and doubtful debts, of 336,992*l*. Under ordinary circumstances, this might be looked upon as a highly satisfactory result, but it is peculiarly so when viewed in connection with the severe depression which has prevailed throughout Turkey ; added to the fall in the price of cotton, and the reaction after excessive speculation. In the nine months previous to the period now under review, a considerable portion of the bank's profit arose from the issue of the Turkish loan of 1863. The balance of this loan, two millions sterling, was issued in 1864, and the bank has derived from it a portion of its present profits. It is, however, most satisfactory to be able to state that to the extension of the bank's ordinary operations, and not to any exceptional resources, the favourable nature of the balance sheet is mainly due. The profits arising from interest, discounts, and commercial business, have increased more than 30 per cent. during the second year of the bank's existence. There is no reason why these branches of the business should not continue to increase, though much care is required in the selection of bills fulfilling the conditions of security necessary for a bank, and especially of a bank of issue. The bank has faithfully and liberally performed its duties to the imperial government, and the amount of its transactions with the government have considerably increased. During the past year agencies have been established at Salonica, Magnesia, Larnaca (Cyprus), Afioum-Kara-Hissar, and Aidin, at all of which the bank receives revenues on account of the government, and transmits them to Constantinople on terms much less onerous than those to which the government was formerly obliged to submit. There is reason to anticipate a considerable increase of business at these various agencies. After deducting from the net profit the interest paid on account in January last, the addition to the reserve fund, and the percentages provided by the statutes, there remains a balance of 135,817*l* 5s 8d. The committee propose a dividend of 1*l* per share, which, together with the 10s paid in January last, makes a total dvidend at the rate of 15 per cent. for the year, and will leave 817*l* 5s 8d to be carried forward to the next account.—The report was adopted and the dividend declared at the proposed rate.

LONDON BANK OF MEXICO AND SOUTH AMERICA, LIMITED.

At the ordinary general meeting, held at the London Tavern, Bishopsgate street, on September 19, 1865, the following report and balance sheet was unanimously adopted :—

In compliance with the request expressed by the shareholders at the last general meeting, to effect that such meeting should in future be held half-yearly, the directors have pleasure in calling them together on the present occasion, for the purpose of submitting the subjoined statement of accounts, duly vouched by the auditors, and of declaring an interim dividend. From these accounts it will be seen, that for the six months ending June 30 last, the business of the bank at its several branches has made very satisfactory progress ; the net profits, after deducting rebate of interest, current expenses, and providing for bad and doubtful debts, amounting to 22,884*l* 17s 1d, or about 20 per cent. per annum on the paid-up capital of the bank, which, with the sum of 1,964*l* 2s brought forward from last account, makes an available total of 24,848*l* 19s 1d. This sum the directors recommend should be dealt with as follows :—To the payment of an interim dividend for the half-year ending June 30, of ten shillings per share, being at the rate of about 9 per cent. per annum, 9,992*l* ; leaving a balance to be carried forward to the next account, 14,856*l* 19s 1d ; subject to payment of remuneration to directors and auditors, and income tax. The directors have only further to add, that latest accounts are equally favorable, and furnish continued evidence that in Mexico, Lima, Callao, and Bogota, where the branches of this bank are established, there is a great field for the profitable employment of large capital in banking operations.

BALANCE SHEET—June 30, 1865.

LONDON CHARTERED BANK OF AUSTRALIA.

At the thirteenth ordinary general meeting of the proprietors, held at the London Tavern, on June 2, 1865, the following report was submitted :—

In accordance with the terms of the charter of incorporation and deed of settlement of the company, the directors now submit to the proprietors their thirteenth annual report, accompanied by the accounts, duly audited, and showing the position of the bank's affairs to the 31st December, 1864. It is gratifying to the court to be able to state that the general results of the past year's operations have been successful. From the accounts appended to this report, it appears that the divisible profits are somewhat in excess of last year, a fact which the proprietors will learn with satisfaction, viewing the depressed state of trade which has existed in the Australian colonies, as well as the severe competion this bank has had to contend with. The latest advices from the colonies extend to the 25th March last, and speak in favourable terms of the position and prospects of the bank. The inspector, Mr Bramwell, arrived in Melbourne and resumed the management of the bank's affairs in February last. The accounts for the past year are annexed to this report, being made up, as customary, to the 31st December last. On reference to them it appears that after the usual deductions, and also after making allowance for bad and doubtful debts, there remains to the credit of profit and loss the sum of 53,436*l* 14s 9d, out of which the directors recommend that a dividend be declared for the half-year of 4 per cent., free of income tax, 40,000*l*, and they further recommend that a sum of 5,000*l* be placed to the reserve fund, which will then amount to 90,000*l*, leaving to be carried to next account a balance of 8,436*l* 14s 9d.

LONDON AND COUNTY BANKING COMPANY.

At the half-yearly meeting of the proprietors, held on August 3, 1865, at the London Tavern, Bishopsgate street, the following report for the half-year ending June 30, was read by the secretary :—

The directors have the pleasure to submit to the proprietors the balance sheet of the bank for the half-year ending June 30 last. They have also to report that, after payment of all charges, interest to customers, and making ample provision for bad and doubtful debts, the net profits amount to 106,821*l* 3s 1d, which, added to 18,629*l* 12s 3d brought forward from the last account, makes a total of 125,450*l* 15s 4d for appropriation. The directors have accordingly declared the usual dividend of 6 per cent., with a bonus of 9 per cent., making together 15 per cent. for the half-year, which will amount to 111,790*l* 8s 4d, and leave 13,660*l* 7s to be carried forward to profit and loss new account. They regret to announce the decease of their esteemed colleague Edward Huggins, Esq., and have to report that Edward John Hutchins, Esq., has been elected a director in his stead.

LONDON JOINT STOCK BANK.

At a general meeting of the shareholders, held at the banking house of the company, in Princes street, Mansion house, July 20, 1865, the following report was unanimously adopted :—

The accounts which the directors have now the pleasure of submitting to the shareholders show that the net profits of the bank for the half-year ending the 30th ultimo, amount to 123,125*l* 15s 3d. This result enables the directors to declare a dividend at the rate of 12½ per centum per annum, and a bonus of 8s 3d per share, together 1*l* 7s per share, equivalent to 18 per cent. per annum on the paid-up capital of the bank, now amounting to 1,080,000*l*, and to carry forward a balance of 25,925*l* 15s 3d for dividend at the end of the year. In conformity with a resolution passed at the general meeting in January last, the Consols and New Three per Cents. have been taken at 90, and the Exchequer bills at par. The difference between these rates and the valuation of those stocks on Dec. 31 last amounts to 7,075*l*, and this sum has been carried to the credit of the guarantee fund, which, with the addition of six months' interest, according to the provisions of the deed of settlement, now amounts to 309,615*l* 7s 9d. It is with deep regret that the directors have to announce the death of their much-esteemed colleague, Mr Henry Christy. The directors have to report that, owing to impaired health, Mr Fleming Hewitt has retired from the management of the bank, and the directors consider that, after a zealous and faithful discharge of his duties in various departments during a period of twenty-six years, they have not appreciated those services too highly in awarding him a retiring allowance of 1,000*l* per annum, and which they trust will meet with the full concurrence of the shareholders.—The preceding report having been read by the secretary, a dividend for the half-year ending June 30 last, after the rate of 12½ per cent. per annum, and a further dividend of 8s 3d per share out of the net profits of the half-year ending as above, were declared by the chairman.

LONDON AND SOUTH AFRICAN BANK.

At the half-yearly meeting, held at the London Tavern Nov. 1, 1865, the following report and statement of accounts was adopted:

The directors beg to submit the accounts of the bank for the half-year ending the 30th June last, showing a net profit of 28,920*l* 4s 5d, equal to the rate of 11½ per cent. per annum on the paid-up capital. The accounts thus rendered, convey a faithful statement of the transactions of the bank for the first half of the present year; but towards the expiration of that period, information reached the directors from different points within their sphere of action in South Africa, that extensive commercial failures had taken place, and that others were apprehended, which might entail loss upon this bank in common with other banking establishments in those colonies. They lost no time in despatching their London manager, Mr James, to the Cape, with full power to protect the interests of the bank. He has lately returned, after making such arrangements as seemed to be advisable under existing circumstances. Although the commercial crisis in South Africa has not entirely passed away, measures have been taken so to reduce the liabilities to this bank as its directors feel satisfied will ensure the safety of the capital. Under these circumstances the directors think it their duty to refrain from declaring the usual dividend, while they indulge the hope that it may be in their power to render a more cheering account to their shareholders at the conclusion of the present year.

LONDON AND SOUTH-WESTERN BANK, LIMITED.

The following report was presented to the shareholders at the fourth ordinary general meeting, held at the London Tavern, Bishopsgate street, on July 31, 1865:—

The directors have the pleasure to submit to the proprietors the balance sheet for the half-year ending June 30 last. Notwithstanding the low rates of interest which have prevailed during the past half-year and the consequent decrease of profits, it will be seen from the balance sheet that, after making provision for bad and doubtful debts, the gross profits for the half-year, including the sum of 1,660*l* 13s 4d brought forward from last account, amount to 19,517*l* 12s 3d, and that, after deducting interest paid to customers and all charges for expenses, there remains an available balance of 5,805*l* 2s 8d. The directors recommend that 4,636*l* 13s 4d be appropriated to the payment of a dividend at the rate of 6 per cent. per annum, free of income tax; that 856*l* 11s 7d be set aside on account of rebate of bills not due, and that the balance of 312*l* 4s 2d be carried to profit and loss new account. The directors have to report a large and steady increase of business, and avail themselves of this opportunity to remind the shareholders that by exerting their influence in extending the operations of the bank, and introducing customers, they will largely contribute to its prosperity.

LONDON AND WESTMINSTER BANK.

At the half-yearly meeting held at the bank in Lothbury, July 19, 1865, the following report of the directors was read:—

The directors have to report that, after making provision for all bad and doubtful debts, paying the income tax,—and setting apart 2,000*l* towards the building of the bank,—the net profits of the bank for the last half-year amount to 151,498*l* 7s 8d. This sum, added to 9,357*l* 1s 5d, the unappropriated balance of the preceding half-year, will amount to 160,855*l* 9s 1d. Out of this amount interest on the rest or surplus fund at the rate of 5 per cent. per cent. per annum (8,250*l*) has been added to that fund, which now amounts to 338,250*l*. The directors now declare a dividend to the shareholders at the rate of 6 per cent. per annum, and by way of further dividend out of the profits, a bonus of 10 per cent. on the paid-up capital. After these payments are made, there will remain a balance of 22,605*l* 9s 1d, to be carried to the profit and loss account for the current half-year.

MANCHESTER AND COUNTY BANK, LIMITED.

At the half-yearly ordinary general meeting, held on August 4th, 1865, the annexed report was made to the shareholders:—

The directors beg to submit to the shareholders the balance sheet for the first six months of the present year, being for the period ending 30th June, 1865. After laying aside 7,661*l* 15s 4d for rebate on bills not yet due, and the sum of 10,000*l* as a provision to meet bad and doubtful debts, there remains the sum of 21,762*l* 12s 5d for appropriation at the present time. The directors propose now to pay a dividend at the rate of six per cent. per annum, free of income tax (being at the same rate as the Midsummer dividend of last year), to add 5,000*l* to the reserve fund, which will be thus increased to 30,000*l*, and to carry forward 2,026*l* 18s 5d.

METROPOLITAN AND PROVINCIAL BANK, LIMITED.

Annexed is the report of the directors presented to the shareholders at the seventh ordinary meeting, held at the London Tavern, Bishopsgate street, on July 20, 1865:—

In accordance with the views expressed by the proprietors, at the meeting in January last, a change of management was effected in March, and the progress of the business has since been satisfactory; many new and valuable accounts having been secured for the bank. The compensation of 2,500*l* paid to Mr John Burton, the late manager, for the unexpired term of his engagement, has been charged to the reserve fund. The profits for the past six months have been absorbed by losses incurred previously, but not ascertained at last audit; and the directors regret that no dividend can therefore be paid on this occasion. They have however, full confidence that a more encouraging result will be exhibited in next account. Mr Thomas Masters Usborne, of Cork and London, having been appointed a director by the board on the 6th ult., such appointment will be submitted for the approval of the proprietors.

MIDLAND BANKING COMPANY, LIMITED.

The following report was presented to the shareholders, at the fourth ordinary general meeting, held at the London Tavern, Bishopsgate street, July 28, 1865:—

The directors have the pleasure to submit to the shareholders the following statement of accounts and balance sheet, for the half-year ending June 30, 1865, which has been duly examined and certified by the auditors. It will be seen that the gross profits for the half-year, including 755*l* 18s 9d brought forward from last account, have been 22,716*l* 13s 11d, after making provision for bad and doubtful debts; and that, after deducting all current expenses, agency charges, interest paid to customers, &c., and allowing for rebate of interest on bills discounted and not due, there remains for disposal a balance of 7,095*l* 10s 2d. The directors recommend that out of this sum 380*l* 4s 10d, being at the rate of 10 per cent. per annum, should be written off preliminary expenses; that 3,608*l* 17s 8d should be appropriated to the payment of a dividend at the rate of five per cent. per annum, free of income tax, upon the paid-up capital of the company; that 1,000*l* should be added to the reserve fund; and that the balance, 2,106*l* 7s 8d should be carried forward to profit and loss new account. The directors, in pursuance of the policy which has hitherto guided them, are of opinion that, having regard to the permanent interests of the bank, it is not desirable to increase the dividend on the present occasion. The directors are happy to report that the expectations formed with regard to the branches at Leeds, Huddersfield, and Sheffield, purchased of the London and Northern Bank, have been justified by the result of the last six months' operations, notwithstanding the comparative inactivity of trade in those places. In February last a daily branch was opened at Tunstall, where a valuable business is being rapidly formed; and in June last the directors were able, without any expense or being called upon to take over any objectionable account or liability, to acquire the business established at Longton, by the London, Birmingham, and South Staffordshire Bank, which is of a lucrative and very satisfactory character. The directors are sanguine that these two branches in the Potteries will contribute largely to the general profits of the company.

Profit for the half-year to 30th June, 1865, after writing off all bad and providing for doubtful debts £115,778 13 10			
Less rebate of interest on bills not due..... 21,362 0 0			
	94,416	13	10
	867,600	15	6

By these accounts the proprietors will observe that the net profits of the bank for the half-year just closed amounted to 94,416*l* 13s 10d, as compared with a profit of 89,567*l* 1s earned for the corresponding half-year of 1864. The directors declare their ordinary and extraordinary dividends at the same rate as for the previous half-year. For the half-year ending June 30 the dividend on the old shares is accordingly at the rate of 8 per cent. per annum, with an extra dividend of 16s per share, making together 2*l* per share for the half-year, and the dividend on the new shares is declared pro rata at 1*l* 13s 4d per share, the dividends on both being free of income tax. The increase to the rest or undivided profits will. therefore, after the payments of these dividends, amount to 21,083*l* 7s 2d on the half-year, a result which, having regard to the unusually low rates of interest prevailing during the half-year, the directors consider extremely satisfactory. The proprietors will have observed by the balance sheet to June 30 that the general business of the bank has increased considerably during the past half-year, affording the most satisfactory evidence of the appreciation by the public of the policy of the directors and of the facilities for business which a large capital enables this bank to offer its customers. Two special general meetings of shareholders have been convened for the 22nd and 23rd August next respectively, to enable the directors to issue 10,000 50*l* shares (30*l* paid up on each), which it is intended to distribute amongst the shareholders, without payment, in the nature of a bonus of one new share to each proprietor of every four shares standing to his name in the register of the company on Aug. 31, 1865. On payment of the call due on the 22nd of July, the shares heretofore called "new shares" become assimilated to the old shares of the bank, 30*l* being paid up on each 50*l* share, new and old. The 10,000 shares now proposed to be issued as bonus shares, and to be presented to the shareholders without any charge or payment whatever, will be in every respect equivalent to the existing shares of the bank, so that, when this operation is carried out, the capital of the bank will consist of 50,000 50*l* shares, 30*l* paid up on each, or one million and a half sterling; whilst the rest, now amounting to 807,600*l* 15s 6d, although to be diminished by 300,000*l* transferred to capital account, and 73,333*l* 6s 8d dividends now declared, will stand at 434,267*l* 8s 10d. The directors have nothing to add to these statements except the assurance of their continued confidence in the progressive prosperity of the bank, and to inform the proprietors that the dividends and extra dividends are now payable at the head office, 13 Old Broad street, E.C., and at the several branches of the bank.

NATIONAL BANK OF INDIA, LIMITED.

The following is the report of the directors for the third half-year, ending June 30, 1865:—

Since the directors last had the pleasure of meeting the shareholders, a period marked by great commercial disaster, in the Bombay Presidency, has been passed through. This bank, through its connection with Bombay, has not altogether escaped without loss, but your directors are glad to be able to state that, after making full provision out of the profits of the half-year for bad and doubtful debts, they are in a position to recommend a dividend at the rate of 6 per cent. per annum. free of income tax. From the annexed accounts it will be seen that the net profits of the half-year, including rs 2,389-9-6 brought forward from the previous half-year, amount to rs 1,37,356-15-5; of that amount it is proposed to apply rs 75,000 in payment of dividend as above-mentioned, and to carry the balance rs 62,356-15-5 forward, to meet the losses of the half-year. The losses incurred have been entirely through Indian bills of exchange, purchased in Bombay. The board have laid down a rule for the guidance of the branches, which will, it is hoped, be effectual in preventing similar losses in future. The board also think it right to mention, for the satisfaction of shareholders, that advances upon joint stock shares in Bombay (excepting upon those of the Bank of Bombay), have, from the first, been strictly prohibited, and consequently, no such advances have been made. Of the new shares, issued at 20 rs premium per share, 2,806 shares were taken up, as at 30th June last, and the premium received thereon 56,120 rs, has been carried to reserve fund, which now stands at 81,120 rs. Five thousand shares of the second issue were allotted to Bombay, at par, on the faith of an arrangement entered into there, but owing to the precipitation of the crisis at that Presidency, the terms upon which the shares were allotted were not fulfilled, and the board gladly availed themselves of the opportunity offered to withdraw the shares from that market, as the benefits at first anticipated were not, in the changed posture of affairs, likely to be realised. These shares the directors reserve until such time as an augmentation of capital is found to be desirable; when, in their opinion, they should be offered to the then existing shareholders; as, from experience, the strength and chief support of the bank has been found to rest in and be drawn from Bengal. The directors have much pleasure in announcing that arrangements have been completed for the transfer of the drawing agency of this bank to the London and Westminster Bank. This connection with one of the most powerful banks in England is of the highest importance, and calculated to advance the best interests of this bank. In conclusion, the directors feel assured that, notwithstanding the result of the half-year has not, owing to the losses incurred, been so favourable as they had hoped it would have been, the shareholders will join with them in a feeling of satisfaction at the progress the bank has made, and the solid basis on which it is now established. As the best evidence of the extension of the bank's operations, and the confidence and support accorded by the public, they would invite a comparison with the figures of the preceding half-year. Your directors are glad to find that the request made by them last half-year, to the effect that the shareholders would give the bank the benefit of their direct support and influence, has met with a hearty and practical response; and they would again impress upon all connected with the bank, that each in his own sphere should seek to maintain and extend its connections, so that the future operations of the bank may be rendered a steady source of profit to the shareholders, and a real benefit to the public.

GENERAL STATEMENT and BALANCE SHEET, for the half-year ending June 30, 1865.

LIABILITIES.	Rs	a	p

NATIONAL BANK OF LIVERPOOL, LIMITED.

The following report was submitted to the proprietors at an extraordinary general meeting, held in Liverpool, on July 31st, 1865:—

The directors of the National Bank of Liverpool, Limited, have much pleasure in presenting to the proprietors their fourth half-yearly report. After writing of all bad and amply providing for doubtful debts, the accounts of the bank made up to the 30th June last, show a net profit of 12,677*l* 14s 1d, to which must be added 2,810*l* 9s 10d brought forward from last account, and 746*l* balance of premium on new shares, leaving available 16,234*l* 3s 11d for distribution, which the directors have applied as follows:—In payment of a dividend, free of income tax, at the rate of 10 per cent. per annum—10s per share on 20,000 old shares, 10,000*l*; 7s per share on 8,779 new shares, 3,072*l* 13s; to profit and loss new account, 3,161*l* 10s 11d; total, 16,234*l* 3s 11d. The assets and liabilities of the bank, and the profit and loss account to the 30th of June, are as follows:—

ASSETS.	£	s	d
Cash in hand and at bankers	120,159	3	1
Due to the bank on bills discounted, loans to customers, &c.	1,010,086	0	
Bank premises	19,511	9	
	1,149,756	13	1

		1,149,756 13 10

Profit and Loss Account.		£ s d
Balance from last half-year		2,810 9 10
Net profit for half-year ending 30th June, 1865, after writing off bad debts and providing for doubtful debts	£15,867 14 1	
Less rebate at 3 per cent. on bills current	3,190 0 0	
		12,677 14 1
Balance of premium account		746 0 0
		16,234 3 11

Of the 2,494 new shares on hand at last meeting, 1,273 have been taken up by the proprietors at a premium of 7*l* per share, producing 8,911*l*. This sum the directors have applied as follows, in accordance with the original understanding:—To reserve fund, increasing it to 103,895*l*, being 5*l* per share, 6,365*l*; to extinction of preliminary expenses, 1,800*l*; to profit and loss, 746*l*; total, 8,911*l*. Owing to the numerous mercantile embarrassments and severe fluctuations in value of many of the staple articles of commerce, the directors have continued to aim at a safe rather than at an extensive business; and though the last half-year has not been favourable to banking, they are happy to say the progress of the bank has been satisfactory, and that many new connections have been formed since Christmas last.

NEW ZEALAND BANKING CORPORATION, LIMITED.

At the third half-yearly ordinary general meeting, held at the offices of the bank, on June 6, 1865, the following report was read:—

The annexed balance sheet contains the audited accounts of the bank for the half-year from November 15, 1864, to May 15, 1865, and exhibits a net profit of 3,532*l* 14s 7d, which the directors propose to appropriate as follows:—

	£ s d
Payment of a dividend at the rate of 10 per cent. per annum for the past six months	2,766 17 2
Usual proportion of preliminary expenses	270 4 0
Write off lease and furniture, head office	28 4 0
Carry forward	467 9 5
	3,532 14 7

Since the last meeting of shareholders, the colonial act has been obtained, empowering the bank to issue its own notes, and placing it on the same footing as other banks incorporated by Colonial Charter, the title being altered to the more distinctive name of "The Commercial Bank of New Zealand, Limited." The Act of Incorporation has not yet come to hand, but as soon as it is received it will be placed before the shareholders. With a view of protecting the interests of the shareholders, the directors have to report that a local board has been formed at Dunedin, consisting of His Honour J. Hyde Harris, Superintendent of Otago; and H. Reynolds, Esq., M.G.A. and M.P.C., and the directors have to ask the shareholders to confirm their nomination. In accordance with the suggestions of various shareholders, the directors have further to report that the colonial accounts have been duly examined and signed by the official accountant at Dunedin, Mr Hugh Ross Steavenson. Soon after the opening of the bank at Dunedin, the Otago daily *Times* published an article of so libellous a character that the general manager was forced to bring an action against the proprietor of that journal, which resulted in a verdict in favour of the bank, with 500*l* damages and costs, and which sum, less the amount of extra costs incurred by the bank as between solicitor and client, has been distributed between the various local charities at Dunedin, the directors thinking that the shareholders would prefer that the money should be thus spent to letting it appear as a profit. The result has been of great importance to the bank, as bringing it to the notice of the colonial public, and increasing its reputation. The business of the bank continues to prosper under the able management of Mr John Reid Mackenzie, the general manager at Dunedin. During the past six months, as agents for the Dunedin Gas Company, the bank has been successful in placing that company's debentures on favourable terms, and, notwithstanding the heavy failures that have taken place in New Zealand, only one bad debt has been incurred, which partakes more of the character of a fraud than a trading loss, amounting to 700*l*, which has been debited to profit and loss. The local management has opened an agency at the Gold Field of Waipori, which had only been in operation a fortnight when the last mail left, and which the manager writes is distant 40 miles from Dunedin, and is a rising and prosperous township.

NORTHERN BANKING COMPANY.

At the annual general meeting, held September 28, 1865, the following report of the directors was read:—

The past year (the forty-first of your existence as a company) although on the whole not unfavourable to banking interests, has been by no means so lucrative as the previous one. The rates, however, have been fairly remunerative, and the state of trade in the North of Ireland (particularly as regards portions of the linen trade) has continued most prosperous. The directors report that the dividends for the past year have been paid at the rate of 12 per cent. on the increased capital of the company (equivalent to 14*l* 8s per cent. on the subscribed capital). A bonus of 2*l* per share has also been paid; a sum of 7,000*l* added to the reserved fund (which now stands at 111,912*l* 4s 2d); and a further sum of 4,753*l* 8s 3d carried forward to credit of profit and loss for the present year. This result on the year the directors have no doubt will be satisfactory to the shareholders, but they think it right to inform them that it has been aided by a payment received from a firm who were some years ago in adverse circumstances, but who have most honourably availed themselves of their improved position to pay, with interest, debts from which they were legally discharged. Branches of this bank have been opened in Gilford and Comber during the past year, and proceedings are in progress to open a branch at Newry, which the directors hope to have in operation in a short time. Your committee beg to congratulate the proprietors on these satisfactory results of the year, and to remind them how far it is incumbent on each individual proprietor to promote as far as in his power the interest of the establishment, and thus to second the unceasing exertions of the directors and committee.

NORTH AND SOUTH WALES BANK.

The following is the report presented to the proprietors of the North and South Wales Bank, at their twenty-ninth annual meeting, held at the rooms of the Liverpool Law Association, Liverpool, on July 21; Mr John Ravenscroft in the chair:—

In accordance with the recommendation submitted to the proprietors at the last annual meeting, and approved by them, the directors have now to report that 5,000 additional shares have been issued to the shareholders (pro rata) at a premium of 10*l* per share, and that the whole of the instalments payable thereon have been received. The paid-up capital of the bank has thus been raised to 300,000*l*, and the reserve fund to 150,000*l*. During the year ending 30th ultimo, the minimum rate of discount at the Bank of England has fluctuated from 9 to 3 per cent., and some of the leading branches of commerce have experienced great vicissitudes. Heavy lossses have arisen in consequence in Liverpool and elsewhere, but the directors have pleasure in stating that this bank has in a great measure escaped them. The profits for the six months ending December 31 last, enabled the directors to declare an intermediate bonus of 10 per cent. per annum for that half-year, in addition to the usual dividend of 10 per cent., and they have had the satisfaction of declaring a similar dividend and bonus for the half-year just ended. As a rule, however, they consider that it will be more expedient in future to declare a bonus only once in every year, namely, at June 30, at which date the financial year of the bank closes, and the yearly inspection of the branches by the directors has usually been completed. The annual meeting of the proprietors likewise would be close at hand. The profits of the bank for the year ended the 30th ultimo, including a balance of 6,504*l* 3s 6d from last account, after deducting interest due to depositors, rebate of interest on bills, salaries, and all other charges and expenses, and making full provision for losses, amounted to

Digitized by Google

71,504*l* 8s 2d; deduct two half-yearly dividends, at the rate of 10 per cent. per annum each, paid to proprietors, free of income tax, viz.: half-year ended December 31, 1864, 13,698*l* 4s 11d; half-year ended June 30, 1865, 14,708*l* 10s 7d; income tax paid thereon, 575*l* 18s 6d; bonus of 10 per cent. paid on salaries of officers, as voted at last annual meeting, 1,330*l* 14s 6d—30,313*l* 8s 6d; leaving 41,190*l* 19s 8d, out of which a bonus at the rate of 10 per cent. per annum, free of income tax, has been paid to the proprietors for the half-year ended December 31, 1864, 13,698*l* 4s 11d; ditto, for the half-year ended June 30, 1865, 14,708*l* 10s 7d; income tax paid thereon, 575*l* 18s 6d—28,982*l* 14s; leaving a balance of 12,208*l* 5s 8d, which the directors propose to carry forward to next account. The directors have again to report that the large increase in the business of the bank, both at Liverpool and at the branches, during the last two years, is still continuous. The work thus thrown on the general manager, Mr Rae, has become excessive. With the view of relieving him from a portion of the detail of the business, and at the same time retaining his most valuable services, the directors propose, with the sanction of the shareholders, to appoint him managing director, with efficient heads of departments immediately under him.

ORIENTAL BANK CORPORATION.

A general meeting of the shareholders of this corporation was held on October 19, at the offices of the corporation, Threadneedle street, Mr H. G. Gordon in the chair, for the purpose of declaring an interim dividend for the half-year ended June 30 last. The advertisement convening the meeting having been read,

The chairman said he regretted that the dividend which he was about to declare was less than that declared for the corresponding period last year. The causes lay in a nutshell. They were well aware that the year 1864, and a great part of the year 1865, would ever be memorable in the annals of East India and China commerce and banking as one of the most disastrous that had occurred for many years. That period was to the directors one of intense anxiety, care, and trouble, and he sincerely trusted that he should never see the like again. In this country, about the period to which he had alluded, a tremendous fall took place in all kinds of imported produce, particularly from India and China; credit became very much contracted, losses were exceedingly severe, and eventually failures, unsurpassed for magnitude and extent, occurred. There was scarcely a mail which arrived from India that did not bring accounts of some disaster having occurred there. They were, in fact, between two fires. What were the directors to do? To endeavour to get out of the range of shot as soon as possible. They restricted their business, and in doing so they were most vigorously and efficiently supported by their representatives in the east. The result naturally was that their profits were very much curtailed, but they avoided losses which he had no doubt they would otherwise have incurred. Losses they had incurred, but far less than he at one time had anticipated, and they had determined, on what he thought was the wisest, the most honest, and best course—to meet those losses at once. They had written them all off; they had made mple provision for any contingencies that might occur, while they carried forward a considerable sum for next year. He was aware that it was no consolation to fellow sufferers to know that others had been in the same predicament as themselves, and it was with no feelings of that kind that he should allude to one bank, but in order that the meeting might see how, with far greater advantages at their command, that bank suffered much more severely than they had done. He alluded to the Bank of Bombay—a State bank, in the centre of the very best information, and supported with an immense capital and with immense powers of various kinds. That bank at its meeting, which took place a few months ago, announced that its losses during the period to which he (the chairman) was referring amounted to 300,000*l*, and that, therefore, they could not declare any dividend. It was from no invidious feeling that he made that remark, nor from any desire to show that others might have been great sufferers; but it was to show that institutions carefully managed during the terrible crisis that prevailed could not escape the losses in which all banks connected with the east were more or less involved. Now for the reverse of the medal. Confidence had again been restored, credit was very sound, and there was every reason to anticipate a great increase to their business. Many offers had been made to them, showing the high position and credit which the Oriental Bank Corporation still maintained; and he trusted that when he had the pleasure of meeting them again at the annual meeting in April next, instead of having to make an apology for a rather shorter dividend than usual, he should have to address them in the language of congratulation. He concluded by moving, "That an interim dividend of 1*l* 5s per share, free of income tax, be declared for the half-year ended June 30 last, to be payable on and after November 1 next." The resolution, having been seconded, was put and carried, and the proceedings then terminated.

ORIENTAL COMMERCIAL BANK, LIMITED.

The annexed report and balance sheet for the financial period, ending June 30, 1865, was presented by the directors to the shareholders, at the ordinary general meeting of the company, on August 23, 1865:—

Your directors have much pleasure in submitting the accompanying exposition of your affairs. The business, which is that of the former Oriental Commercial Company, limited, progressively extending upon the power of the three concurrent and combining companies, emerges, from a period of some considerable mercantile disturbance, with this proof of a steadily increasing prosperity. The balance sheet embodies the figures of the financial year, since the last published accounts of the Oriental Commercial Company, limited; but as the former and separate interests of that company have been provided for, without interruption to the regular course of business, the balance of net profits to be dealt with really relates only to the operations of four months, from the 1st March last. The capital amount included, with reference to former members of the National Financial Company, limited, refers only to shares actually exchanged on or before the 30th June last, and which rank for dividend from the 1st of March, contemporaneously with those of former members of the Oriental Commercial Company, Limited. The remaining 100,000*l* dates, upon the accounts, from the 17th of May last, to be vested in trustee officers for twelve months, and subject to a separate and special provision as to the profits which will accrue thereon. As the period embraced by the combined accounts now submitted is fragmentary, having been thus marked out to preserve the uniformity of published returns, and of general meetings, and seeing that the season comprised is that of the least activity and profit in the course of the company's regular business, your directors have determined to recommend that the net profits disposable be treated for distribution *ad interim*, in the declaration of a dividend at the rate of 10 per cent. per annum, which will absorb 5,738*l*, leaving 3,913*l* to be carried forward for accumulation, and dealt with as the company may hereafter determine. Your directors solicit attention to the fact that of the profits, amounting to 25,854*l*, no less than 19,106*l* has been derived from commissions, and 5,954*l* from interest, showing the safe nature of the operations. The large sum yet in the company's hands, on account of dividends previously declared, arises chiefly from amounts payable to members who have accounts current with the company, into which upon settlements such dividends will have to pass. The establishment of a branch at Patras, under the local public administration of a council and committee, with a view to the very large and important interests of the company in that quarter, has been hailed with cordial satisfaction; and your directors are assured of a further increase of business under gratifying conditions. From all directions in which the regular mercantile and exchange operations of the company have been opened up and extended, your directors continue to receive no less favourable intelligence—notwithstanding that the prevalence of a serious epidemic on the coasts of the Mediterranean has operated to check activity for a time. Your directors can, therefore, express to you their confident anticipation, that the coming produce season, with a promise of more settled markets, will contribute amply to the profitable employment of your capital, so as at once to provide for liberal dividends, and for an adequate addition to the reserve.

BALANCE SHEET, June 30, 1665.

PROVINCIAL BANK OF IRELAND.

Annexed is the fortieth yearly report, made to the proprietors, May 18, 1865 :—

The past year being the fortieth since the formation of the bank, the directors take occasion to express to the proprietors the satisfaction with which they contemplate the success which has attended its operations during that long period, while at the same time Ireland has enjoyed the advantages arising from the introduction and development of a sound system of banking in that country. The season of 1864 was favourable for the early grain crops, and wheat and barley were productive and of good quality. The later crops, however, suffered from the long drought which prevailed during the summer, and the oat crop was in consequence a deficient one. From the same cause green crops and hay were also deficient, but, fortunately, the potato crop was a productive one, and of good quality. Flax was also a heavy crop, and was cultivated to a considerably larger extent than heretofore. The flax was not of fine quality, and the dry season being unfavourable for steeping, its condition and value were not in proportion to its bulk; but, notwithstanding these drawbacks, and a rather low range of prices, the flax crop was, on the whole, fairly remunerative to the farmer. The directors regret, however, to add that the pecuniary condition of the small farmers in Ireland has not generally undergone improvement, their principal crop, oats, having, as already stated, been a deficient one, while the prices of grain continued very low. This, of course, prolongs the depression which has for some years past prevailed in the retail trade of the country. On the other hand, the larger landlords have continued to derive substantial benefit from the high price of cattle and sheep. Wool also rose to an unusually high price during last summer, but has since considerably declined. The linen trade, which forms the staple of the North of Ireland, has continued prosperous. The manufacture and export of linen goods largely increased during the past year, and prices were steady and remunerative. The prospect of peace in America has latterly brought about a decline of prices, but no commercial difficulties have arisen therefrom. The value of money has undergone numerous and considerable fluctuations during the year, the average rate of interest being high.

	£	s	d
The account submitted to the yearly general meeting in May, 1864, showed the amount of rest or undivided profits at March 26, 1864, to be	252,867	15	6
Out of which there has been paid to the proprietors the amount of two ordinary and extraordinary dividends, as follows:—			
At Midsummer, 1864—Ordinary dividend of 4 per cent. £21,600			
Extraordinary dividend of 6 per cent. 32,400	£54,000		
At Christmas, 1864—Ordinary dividend of 4 per cent. 21,600			
Extraordinary dividend of 6 per cent. 32,400	54,000		
	108,000	0	0
Leaving a balance of	144,867	15	6
To which there has since been added the amount of net profits for the year ending on the 25th, being the last Saturday, of March, 1865, after deducting property tax, and providing for all bad and doubtful debts	111,695	12	2
Making the rest, or amount of undivided profits, at 25th March, 1865	256,563	7	8

The proprietors will observe that an addition of about 4,000*l* has been made to the rest; and the directors intend to continue the dividend at the same rate as last year, and have accordingly now to intimate that they will pay in July next an extraordinary dividend of 30s on each 100*l* share, and 12s on each 10*l* share of the capital stock of the bank, in addition to the ordinary dividend of 4 per cent.; making the amount to be then paid 2*l* 10s on each 100*l* share, and 1*l* on each 10*l* share for the half-year ending Midsummer next, and they will also, as heretofore, pay the property tax for the proprietors.

ROYAL BANK OF IRELAND.

At the 29th annual general meeting of the shareholders held at the bank house on Sept. 27, the following report was adopted:

The directors, in submitting their 29th annual report, are impressed with the belief that it will afford satisfaction to the shareholders. The high rates of discount prevailing during the first half of the past year were not maintained during the second period—which, on the contrary, was marked by terms rather under than above those ordinarily existing. The results, nevertheless, of the bank's operations exhibit unmistakeable evidence of a continued favourable action; and the shareholders, at the same time, will not fail to notice that the dividends this year had to be distributed over a considerably larger amount of capital than in preceding years. The reserve fund on this occasion has only been nominally increased; but, while from the large addition made last year, it was not deemed necessary to add to it in any essential degree this year, the directors maintain the opinion they have heretofore expressed, that an increase of this fund should not, under fitting circumstances, be lost sight of; as experience has convinced them that the command of a resource of this nature is an important element in the successful working of the bank by enabling it to carry on its operations independently, as well as on account of the increased confidence in the bank's stability, which it is calculated to afford. In their last report the directors had to report the death of their then late chairman, and it is now with extreme regret that they have to record the resignation of his successor, Mr Edward Atkinson, in consequence of ill health. This gentleman's time and abilities had been so long and so ably devoted to the service of the bank, that it was with unfeigned reluctance the board accepted his proffered resignation, which, with a full sense of the loss they sustained, they nevertheless were compelled to do. The vacancy created by Mr Atkinson's retirement has been filled up by the election to the board of Mr Robert Callwell, a gentleman so well known and so highly appreciated in the mercantile community of Dublin, that the directors feel no doubt of their choice meeting the approval of the shareholders.

SHEFFIELD AND HALLAMSHIRE BANK.

At the twenty-ninth general annual meeting of the shareholders, held in the Cutlers' hall, Sheffield, on July 21, 1865, the annexed report and statement of accounts was unanimously adopted:—

Your directors have pleasure in stating that both the business of the bank and its profits during the past year have been larger than those of any year since the bank was formed in 1836. After payment of all the expenses of the bank, and making suitable allowances for doubtful accounts, the net profits are 25,950*l* 3s 8d. Out of this sum the following amounts have been appropriated, viz.:—9,147*l* 10s 0d for the dividend,, after the rate of ten per cent. per annum, for the half-year ending December 31 last; 421*l* 9s 7d for income tax; and 1,298*l* 7s 0d for bad debts, leaving a balance of 15,082*l* 17s 1d unappropriated. Your directors now declare a dividend, after the rate of ten per cent per annum, for the half-year ending June 30 last, amounting to 4,580*l*; and recommend the remainder, viz., 1,342*l* 17s 1d, be added to surplus fund. The foregoing may be summarised thus:—Income tax, 421*l* 9s 7d; bad debts, 1,298*l* 7s 0d; dividend for half-year ending December 31 last, already paid, 9,147*l* 10s 0d; ditto June 30 last, now declared 9,160*l* 0s 0d; bonus 2½ per cent. ditto 4,510*l* 0s 0d; added to surplus fund, 1,342*l* 17s 1d; total, 25,950*l* 3s 8d. The dividend and bonus now declared may be re-

Digitized by Google

ceived, without deduction for income tax, on or after July 25 inst. Ten shares have been issued to customers during the past year. These have increased our capital by the sum of 250*l*. The premiums on these shares, amounting to 100*l*, have been added to surplus fund, as per deed of settlement. During the past year the sum of 104*l* 15s 1d has been received from debts previously written off as bad. This amount has been added to surplus fund. Surplus fund on June 30, 1864, was 46,705*l* 14s 3d; added this year premiums on ten shares, 100*l*; ditto debts written off and since recovered, 104*l* 15s 1d; ditto balance of this year's profit, 1,342*l* 17s 1d; present amount of surplus fund, 48,253*l* 6s 5d. The shareholders will observe, with satisfaction, that the moderate sums for which the surplus fund was called upon a few years ago, during a long period of cheap money, have been reinstated during this and the previous year, with a considerable addition thereto. The surplus fund is now larger than at any former period. Your capital account stand thus—7,328 shares 25*l*, paid up, amount to 183,200*l*; surplus fund, as above, 48,253*l* 6s 5d; thus making a total working capital of 231,453*l* 6s 5d. Comparing the capital and resources of the bank with its liabilities, you have solid grounds for congratulation on a position of strength and safety rarely surpassed by any bank, and this, too, in connection with so respectable a dividend as 10 per cent. which is ordinarily paid. Your directors think it right to remind you that a large proportion of the extra profit of this year was made during the first half of it, when the value of money was high. They need scarcely suggest to you that it would be unreasonable to expect bonuses, when the special causes of them cease to exist. The present state of the money market is one of ease and cheapness. When it is considered that the Hallamshire Bank has no branches to contribute to its profits, the result of the past year's operations cannot but be viewed by you with satisfaction, as it is so viewed by your directors. In conclusion, your directors congratulate you on the growing strength, importance, and prosperity of your bank. From its ample resources your directors are prepared to meet all the legitimate demands of commerce, and to support especially, as far as prudence will permit, their numerous clients.

GENERAL BALANCE—June 30, 1865.

SHROPSHIRE BANKING COMPANY.

Annexed is the twenty-ninth annual report, dated July 18, 1865:—

The directors of the Shropshire Banking Company have much pleasure in meeting the proprietors and presenting their usual annual report. The accounts, which have been duly audited by the auditor, Mr Banks, after making provision for bad and doubtful debts, show the net profits for the year to be 7,201*l* 14s 10d or 16 per cent. on the paid-up capital, to which has to be added 292*l* 2s the balance brought from last year's statement, making a total of 7,493*l* 16s 10d. The directors recommend a dividend of 3s per share for the past half-year, which with a similar dividend paid in February last will absorb 4,500*l* (equal to 10 per cent. per annum), free of income tax, and to carry 2,155*l* to the guarantee fund, and the balance 838*l* 16s 10d to next year's account. Should this recommendation be adopted the account will then stand as follows:—

	£	s	d
Net profits for the year ending June, 1865	7,201	14	10
Balance from last year	292	2	0
	7,493	16	10
	£	s	d
Dividend 3s per share to 31st December, 1864	2,250	0	0
— — 30th June, 1865	2,250	0	0
To be carried to the guarantee fund	2,155	0	0
Balance to next year's account	838	16	10
	7,493	16	10

The guarantee fund will then be as under:—

Amount from last year's statement invested in the 3 per cent. consols.	£11,500	0	0
Interest at 3 per cent.	345	0	0
To be added from this year's profits	2,155	0	0
	14,000	0	0

SOUTH AUSTRALIAN BANKING COMPANY.

The twenty-fourth annual general meeting of the shareholders of the South Australian Banking Company was held on the 20th June, at the bank offices, Old Broad street, G. Martin, Esq., in the chair. Mr W. Purdy read the following report and statement of accounts:—

The court of directors have the satisfaction of stating that South Australia continues in a sound and progressive condition, the internal resources of the colony are being developed, and its exports largely increased. The agricultural interest has been particularly benefited by improved prices for wheat and flour, and one of the immediate results has been to bring a greater acreage under cultivation. With this prosperity the bank has enlarged the area of its business. The court confidently believe that it has done so with safety, as operations have, for the most part, been based on the staple productions of the colony, and are always conducted with a strict regard to the security of the assets. An increase of banking accommodation, however, has been witnessed, which has tended to produce a lower rate of profit than might have been expected; but this bank it is hoped will be able to meet any undue competition, should such arise, without material prejudice to its resources. Two new branches have been established—one at Moonta, which is an active mining district, and the other at Tanunda, to afford facilities to a German agricultural settlement of much promise. The court have to regret the decease of their late chairman, Mr Edward Divett, who for many years presided over their deliberations, and they feel assured the proprietors will concur in their appreciation of his high character, well-informed judgment, and the efficient services rendered by him during his long connection with the bank. The accounts, duly audited, are annexed, and from the balance of profits the court have the pleasure to recommend a dividend of 10 per cent. per annum, free of income tax, payable half-yearly.

ULSTER BANKING COMPANY.

At the twenty-ninth annual meeting of this bank, held at Belfast, on September 28, 1865, the following report was read:—

The committee have great pleasure in presenting to the proprietors their report of the affairs of the bank for the year ending August 31 last. In accordance with the desire expressed by the shareholders at the last general meeting, the committee, with the concurrence of the directors—in addition to their usual statement of profit and loss—now append an account showing the liabilities and assets of the company. During the year the committee and directors declared two half-yearly dividends at the rate of 12 per cent. per annum, with a bonus of 2 per cent. in March, and 4 per cent. in September, being at the rate of 18 per cent. for the whole year. They have applied 3,523*l* 10s 10d out of the year's profits to the credit of the building account in Belfast, which brings down the balance to an amount so much under the present market value of the property that it will not be necessary to make any further reductions upon it. They have also added 3,000*l* to the reserve fund, being interest at the rate for money invested in the public funds, and have carried forward 2,457*l* 10s 3d to the undivided profits account. The committee and directors cannot conclude this report without congratulating the proprietors on the progress of the bank, and again requesting their active co-operation in promoting the interests of the establishment and extending its connections.

UNION BANK OF AUSTRALIA.

The twenty-seventh annual meeting of the proprietors was held on the 10th July, at the offices, Old Broad street, to receive the report of the directors and on other business; J. J. Cummins, Esq., presided. Mr H. W. D. Saunders, having read the notice convening the meeting, read the following report:—

It is again the pleasure of the directors to meet the proprietors with a statement of the bank's affairs, embodying results which cannot fail to prove satisfactory. The course of business during the past year required more than ordinary circumspection; affairs in New Zealand have been disturbed and progress arrested by the native war, still unhappily continued, while in some of the Australian markets there have been failures and considerable depression, of no material effects, however, upon the profits of the bank, owing to the sound judgment and care with which its management has been conducted, and for which the colonial staff are indepted to the commendation of the proprietors. The directors have had the advantage of conferring with Mr M'Mullen, their inspector and general manager, now in this country on leave of absence, upon all the important interests of the bank; these interviews have fully sustained their appreciation of his character, and have enabled them to make and receive suggestions which cannot fail to prove beneficial. The latest advices, although indicating continued depression in some of the colonies, and the danger of its extending by reason of a severe drought, which affected pastoral and mining interests, are satisfactory with respect to the bank's position, and its affairs were being so administered as, whilst fully meeting the wants of its customers, to keep its resources under proper control. William Fanning, Esq., and Charles Henry Mills, Esq., are the directors who retire on this occasion, in accordance with the provisions of the deed, and now offer themselves for re-election. The subjoined statement of accounts presents a net profit of 113,882*l* 5s 3d available for division. The directors have, therefore, determined to apply the sum of 112,500*l* as a dividend of 1*l* 5s per share for the half-year, payable in London, free of income tax, on 18th July, and in the colonies as soon as the inspector shall fix after receipt of advices.

UNION BANK OF IRELAND, LIMITED.

At the fifth ordinary general meeting, held at the London Tavern, Bishopsgate street, on July 27, 1865, the following report was received and adopted:—

The directors beg to submit to the shareholders the statement of accounts, as annexed, showing the position of the bank on 30th June last. The gross profit for the half-year, after making provision for bad and doubtful debts, amounts to 15,483*l* 17s, and adding thereto 1,972*l* 19s 3d, the amount brought forward from last account, makes a total of 17,456*l* 16s 3d, from which has to be deducted the current expenses for that period of 6,489*l* 7s 3d, together with interest paid and due on current and deposit accounts, amounting to 6,850*l* 17s 2d, there remains a balance of 4,116*l* 11s 10d, which it is proposed to carry to the new account. The directors regret that the result of the past half-year has not realised their expectations, but they can safely attribute any check in the progress of the bank to exceptional causes, which they believe are now overcome, and they feel assured that the bank, being in a perfectly sound position, its system and staff well organised, and confidence strengthened by the co-operation of gentlemen of position and influence in Ireland as directors, together with the favourable indications of an early and plentiful harvest, the future contains abundant promises of success.

UNION BANK OF LONDON.

At a general meeting of proprietors, held at the London Tavern, Bishopsgate street, on July 12, 1865, P. Northall Laurie, Esq., governor, in the chair, the following report was read:—

The directors have much satisfaction in reporting that the net profits of the bank for the six months ending the 30th June last, after the payment of all charges (including the sum of 131,895*l* 19s 6d for interest paid and due to customers on their current and deposit accounts), and making full provision for all bad and doubtful debts, are 144,879*l* 8s 11d, which, with 61,375*l* 19s 11d brought forward from 31st December last, amount to 206,255*l* 8s. The directors now declare a dividend at the rate 15 per cent. per annum, and a bonus of 7½ per cent. on the paid-up capital, being together at the rate of 30 per cent. per annum for the last six months, clear of income tax. After payment of the dividend and bonus, amounting together to 180,000*l*, and appropriating 5,000*l* to the buildings investment account, there will remain an unappropriated balance of 21,255*l* 8s to be carried forward to the new profit and loss account. In the course of the past half-year, Thomas Augustus Gibb, Esq., felt himself obliged from impaired health to tender the resignation of his seat as a director; and the directors feel assured that the proprietors will hear with great satisfaction that, in pursuance of the deed of settlement, they have filled that vacancy by electing Mr Scrimgeour a director of the bank. It was with great pleasure the directors learnt that their offer would be accepted by Mr Scrimgeour, as a recognition of their strong personal regard for a valued friend and officer; and they feel assured that the proprietary will, with equal pleasure, confirm an election which, in some degree, marks their approbation of twenty-six years of arduous service, characterised by ability, zeal, and disinterestedness which cannot be exceeded.

UNION BANK OF MANCHESTER, LIMITED.

The annexed report of the directors was adopted at the twenty-ninth annual general meeting, held at the bank, York street, Manchester, on July 27, 1865 :—

The directors beg to lay before the shareholders the annual financial statement of the bank, from June 30, 1864, to June 30, 1865.

Profit and Loss Account and Balance Sheet for the year ended June 30, 1865.

It will be seen, by the accompanying balance sheet, that the result of the operations of the bank during the past year has been very satisfactory; as, after having paid all expenses, including those incurred in enlarging and extensively altering the bank premises, together with two dividends at 8 per cent. per annum, one with a bonus of 2s per share, making 10 per cent. per annum, and the other with a bonus of 3s per share, making 11 per cent. per annum; and having allowed for rebate of interest on bills not yet due, and for bad and doubtful debts, the shareholders will observe that there remains a sum of 28,000*l* to be added to the reserve fund, which will then amount to 95,000*l*, leaving a balance of 1,621*l* 0s 1d at the credit of profit and loss, to be carried forward to next account.

WORCESTER CITY AND COUNTY BANK.

The half-yearly meeting of this bank was held in the board room, on August 7, when the following half-yearly report and balance sheet was adopted :—

As the revised deed, which will this day be presented for the sanction of the shareholders, provides that the financial year of the company shall henceforward terminate on 30th June instead of on the 21st December, as heretofore, the directors have prepared a balance sheet of the company's operations to the 30th June of the present year. In presenting this balance sheet, the directors have to congratulate the proprietors on the gradual and constant development of the company's operations. A reference to the annexed accounts will show that, with the sum of 301*l* 12s 5d brought forward from last year, the net profits of the bank for the six months ending on the 30th June, after providing for all bad and doubtful debts, amounted to 10,026*l* 5s 8d. The directors recommend the declaration of the usual dividend at the rate of 10 per cent. per annum, together with a bonus of 5s per share free of income tax, after payment of which a balance of 2,526*l* 5s 8d will remain to be carried forward to the credit of the current year. The dividend and bonus will be payable on and after the 12th instant. The following is a copy of the balance sheet submitted to the meeting :—

Literature.

ESSAYS ON WOMAN'S WORK. By BESSIE RAYNER PARKES. Alexander Strahan. 1865.

IT was not without some feelings of apprehension that we opened this little volume. "Woman's Work" was suspicious. It seemed cognate with "Women's Rights," "Woman's Dignity," and "Woman's Mission," phrases which send a chill to the mind in anticipation of a deluge of weak sentimentalism, bad logic, and inaccurate statements. We are happy to admit that our fears were groundless. Miss Parkes writes a sound unpretending English style, and always under the influence of clear practical common sense. As it is, we are disposed to go a long way with her, and she produces in us the impression that had we thought and observed on the subject as much as she undoubtedly has, we might go the whole way. This at least must be admitted, that her aims are moderate and intelligible, and that the social changes which she would have recognised and regulated are already taking place in a confused blind way. There is, no doubt, a widely prevalent sentiment that women should not work in the way men are expected to do. In the case of the lower orders, it is true, we reconcile ourselves to the fact of female labourers without much difficulty; but the theory of civilised life in this and all other countries is, that the women of the upper and middle classes should be supported without actual toil of their own by their male relatives. For a *lady* to have to get her own living is universally regarded as a misfortune. Miss Parkes admits that this theory is salutary and graceful. There is little to be urged against it, except this, that it is *impracticable*, and tends to become more and more so. Statistics inform us that the number of women who, in some form or other, are paid labourers, amounts to about 3,000,000, —nearly half the whole female population, and infinitely the larger proportion of them are engaged in industry that takes them *away* from home. Few who have not examined the subject have any idea of the extent to which women are employed in the great mills and factories of the North, and in Birmingham and Staffordshire. It is not then, Miss Parkes urges, any small body of ladies in London, or any committee or society, who can be charged with seeking to "unsex" women by pressing on them to find out new paths: it is simply the immense industrial development of the last eighty years which has irersistibly brought about this change, and made it necessary for the one sex as well as the other to work if they would eat. "It is clear," she goes on to say:—

> It is clear that, since modern society will have it so, women must work; "weeping," which Mr Kingsley regards as their appropriate employment in fishing villages and elsewhere, being no longer to the purpose. I do not say that these myriads are, on the whole, ill paid, ill fed, sickly, or immoral. I only wish to point to the fact that they are actually working, and for the most part in non-domestic labour, a labour that cannot be carried on under a husband's or a father's roof. And, recognising this apparently hopeless necessity, I believe it to be just and advisable that printing and all such trades should be thrown open to them; for we have to do with hunger, and thirst, and cold; with an imperious need of meat and drink, and fire and clothing; and, moreover, as trade uses up women so freely, whenever it finds them cheaper than men, they themselves have a just claim to the good along with the evil, and being forced into industrial life, it is for them to choose, if possible, any work for which their tenderer, feebler physical powers seem particularly adapted.—(P. 24).

This, Miss Parkes thinks, is the real grievance of which women have a right to complain—that "women are left more and more to provide for themselves, and society takes hardly any trouble to enable them to do so, either by education or by opening the doors to salaried employment. The great overplus of the female sex in England, caused chiefly by the wholesale emigration of men to the colonies, increases the difficulty tenfold; and, except in the mere mechanical trades where numbers rather than skill are in demand, it is exceedingly difficult for them to find anything to do." However much we may prefer the past state of things, there is no use, she says, in lamenting over it, and if society is no longer able or willing to provide for women in the old-fashioned way, they may fairly demand of it to try to give them an equal chance with men in providing for themselves.

Miss Parkes passes in review the various modes of employment open to women more or less educated. The most obvious of these is of course the profession of teaching; indeed, in most cases, it is the only one even thought of. Of the ills that wait on its followers she has a dismal enough story to tell. It suffers from overcrowding and its necessary consequent, an extremely low rate of remuneration. The reports of the Governesses' Benevolent Institution, Miss Parkes says, reckon the total number of governesses in this country at 15,000. The secretary of the above-named Institution gives it as his decided opinion "that the number of *first-class* governesses is not greater than the demand for their services, and that although, taking this for granted, the salary of a woman of unusual professional ability and attainment cannot rise higher than that of a small government clerk at from 100*l* to 200*l* a year, still this sum can be secured and absolute penury avoided." But then, to gain this, the governess must be first-class, and this demands not only personal qualifications of a high order, but a special and expensive training. The strain falls, writes Miss Parkes,

> Upon the hundreds and thousands of women who, born in the middle class, live by its instruction; upon the daughters of professional men who educated themselves in the conventional degree of knowledge and accomplishments suddenly, at the death of a parent, or the failure of an investment, rush into the profession of the teacher, and discharge its duties, in all probability, with honesty and thoroughness so far as they are able, but without any of that nicety of acquirement or peculiar tact and science in imparting which would enable them to outbid the hosts of sister governesses who are teaching on the same social level and for equally low pay.

Twenty-five pounds a year seems the average salary such can look for. It may give some idea of the distressed condition of this class, who from age or sickness are prevented from working further, if we add that the Governesses' Institution having got together and invested a sum of 500*l*, sufficient to purchase an annuity of 15*l* yearly, for this small sum there at once started up 30 applicants, many of them entirely destitute.

Miss Parkes would have women boldly strike out new lines for themselves, and urges the practicability of their becoming clerks or ledger-keepers, or again shopkeepers, especially if several of them can combine to start a co-operative store. The two great obstacles to their pursuing such courses are, she says, the universal want of *capital* on the part of women, and the social prejudice against their so employing themselves, and becoming "independent factors." The first can only be met by a stronger sense of duty on the part of parents to provide, if it be possible, some little capital for their daughters at any sacrifice, and this they will probably only do when they have come to acquiesce in the possibility that it may be their daughter's lot in life to provide for herself as much as their son's—a possibility which at present they rather refuse to consider. As to the prejudice, that of course is a hard matter to deal with. No doubt it exists, and the women who first act in defiance of it must expect to suffer, and can only console themselves by thinking that they are martyrs in the cause of the advancement of their sex. Mere *argument* is in vain. If it were proved to demonstration that both society and the women themselves benefited largely by all women becoming "independent factors," we doubt its having much effect. Still, as Mr Mill says, probably the only real reason why anything is inconceivable is that nature has not given us the experience which would render it conceivable. Society dislikes the idea of women entering any of the professions, becoming clerks and accountants, keeping shops and renting farms, because it thinks they can hardly do these things and retain their specially *womanly* attributes. *Solvitur ambulando*. If women in any number do enter on these lines of life with success, remaining at the same time what men wish women to be, they will prove the combination possible, and when once it is recognised as possible, it will soon cease to be thought strange.

We have spoken of the good sense that prevails throughout Miss Parkes' book, and we only did her justice; but there is one passage where she rises far beyond mere good sense, and shows a capacity rare in philanthropic men, still rarer in philanthropic women, to see that the good she has set her heart on accomplishing is, after all, limited and partial,—that life has more sides than the one she and her fellow-workers usually contemplate, and that if all men were well fed, sober, and industrious, they would still be not much nearer completeness.

> It is very good for all who habitually dwell in the atmosphere of any social question to go for awhile into scenes where its large proportions assume the likeness of a dream, standing, it may be, in mountainous reality upon the horizon, yet so softened by distance, and rendered delicate by intervening air, that its size and importance, its difficult heights and dangerous chasms, are lost in the fair faint lines of its form as it rises afar off in the pale depths of the sky. Some years ago I left London, where for many months I had been intensely engaged in work pertaining to the *Englishwoman's Journal*, and spent a couple of months in Rome. It was then that having ascended, as travellers are wont to do, to the top of the enormous arches of the Baths of Caracalla, and seeing on either hand the distant mountain ranges which encircle the Eternal City, this simile came home to me with a living and peculiar force. There was a world beyond the mountains, a world of activities and reforms; but its murmur was there unheard. There is a life of the conscience as distinguished from the purely spiritual life, and here it seemed as if the practical mundane conscience had retreated into the background and the soul had it all her own way. I never had felt in Italy the want of those particular ideas of social and moral activity which form the daily portion of every English or American man, woman, and child, any more than I now believe in the permanent engrafting of them upon the Italian race. Their own perfection they can doubtless attain, but it is not that of the Northern peoples. Considered, therefore, from that Southern land, thoughts which seem at home to possess soundness and completeness sink into mere parts of the whole; and aims which are all absorbing in London are reduced in porportion when measured against the vastness of Rome, whose history embraces many ages of time, and three great empires of faith, and as many mighty dominions in politics social and domestic. It may easily be imagined that sitting high up in the amidst the gigantic ruins, and looking out over the domes and towns on to the broad grey sweeps of the Campagna, from Albano to Loreito, my mind should revert to the home-work, to the ferment of thought and feeling in our periodical press, and particularly to the numerous discussions everywhere rising upon the claims and the duties of women, to the stirring life which rested not an hour, while that calm setting sun, sinking into the Western waters of the Mediterranean, touched with crimson the pinnacles of St John Lateran and the round roof of St Stefano on the Cœlian Hill, and lit up the green slope where Tusculum and Alba Longa are seen no more.—(Pp. 10-13).

LIFE AND WRITINGS OF JOSEPH MAZZINI. Vol. I., Biographical and Political. Vol. II., Critical and Literary. Smith and Elder. 1865.

FEW impartial readers of these volumes, we think, will refuse to allow that M. Mazzini is a subtle and discriminating critic, a forcible and often profound thinker, and a man unshrinkingly and unselfishly devoted to what he believes to be the right cause, and at the same time to agree with us that he would be about the worst and most dangerous guide that could be found for his own or any other country. The true practical and statesmanlike mind is distinguished above all things by moderation. It can give and take; has no objection to compromise, and if it succeeds in gaining only a very little of that which it originally strove for is content to wait and bide its time. This pliancy and caution is not the result of cowardice, but of a conviction that our knowledge of man and society is at best so very limited and partial that all first principles on these matters should be held somewhat loosely. It knows that none of us can see all things, and, as Mr Mill says, that none are so likely to see the things which we do not see as those who do not see what we see. Hence it is ready to judge each case on its own merits, to think far more of convenience than of symmetry, and frankly to accept any system that seems on the whole to work well, inexplicable as its doing so may be on preconceived theories. But with M. Mazzini theory is everything. Without it, thought and action are futile and valueless. All government, all art, all criticism are, according to him, based on certain "Eternal Verities," which he holds discoverable by man. When these have been discovered, certain systems follow as naturally from them as the propositions of Euclid from the definitions and axioms. We might object in detail to not a few of M. Mazzini's "Eternal Verities," many of which seem to us but half truths, and and others complete mistakes; but our quarrel with him as a political thinker and (though to a less extent) as a critic is fundamental, and applies to his method—that he insists on employing the most rigid deduction in fields of thought where it is only very partially, if at all, applicable. All unwillingness to push principles to their extreme consequences he denounces as scepticism and materialism. We do not think we wrong him by saying that he would not hesitate, had he the power, to arrest Italy in the progress she has undoubtedly made in the last few years, and plunge her into all the horrors inseparable from a revolution, because, according to his theory, she owes it to the world to become the exponent of certain ideas, and has as yet failed to recognise her mission. So strong is our apprehension of his one-sidedness and indifference to consequences that we can hardly regret that his own error and folly at one moment of his life have eminently impaired the hold which the pure enthusiasm of his character and his commanding talents might have given him over the destinies of his country. We of course speak of his acquiescence in the abortive project of Antonio Gallenga to assassinate Charles Albert, the then King of Sardinia. We do not seek to extenuate Mazzini's guilt in this matter, but it must in fairness be remembered that he and his friends were at that time goaded almost beyond the possibility of endurance by the severities of the Piedmontese Government, which severities they believed to spring from the King's special instigation; and that they might hold, with some slight show of reason, that Charles Albert having, for purposes of his own, enrolled himself in the ranks of the Carbonari, and then betrayed his cause, could not complain if the penalty to which he had voluntarily subjected himself were exacted of him. But Mazzini's sin in this matter, whether great or small, has brought a heavy punishment on him, in causing a widely-spread belief that he held a "theory of the dagger," and considered that assassination was a justifiable expedient for getting rid of tyrannical rulers. This imputation he indignantly denies, and, we think, conclusively disproves in the first of the volumes now before us. The project to which he criminally lent himself was regarded by him as no part of a system, but as an isolated act in no wise to be used as a precedent. Indeed he always, he says, denounced tyrannicide as not only wrong but foolish, "because in slaying the tyrant you did not slay the tyranny."

M. Mazzini's determination to devote himself to procuring the liberty of his country sprang, he tells us, in the first instance, from his literary studies. Poetry and art, he held, must be the expression of the true life of a people, but in Italy, in 1827, all national life had for three centuries been dormant, crushed under foreign rule. This life, then, must be awakened in order that the true scope and direction of Italian genius might be learned therefrom. Italy must become a nation before she could produce a really national literature. "Therefore," he says, "it was better for us to consecrate our lives to the solution of the problem, 'Are we to have a country?' and turn at once to the political question."

We can only give a very brief outline of the grounds on which M. Mazzini was led to his unalterable conviction that the destiny of Italy—a destiny which men's blindness and wickedness may postpone, but not permanently prevent—is to be *one, independent,* and *republican*. From his researches and reflections he saw—or fancied that he saw, because he wished to see—that when an old order of things was failing, when it became needful for the world that a step in advance should be taken, the *initiative* belonged of right to Italy. Twice already had this part been performed by Rome, which he regarded as the sum and expression of the life of Italy, and the worship of which was a part of his nature. The Rome of the Republic and the Cæsars had arisen to consign the old world to oblivion, and to carry among all nations the idea of *right* the source of liberty. The Rome of the Popes had constituted herself the centre of a new unity substituting for the idea of *right* that of *duty*—a duty common to all, and the source of their equality. Why, then, he asks—

> Why should not a new Rome—the Rome of the Italian people—portents of whose coming I deemed I saw arise to create a third and still vaster unity to link together and harmonise earth and heaven, right and duty, and to utter, not to individuals, but to peoples, the great word "association"; to make known to free men and equals their mission here below? (Vol. I., p. 38.)

It is eminently characteristic of the tone of M. Mazzini's mind that he should consider a theory like this—not without value as a historical *apercu*, if recognised as merely such, and not ridden to death,—as affording a sufficient *ποῦ στῶ* for the political and social reconstruction of all Europe. But, to proceed with our summary. We are now, he thinks, in one of the crises of the world's history. The period of individualism is passing away, having found its climax and completion in the French revolution and the career of Napoleon. In it the ultimate basis of society was the *rights* of the individual, and hence, of necessity, followed inequality and the tyranny of the strong over the weak. Italy, to fulfil her mission of iniatrix, is now called upon to come forward and proclaim to the world the central idea of the future, and this is the conception of *duty*—a duty binding on each man to labour in his own sphere for the common good. But as the conception of humanity at large is too wide and vague for a duty owed to it to have much practical efficacy, men must be educated up to it by means of the subordinate conception of *the nation*. Mazzini regards a *nation* as something more than the aggregate of the individuals composing it. It represents, according to him, "a sum of special faculties and tendencies—a tradition distinct from that of other nations, and constituting its past, present, and future generations one people." The individual would find his special wants and aspirations merge in and become subordinate to this larger collective life, and realise the meaning of association. But true association is only possible among equals; therefore, if Italy is to work out her destiny, there is no place in her for nobility or privileged classes. Hence, also, she must be republican, for a hereditary monarchy is not only in itself incompatible with equality, but brings with it aristocracy and social distinctions. This is the mission of Italy, to which at present she seems blind, and has turned aside to follow after material prosperity and to rely on Louis Napoleon. M. Mazzini declares that he bows his head in submission to his country's decision, but cannot refrain from expressing his conviction that she has been false to her highest duty.

We have left ourselves but little space to speak of M. Mazzini's literary productions, and we regret this the more, as we find in them far more to agree with, and when we do not agree, to admire, than in his political speculations. We may mention as especially worthy of study, a paper "*On Fatality considered as an Element of Dramatic Art*," and three articles on *Paolo Sarpi, Victor Hugo,* and *Lamartine*, reprinted from the *Westminster Review*. Of course, M. Mazzini, as a critic, is liable to the same charge that we brought against him as a politician, that he is too much bent on getting hold of a theory, and too reckless in applying it when he thinks he has found it. His leading doctrine is the same, that the day of *individualism* is gone, and that the poet of the future must cease to regard man as standing alone, and must look on him as inseparably bound to his fellow men. It is, in his opinion, because poets as yet have failed to recognise the idea of humanity as the true source from which they must draw inspiration that they speak feebly, and their words have so little power over men's hearts. The poetry of individualism reached its culmination in Shakespeare. The individual here is everything; there is no hint of humanity as a whole, no common progress, no common aim. Hence Shakespeare's sense of the worthlessness and inutility of life; for if man stands isolated and cannot feel himself bound up in the common lot, *sacrifice* is impossible for him, "and life, if it be not sacrifice, is null, or worse than null." The precursor of the poetry of the future, according to M. Mazzini, was Schiller, "whose works contain the religion of sacrifice, and of whose dramas the great social idea, the secret of our epoch, is the life and soul." Of course the question is altogether too great to be discussed here, and we must now take leave of this very remarkable man, for whom, mistaken as we think him in method, and thoroughly dangerous in the tendency of his efforts, it is impossible not to feel both respect and admiration.
